Our sincere gratitude to :

1. BDA former Chairmen,
2. Former BDA Commissioners,
3. Former BDA Board Members,
4. Land owners
5. BDA Staff and to the higher judiciary for their guidance.

“

To every farmer, landowner and family who contributed land for the **Dr. K. Shivarama Karanth Layout.**
Thank you.

Your contribution has become part of Bengaluru's growth story, and this historic allotment honours that contribution with dignity and transparency.

”

Shri N. A. Haris

Chairman, Bangalore Development Authority
MLA, Shanthinagar Constituency

Dasara jumbos step on the weighing scale!

Srikanta tips the scales at 5,790 kg; Kaveri the lightest at 3,075 kg

MYSURU

As the majestic Dasara elephants settle into their Mysuru routine, the first batch of nine jumboes has undergone an important pre-Dasara ritual — the weighing of the elephants.

The exercise is not merely a matter of numbers. The weight of every Dasara elephant is carefully recorded as it forms the basis for preparing its daily diet chart, ensuring that the jumboes receive the right quantity of food and nutrition during their strenuous training and exercise schedule.

According to the weight report prepared on August 30, the nine elephants together tipped the scales at an impressive 44,670 kg, with an average weight of nearly 4,963 kg each.

Among the first batch, Srikanta emerged as the heaviest, weighing 5,790 kg. He was followed by Ekalavya at 5,600 kg and Dhananjaya at 5,530 kg.

5,530 kg.

Mahendra, another heavy-weight in the royal brigade, weighed 5,490 kg, while Gopi recorded 5,170 kg. Prashantha weighed 5,205 kg, and Srirama, who has already begun attracting attention at the elephant camp, weighed 4,820 kg.

At the other end of the scale was Kaveri, weighing 3,075 kg, making her the lightest among the nine. Lakshmi weighed 3,990 kg.

The weighing exercise is a routine but crucial part of Dasara elephant management.

WEIGHT	
Srikanta	5,790 kg
Ekalavya	5,600 kg
Dhananjaya	5,530 kg
Mahendra	5,490 kg
Gopi	5,170 kg
Prashantha	5,205 kg
Srirama	4,820 kg
Lakshmi	3,990 kg
Kaveri	3,075 kg

As the elephants undergo regular walks, training and exercise in preparation for the grand Jumbo Savari, their food intake has to be adjusted according to their individual requirements.

Thus, behind the grandeur of the Mysuru Dasara procession lies a meticulous system of weighing, nutrition, exercise and health monitoring — all aimed at keeping the royal pachyderms fit and ready for their date with the magnificent Ambari.

MYSURU

In a strong display of citizen resistance, the Yadavagiri Residents Association (YRA), alongside active youth and local residents, staged a powerful protest at Chaluvamba Park. Armed with absolute resolve, the gathering united to vehemently oppose the government's controversial move to allow 05% of park and garden lands to be carved out for infrastructure and utility projects.

Drawing support from diverse groups and citizen committees invited across Mysuru—including AAP, NIE, Vidya Vardhak Sangh, residents around Lav Kush park in Kuvempu Nagar, and residents of all wards across the city—the coalition united under a common banner. Aligning with prominent voices like BJP leader Prathap Simha, MLA Srivatsa, and MLC Raghu Kautilya the protest delivered a singular, uncompromising message: Our parks cannot be sold, mort-

gaged, or leased.

A threat to green lungs

The gathering addressed the alarming reality that if this proposed amendment to the

Government Parks (Preservation) Act, 1975, is enacted into law, it will systematically destroy Karnataka's parks, citing the historical vulnerability of landmarks like Lalbagh and the conversion of the famous football ground near the Dasara Exhibition into a vehicle parking lot.

Speakers at the forefront emphasized that this bill is driven by ulterior motives rather than public interest. Leaders strongly criticized the

current administration, noting that Chief Ministers and elected officials are meant to be custodians of public heritage, not proprietors. Acting like landlords over public property is a betrayal of public trust. Citizens firmly declared that begging elected leaders for basic ecological preservation is no longer an option—protecting our green spaces is an undeniable constitutional and civic right.

The protest witnessed active participation from local residents and youth who took over the grounds to demonstrate unified opposition against the "No Playgrounds, Now No Parks" trajectory.

Expressing strong disapproval of apathy from various institutional sectors, speakers stressed that public spaces belong to every citizen, now and forever.

Prathap Simha joined the discourse, underscoring the absolute necessity of maintaining zero encroachment to protect biodiversity, community health, and urban futures. The consensus on the ground was razor-sharp: less concrete, more green; once lost, green spaces are gone forever.

The high-energy meeting culminated in a powerful protest march across the breadth of Chaluvamba Park. Carrying placards reading "Our Parks Are Not For Sale!" and "Say No to 5 per cent.," the residents demonstrated that community vigilance will block any attempt to diminish the quality of life for living beings.

YRA calls upon citizens across the state to raise their voices, because protecting parks means protecting nature and future generations.

“Launch campaign to clear encroachments on Urban local body properties”

MYSURU

Urban local bodies must provide essential facilities such as water supply, roads, underground drainage and street lighting, and should focus on mobilising resources to provide these services, said Minister for Municipal Administration H.C. Balakrishna.

Speaking after chairing a progress review meeting of urban local bodies in Mysuru, Chamarajanagar and Kodagu districts, held in Regional Commissioner's Office here on Monday, he said providing basic infrastructure in urban areas was the responsibility of his department. While the Centre and State governments provide funds, local bodies must also generate resources by effectively utilising their properties and collecting taxes for various services within the stipulated time. Officials must ensure proper sanitation, drinking water supply and underground drainage facilities.

The Minister instructed the Deputy Commissioners to arrange for engineers from the

Public Works Department (PWD) to be given additional charge in places where engineering posts are vacant in urban local bodies. Budgets presented by urban local bodies should not be a mere formality, he said, adding that budgets must be prepared based on systematic tax collection. Around 30 per cent of the funds received by urban local bodies come from Central and State government grants. The legal wing of the Municipal Administration Department to effectively represent cases involving urban local bodies in courts.

No compromise

Balakrishna announced that a campaign would be launched to clear encroachments on properties belonging to urban local bodies and made it clear that there would be no compromise in removing encroachments. Several companies had expressed interest in collecting waste from urban local bodies and producing biogas from it. Discussions would be held with these companies and agreements

would be signed. The government had also brought in legislation to convert private roads into government roads. Any unauthorised layouts that had been developed would be removed. And engineers would be held directly responsible if works were not completed within the stipulated time. Contractors who failed to maintain quality or complete works on schedule would be issued three notices and subsequently blacklisted, he added.

Animal Husbandry and Sericulture Minister Puttarangashetty said burning units should be established for cremation of bodies within the jurisdiction of urban local bodies in Chamarajanagar district. Several local-body properties had been encroached upon by private individuals and that many such cases were pending in courts. The department should take appropriate action, he said.

Virajpet MLA A.S. Ponnanna, speaking through video conference, said drinking water pipeline works under AMRUT 2.0 in Virajpet were

yet to be completed and household tap connections had not been provided. Construction of the municipal building was also pending. He urged the authorities to expedite the provision of basic amenities.

Chamundeshwari MLA G.T. Devegowda highlighted the shortage of engineers in urban local bodies. Nearly 1,000 private layouts in the Mysuru region had been developed without adequate infrastructure, making it difficult to provide basic amenities and the minister must take steps to extend essential services to these layouts.

Hunsur MLA G.D. Harish Gowda said sewage from Hunsur town was flowing into the Lakshmanatirtha river, polluting it. An estimated ₹72 crore had been prepared for works to prevent sewage from entering the river, he said. He also sought recruitment of staff to the Hunsur City Municipal Council and removal of encroachments from municipal properties, which, he said, could help increase the council's revenue.

NATIONAL SPORTS DAY 2026

Mysuru Cyclists launch ‘Ek Ghanta Khel Ke Maidan Mein’ campaign

MYSURU

Aligning with the nationwide celebrations of National Sports Day and the vibrant grassroots call to action "Ek Ghanta Khel Ke Maidan Mein" ("One hour on the playground"), a dynamic group of five fitness enthusiasts and cycling proponents in Mysuru took to the pedals today.

Pedalling out from the city limits toward the scenic Chikka Devaraya Channel near the Krishnarajasagara (KRS) Dam, the group championed active living and outdoor fitness to honor the legacy of hockey legend Major Dhyan Chand. Observed nationwide under the inspiring theme "Khelega Bharat, Jeetega Bharat," National Sports Day commemorates the birth anniversary of the legendary "Hockey Wizard" Major Dhyan Chand—who famously honed his peerless skills from practicing under the moon-

light, earning him the enduring moniker "Chand" (Moon). Echoing the government's vision to transform fitness into a mass people's movement, the Mysuru cyclists' journey served as a local testament to building a healthier, more active community.

Tiger Solanki, speaking on the initiative, he emphasized that everyday outdoor activities like cycling play a crucial role in bringing communities together, reducing screen time, and embracing wellness. The ride successfully combined a tribute to India's sporting history with a practical step toward the "Fit India"

mindset along Mysuru's iconic waterways.

The inspiring ride brought together a diverse cross-section of passionate individuals dedicated to fitness, adventure, and public service: Dr. Satish BC, Commissioner for Agriculture, Government of Karnataka. Anusha Kiran – Research Scholar from the University of Mysore (UOM), Spandana – Yoga Practitioner, Manjunath – Professional Photographer and D.S.D. Solanki – Ardent adventure enthusiast from India and founder of The Mountain Goat, coordinated the program.

MCCI welcomes inclusion of Mangaluru Rly Section to Mysuru Dvn

MYSURU

Dr. K. B. Lingaraju, President of the Mysore Chamber of Commerce and Industry, has welcomed and congratulated the Central Government and the Railway Department on their decision to include the Mangaluru railway section under the Mysuru Division.

In a press release here, he said both Mysuru and Mangaluru are major commercial, industrial and tourism centres. With these two regions coming under the jurisdiction of the same railway division, railway connectivity between Mysuru and Mangaluru is expected to become more effective.

In particular, this will enable industries and traders from Mysuru, Kodagu, Mandya, Hassan and other parts of central Karnataka to make greater use of the port facilities available in Mangaluru. The inclusion will create new opportunities for the transportation of industrial products, import of raw materials, exports, tourism and freight movement. If better railway connectivity is established between Mangaluru Port and the Mysuru-Bengaluru industrial corridor, it will provide further impetus to the economic development of Karnataka.

The inclusion of the Man-

galuru railway section in the Mysuru Division will also facilitate better administrative coordination and operational efficiency. The Railways must take necessary steps in the coming days to introduce more train services between Mysuru and Mangaluru, provide faster connectivity, and develop the required infrastructure for freight transportation.

On behalf of the Mysuru Chamber of Commerce and Industry, he has extended his heartfelt congratulations to the Central Government, the Ministry of Railways and the concerned officials for taking this important decision.

VILLAGERS BREATHE EASY

Tiger finally trapped in HD Kote

MYSURU

After days of fear and sleepless nights, residents of Hosaholalu village in H.D. Kote taluk can finally breathe easy.

A tiger that had been frequently spotted prowling around the village and its surrounding agricultural areas has finally been trapped in a cage set up by the Forest Department.

The capture has brought a huge sense of relief to villagers who had been living under the shadow of the big cat's movements and were increasingly reluctant to venture into their fields.

Forest Department personnel had been closely monitoring the tiger's movements after repeated sightings were reported around Hosaholalu. A trap cage was strategically placed at a location frequented by the animal. The operation finally yielded results, with the tiger entering the cage on Monday morning.

For several days, the tiger's presence had become a source of growing anxiety among villagers. Farmers were particularly worried about entering their fields and venturing out alone, fearing a sudden encounter with the predator.

Residents of the Hosaholalu said they had been seeing the tiger intermittently on the outskirts of the village. "The tiger had been appearing around the village for several days. Villagers were afraid to

A grim reminder from 2025

• Tiger attacks had triggered widespread fear across the forest fringes of Mysuru district last year. On October 16, 2025, farmer Mahadeva Gowda, 35, was seriously injured in a tiger attack near Badagalapura in Saragur taluk while working in his field. He suffered grievous facial injuries and lost his eyesight.

• Barely days later, on October 26, Rajashekar Murthy, a farmer from the Mullur-Bennegere area, was mauled to death by a tiger while herding cattle. The incident sparked anger among villagers, who alleged that repeated tiger sightings had not received adequate preventive response from the authorities.

• The situation subsequently worsened. A third fatal tiger attack in the wider Bandipur-Nagarahole landscape in November 2025 claimed the life of 35-year-old farmer Chowdaiah Nayak near Hale Heggodilu in Saragur taluk.

go to their agricultural fields. We had requested the Forest Department to capture it. Officials placed the cage three days ago, and the tiger was trapped on Monday morning. We are now relieved that the fear has subsided," he said.

The forest department officials told that the captured tiger would be released in the Kakanakote forest area near the Kabini backwaters.

The latest capture comes

against the backdrop of a turbulent year for human-tiger conflict in the H.D. Kote-Saragur landscape.

Following three tiger-related deaths in the region within a month, the state government ordered the temporary suspension of safari operations in both Bandipur and Nagarahole Tiger Reserves, besides halting trekking activities in human-wildlife conflict hotspots. Forest personnel and

safari staff were redirected towards operations to locate and capture conflict tigers.

The safari suspension lasted for several months before operations were gradually resumed in 2026 with additional safety measures and reduced vehicle movement.

Another tiger mystery in Chamarajanagar

Meanwhile, in a separate incident, the decomposed carcass of an approximately three-year-old male tiger was found six days ago in a farmer's field at Bommalapura village in the buffer zone of Bandipur Tiger Reserve in Gundlupet taluk of Chamarajanagar district. The carcass was discovered by a farmer who had gone to harvest his sunflower crop. The Forest Department's veterinary team, led by Dr. Wasim Mirza, conducted a post-mortem examination.

The tiger's claws, teeth and other relevant body parts were collected as part of the investigation and sent to the Forensic Science Laboratory (FSL) for examination. Following the prescribed procedures, the carcass was subsequently disposed of by burning.

With the Hosaholalu tiger now safely trapped, villagers are hoping that the latest operation will bring an end to the immediate threat and allow them to return to their farms without the constant fear of a tiger emerging from the surrounding vegetation.

CM gives compensation to Karanth Layout landowners

DKS said compensation aims to ease pain of farmers who parted with their land.

BENGALURU

Chief Minister DK Shivakumar on Monday distributed compensation to landowners and farmers who parted with their land for the Dr K Shivaram Karanth Layout and said the government was committed to reducing their hardship.

"I am a farmer's son and understand the pain farmers experience when they lose their property.

My intention is to reduce that pain," he said at a programme held at the Jawaharlal Nehru Planetarium here.

Shivakumar said compensation had been delayed for years due to court cases. Efforts had been made for three years to provide relief, but a court stay stalled the process. The government had lost around ₹1,000 crore annually due to the delay, he said.

He said the Karanth Layout had involved prolonged legal and administrative challenges, with land acquisition cases reaching the Supreme Court. Around ₹16,000 crore has been invested in developing the layout, he said.

The layout covers around 3,700 acres, while nearly three crore square feet of sites are being allotted to farmers. Shivakumar said farmers would receive improved compensation options for land acquired for BDA projects, including double

Chief Minister DK Shivakumar initiates the digital allotment process covering nearly 30 million square feet of land at a programme at the Jawaharlal Nehru Planetarium in Bengaluru on Monday. Revenue Minister Krishna Byre Gowda, BDA Chairman NA Haris among others look on. (Right) Shivakumar interacts with farmers on the occasion.

Karanth Layout

- **Land compensation:** Distributed to eligible landowners
- **Layout area:** 3,700 acres
- **Investment:** ₹16,000 crore
- **Farmers:** 3,200 names to feature on Wall of Gratitude
- **Site area:** Nearly 3 crore sq ft
- **Compensation options:** Double guidance value/double TDR/35% commercial sites/FAR/40% developed land
- **Peripheral Road:** Around 80% land acquisition consented

the guidance value, double TDR, 35% commercial sites, FAR or 40% developed land.

I am a farmer's son and understand the pain farmers experience when they lose their property.
— D K Shivakumar, Chief Minister

I am a farmer's son and understand the pain farmers experience when they lose their property.
— D K Shivakumar, Chief Minister

Shivakumar also urged farmers not to sell the sites allotted to them, saying their value would rise substantially in the future.

He said the government was developing the Bengaluru Business Corridor with a ₹26,000-crore loan to ease traffic congestion.

He also announced a teak plantation programme targeting one crore saplings annually, with 70% of returns going to farmers and 30% to the government.

Wall of gratitude

The government will create a 'Wall of Gratitude' carrying the names of 3,200 farmers, who gave their land for the Dr K Shivaram Karanth Layout, Shivakumar said, adding that the initiative was intended to recognise their contribution to Bengaluru's development. He also urged beneficiaries not to sell their allotted sites, noting that property values were expected to rise considerably as infrastructure, roads and public amenities developed around the layout in future years.

DKS: IN TOUCH WITH MEA OVER 13 MISSING KANNADIGAS IN NEPAL

A group of 13 Kannadigas who travelled to Nepal remains untraceable, Chief Minister D K Shivakumar said on Monday. He said the Karnataka government was in constant touch with officials of the Union Ministry of External Affairs to intensify search and rescue efforts. The state government has also sent its representatives to Nepal to assist in tracing the missing persons. Shivakumar said officials were closely coordinating with the Centre and monitoring developments. Efforts are underway to establish contact with the group and ascertain their whereabouts amid the ongoing situation in Nepal.

SCO SUMMIT 2026

Every day of war sets humanity back: PM

BISHKEK

Russian President Vladimir Putin met Prime Minister Narendra Modi on the sidelines of the Shanghai Cooperation Organisation (SCO) Summit in Bishkek of Kyrgyzstan, with PM Modi reiterating New Delhi's support for all peaceful efforts to resolve the Ukraine conflict.

Modi said every day of the war sets humanity back and stressed the need to work towards ending hostilities.

Putin said Russia-India relations were strengthening, aided by PM Modi's personal attention. Tourist exchanges between the two countries grew 16% in 2025.

The PM told Putin that India would continue to support peace, stressing the need to move from "endless wars to the end of war." He said both countries could move forward by keeping their respective national interests in mind and added that he was carrying a message of peace from the land of Mahatma Gandhi and Gautam Buddha.

The bilateral meeting, which lasted for nearly 30 minutes, began with Prime Minister Narendra Modi walking up to Russian President Vladimir Putin, exchanging a handshake and a hug before the talks. After the meeting, PM Modi shared a video of their interaction on X, writing, "Always a delight to meet President Putin. Sharing my remarks during our meeting in Bishkek."

At the start of the bilateral meeting, PM Modi said, "Excellency, my friend, I am de-

Diplomacy in a nutshell

- PM Modi-Putin car diplomacy returns at SCO summit in Bishkek.
- PM reiterated India's support for peace and ending Ukraine hostilities.
- Bilateral talks focussed on defence, energy, trade and investment cooperation.

lighted to meet you." He said Putin's last visit to India had been highly successful and memorable, helping take the two countries' economic ties to a new level. Modi added that the outcome of the Delhi meeting had kept officials in both countries busy implementing the decisions taken.

The talks focused on key aspects of India-Russia ties, including trade and investment, energy and defence. The meeting came a week ahead

of Putin's visit to India for the annual BRICS summit. Once again, the car diplomacy first witnessed between PM Modi and Putin at the SCO Summit in China's Tianjin last year was on display when Putin travelled to India a few months later in 2025. The tradition has now continued in Bishkek.

Modi-Pezeshkian vow to expand India-Iran trade basket

Bishkek: Prime Minister Narendra Modi on Monday told Iranian President Masoud Pezeshkian that India wants to "expand and diversify" its trade basket with Iran, while calling for the West Asia conflict to be resolved through dialogue and diplomacy. Modi met Pezeshkian on the sidelines of the Shanghai Cooperation Organisation (SCO) Summit in Bishkek of Kyrgyzstan, where the two leaders discussed bilateral ties as well as the evolving situation in West Asia. This comes days after US has warned that economic engagement "of any kind" with Iran could trigger penalties as the Trump administration seeks to isolate Tehran financially. Against that backdrop, PM Modi and Pezeshkian discussed ways to expand and diversify the India-Iran trade basket, while also taking up the evolving situation in West Asia and the safety of commercial shipping and seafarers. "Met President Masoud Pezeshkian in Bishkek. Reiterated our commitment to strengthening India's long standing friendship with Iran across diverse sectors," PM Modi said in a social media post.

FIR against Rahul reflects BJP's casteist mindset: GP

BENGALURU

Deputy Chief Minister Dr G Parameshwara on Monday condemned the FIR registered by Uttarakhand Police against Congress leader Rahul Gandhi, alleging that it reflected the BJP's "casteist mindset" and disregard for constitutional values.

Parameshwara said the case was a serious attack on democracy, the Constitution and social justice. He questioned the rationale behind registering a case against Rahul Gandhi for raising concerns over caste discrimination and untouchability.

His remarks followed an alleged "purification" ritual conducted at a venue in Haldwani after Congress president Mallikarjun Kharge addressed a public meeting there. Parameshwara said such an act following the visit of a prominent Dalit leader raised serious questions about caste discrimination. "Is it acceptable under the Constitution of this country to 'purify' a place after a Dalit leader has visited it?" he asked.

He questioned why the authorities had allegedly registered an FIR against Rahul Gandhi instead of acting against those responsible for the purported discriminatory act. He also objected to the use of provisions of the SC/ST Act against Rahul Gandhi, saying the Congress leader had spoken in support of the dignity, equality and constitutional rights of Dalits.

"Is speaking against untouchability a crime? Is questioning caste discrimination a crime? Is raising one's voice for the dignity and self-respect of Dalits a crime?" he asked.

INDIA BEATS IRAN WAR BLUES

Logs GDP growth of world-beating 7.8% in Q1FY27; beats RBI forecast.

NEW DELHI

India's economy grew 7.8% in the April-June quarter of 2026-27, beating expectations and the Reserve Bank of India's (RBI) forecast of 7% despite concerns over the impact of the Iran war, high energy prices and global economic uncertainty.

The growth rate, which kept India as the world's fastest-growing major economy, was lower than the 8.6% expansion recorded in the previous quarter but higher than the 6.9% growth in the corresponding quarter of 2025-26, according to government data released on Monday.

The stronger-than-expected performance underscored the resilience of domestic

economic activity despite heightened geopolitical risks and concerns that the Iran conflict could trigger higher energy prices, inflationary pressures and weaker global demand. Real Gross Domestic Product (GDP) at constant prices in the first quarter of FY27 is estimated at Rs 81.36 lakh crore, compared with Rs 75.46 lakh crore in the corresponding quarter of 2025-26, registering a growth rate of 7.8%,

Doomsayers doomed and India bloomed: PM

India's exemplary GDP growth of 7.8% during Q1 of FY 2026-27 is a herculean feat. The collective strength of our people ensured India delivered such growth despite oil price shocks and supply chain issues in the midst of global uncertainties.

— Narendra Modi, Prime Minister

the Ministry of Statistics and Programme Implementation (MoSPI) said. "Indian economy has sustained growth momentum despite global headwinds," the ministry said.

Nepal death toll goes past 900

KATHMANDU

Devastating floods near the border with China have killed at least 939 people in Nepal, while the number of missing in the country dropped to 3,925, its disaster authority said on Monday, as rescue efforts entered a sixth day.

Indian authorities are seeking to identify the bodies, and they are not included in the toll.

More than 10,000 people have been rescued from the affected areas, including over 323 foreign nationals. The missing include 590 foreign nationals from 39 countries, according to the ministry.

Nepal seeks international support for tunnel rescue, freezers, forensics

Nepal has sought additional international support, including specialised equipment and

technical assistance for tunnel rescue and forensic work, as rescue operations continued after the floods that have killed hundreds and left thousands missing.

During a press briefing in Kathmandu on Monday, Nepal's Foreign Ministry spokesperson Lok Bahadur Chhetri said the country had sought essential non-food items and services such as freezers, DNA testing kits and LiDAR from the US, relief-specific items like DVI from Singapore, and belly bridges and high-capacity drones from China and Singapore, he said.

"So far, Nepal has received airtight bags for the management of bodies, while more are also being delivered."

A team of 18 forensic experts from India specialising in DNA analysis has been in Nepal since August 29, he Minister added.

Woman, 2 minor grandkids run over by train

BENGALURU: A woman and her two grandchildren were killed on the spot after being hit by a speeding train while crossing the railway tracks at Doddaballapur city in Bengaluru Rural on Monday.

The deceased are Irfana (46), Rukiya (13), and Rakiya (8) of Palanajogahalli, as per the police. The children had come from Hindupur to their grandmother's house for the holidays. The accident occurred this morning while they were returning with their grandmother to attend school as their vacation ended.

Bengaluru Rural Railway Police Station inspector Jagadish R said the Latur-Bidar Express ran over a woman and her grandchildren, who were crossing the railway tracks near Doddaballapur railway station.

GRIEVANCE REDRESSAL AT DOORSTEPS

‘Prajaseva Abhiyana to take governance to people’

BENGALURU

Karnataka Chief Secretary Dr Shalini Rajneesh has outlined the key features and review mechanism of the government's 'Prajaseva Abhiyana', which will begin from Kudligi Hobli in Vijayanagara district on September 5.

The initiative aims to take administration to citizens' doorsteps and provide solutions to grievances either immediately or within a stipulated timeframe. Meetings will be held across the state every Saturday, with district in-charge ministers presiding on the first and third Saturdays and local MLAs chairing meetings on the second and fourth Saturdays.

Citizens will receive informa-

tion at least 15 days in advance through door-to-door pamphlets containing application forms and document checklists. AI-based calls will also provide details about meeting dates, venues and presiding representatives.

Applications can be submitted beforehand at Grama One centres. Facilities with computers, printers and internet connectivity will also be available at meeting venues.

Two queues will handle grievances: one for new complaints and another for unresolved or unsatisfactorily resolved complaints registered under Sakala or IP-

Prajaseva Abhiyana

- **Launch:** September 5, Kudligi Hobli
- **Meetings:** Every Saturday
- **First & third Saturday:** District in-charge minister
- **Second & fourth Saturday:** Local MLA
- **Advance notice:** 15 days
- **Helpline:** 1902
- **Online:** IPGRS
- **Review:** Three-tier system every Wednesday

GRS and pending beyond 21 days. Eligible beneficiaries may receive sanction letters and resolution documents on the spot. A real-time tracking facility will enable citizens to monitor the progress.

Three-tier review

Every Wednesday, grievances will undergo a three-stage review. From 9 am to 11 am, Tahsildars and Taluk Panchayat executive officers will examine cases. Assistant Commissioners will review unresolved matters from 11 am to 1 pm, while Deputy Commissioners will conduct district-level reviews from 3 pm to 5 pm. Cases not resolved within the stipulated period will automatically be escalated to higher authorities.

BALLARI NAGENDRA'S EXIT

First political storm for the 3-month-old Shivakumar Govt

SHYAM SUNDAR VATTAM
MYSURU

The resignation of B. Nagendra has landed like the first major political thunderbolt on the three-month-old D.K. Shivakumar government, forcing the Chief Minister to confront a difficult combination of corruption allegations, Opposition aggression and the sensitive question of tribal representation.

Nagendra's exit is not merely the loss of one ministerial berth. For the Congress, it touches a politically delicate nerve in the Ballari region, where the Scheduled Tribe community has a significant presence and where Nagendra has built his political base. His departure could therefore have repercussions well beyond the Cabinet table.

The Planning and Statistics Minister resigned on August 28 amid renewed political pressure over alleged irregularities in the Karnataka Mahharshi Valmiki Scheduled Tribes Development Corporation. Governor Thaawarchand Gehlot subsequently ac-

cepted his resignation. Nagendra had earlier resigned from the Siddaramaiah Cabinet in 2024 when the controversy first erupted, before being re-inducted into the Shivakumar Cabinet on August 3, 2026.

For Shivakumar, the episode is an uncomfortable political déjà vu. The Chief Minister had stood firmly by Nagendra, maintaining that his re-induction followed due process and defending him against the Opposition's campaign. Even after the resignation, Shivakumar sought to project the move as one made in the larger interest of the party rather than an admission of wrongdoing.

"This does not mean the government has bowed down. He is a loyal worker and a loyal leader who has taken this decision to avoid embarrassment to the Con-

gress party," Shivakumar said.

But politically, the BJP is unlikely to allow the issue to die with Nagendra's resignation. The Opposition had repeatedly disrupted legislative proceedings and demanded action against him, turning the controversy into a larger attack on the Congress government's credibility.

The bigger challenge for Shivakumar is the message that Nagendra's exit sends to the ST community. Nagendra was not just another Cabinet minister; he was one of the prominent Congress faces from the Ballari belt and a leader associated with tribal welfare. His removal could create a perception among sections of the community that its political representation has been weakened.

This makes the impending Cabinet reshuffle politically sensitive. Reports indicate that Shivakumar has already travelled to Delhi for consultations with the Congress leadership over filling vacant berths and possible changes in the Cabinet. Community, regional and caste represen-

tation are expected to figure prominently in the exercise.

The Congress, therefore, faces a delicate balancing act: replace Nagendra quickly, but ensure that his successor carries enough political weight in the ST community and the Ballari region.

For Shivakumar, who has begun his tenure promising an assertive and politically energetic administration, Nagendra's resignation is an early test of his crisis-management skills.

The Chief Minister has tried to turn a setback into a demonstration of party discipline. But the Opposition will attempt to turn it into evidence of governmental vulnerability.

The battle lines are already visible.

"All our MLAs, ministers or workers are disciplined soldiers of our party," Shivakumar said amid the controversy.

Now, the real test is whether those "disciplined soldiers" can prevent one minister's resignation from becoming a wider political wound for the Shivakumar government.

LIONS CLUB HOLDS SRIGANDHA LIONS CUP T8 CRICKET TOURNAMENT

MYSURU

The Srigandha Lions Cup T8 cricket tournament was organised by Lions International District 317G at the Sri Jayachamarajendra College of Engineering (SJCE) grounds in the city.

Four teams, including three from Mysuru and one from Mandya, representing different Lions Clubs, participated in the tournament.

Inaugurating the tournament, District Governor Mathidev Kumar said the Lions cricket team, which had started with just five or six members, now has 55 players. He expressed hope that the

number would cross the 100-mark in the coming days.

He said the Lions organisation, which had traditionally focused on service activities, was now also encouraging sports. "We will organise shuttle badminton and carrom tournaments in the coming days," he said.

Second District Vice-Gov-

ernor M. Siddegowda, former District Governors and Multiple Council Chairman Dr. N. Krishnagowda and Subramanya, Lions Club of Mysuru Srigandha Kempegowda, Regional Chairperson Jyothi Manjunath and District Sports Officer Kiran Bolaar also spoke on the occasion.

Senior journalist Amshi

Prasannakumar presided. District Cabinet Secretary T.H. Venkatesh, Additional Cabinet Secretary Jayakumar and District Cabinet Treasurer A.P. Bharatesh were the chief guests.

Lions Club of Mysuru Srigandha Zone Chairperson Ningraju welcomed the gathering and delivered the introductory address. He also outlined the various programmes proposed to be undertaken by the club in the coming days.

Mysuru Chamber of Commerce and Industry President Dr. K.B. Lingaraju, A.S. Satish, Lokesh and other office-bearers of the Lions Club were present.

Preserving manuscripts vital to safeguard heritage: Devaraju

MYSURU

The preservation and digitisation of ancient manuscripts is essential to safeguard the country's rich cultural and intellectual heritage for future generations, said A. Devaraju, Commissioner, Department of Archaeology, Museums and Heritage.

Speaking after inaugurating the 28th monthly special lecture programme on 'Manuscriptology: An Introduction', organised by the Department of Archaeology, Museums and Heritage in Mysuru, he said the younger generation was increasingly spending more time on mobile phones and reading newspapers and books less frequently. "Mobile phones have become an integral part of our lives. We spend considerable time on WhatsApp, Instagram and Facebook. Technology can either be a modern tool or a distraction, depending on how we use it," he said.

Recalling his student days, he said there were no mobile phones, television or FM radio and that Akashvani was the major source of information and entertainment. He urged students to make conscious efforts to reduce their dependence on mobile phones and develop the habit of reading.

He said the Oriental Research Institute (ORI), University of Mysore, houses more than 70,000 manuscripts, many of which could be preserved for nearly 1,000 years with proper conservation. Manuscripts of important works, including copies of Kautilya's Artha-

shastra, are available in the department, he added.

Karnataka Knowledge Bank

The Commissioner said the Government had enacted legislation to establish the 'Karnataka Knowledge Bank'. While the country has more than 1.20 crore manuscripts, Karnataka alone is home to more than 4.19 lakh manuscripts. Digitisation of these valuable records is currently under way, and the Department of Archaeology, Museums and Heritage will serve as the nodal department for the initiative, he said.

Research Assistant at the Oriental Research Institute, University of Mysore, who delivered the special lecture, explained the evolution, significance and conservation of manuscripts.

He said knowledge was initially transmitted orally through recitation and memorisation. As the need to preserve the meaning and content of knowledge increased, writing systems developed and manuscripts began to be produced, including those engraved on palm leaves. The Mahabharata, traditionally described as 'Vyasavi Rachitam, Ganesha Likitam', is among the celebrated works associated with the manuscript tradition.

Explaining the term Man-

uscriptology, he said the word refers to writing done manually by hand. Manuscripts are available in several languages and scripts, including Tulu, Sanskrit, Konkani, Nandinagari, Malayalam, Kannada, Telugu and Tamil, among others.

Palm-leaf manuscripts can survive for around 1,000 years when properly preserved. Different varieties, including manuscripts written on thin and thick palm leaves, are available. He stressed the need for scientific conservation and digitisation of such manuscripts to ensure that the knowledge contained in them remains accessible to future generations.

He said extensive research was being undertaken on manuscripts and that their study and documentation continued to be an important area of historical and academic research.

The programme was attended by students of JSS Women's Degree College and Vidyavardhaka Degree College, students of the History Department of the University of Mysore, Manasagangotri, students of Karnataka State Open University, senior citizens, members of the public, history enthusiasts and officers and staff of the Indian National Trust for Art and Cultural Heritage (INTACH), among others.

The programme was inaugurated by watering a sapling in the presence of officials of the Department of Archaeology, Museums and Heritage, lecturers from Vidyavardhaka College and JSS Women's Degree College and other guests.

“Rehabilitate manual scavengers, end deaths in septic tanks”

MYSURU

Demanding comprehensive rehabilitation of manual scavengers and strict implementation of the Prohibition of Employment as Manual Scavengers and their Rehabilitation Act, 2013 (PEMSR Act), the Safai Karmachari Watch Committee held a state-level awareness rally in Mysuru on Monday.

Members of the committee, who arrived at the Deputy Commissioner's office as part of the rally, submitted a memorandum seeking immediate action to protect the lives, health and dignity of sanitation workers.

Speaking on the occasion, committee State Convenor Dr. K.B. Obalesh said engaging human beings in cleaning human excreta, sewage or sewer lines under hazardous and inhuman conditions was a violation of human dignity. Article 17 of the Constitution prohibits untouchability, while Article 21 guarantees the right to live with dignity. Though the PEMSAR Act, 2013 has prohibited manual scavenging and prescribed rehabilitation measures, its provisions must be implemented strictly, comprehensively and effectively across Karnataka, he said.

The Act prohibits manual

‘Provide Government jobs to families of workers who died’

“Families of sanitation workers who have died of suffocation inside sewage and septic tanks should be provided Government jobs. Appropriate social-security schemes must also be formulated for them. Manual scavengers who wish to continue working in the same occupation should be provided modern mechanised equipment free of cost, along with proper training to operate the machinery.”

—K. Nanjappa, Basavanagudi, Permanent Member

scavenging and the construction or maintenance of insanitary toilets, including dry latrines and other facilities that require human handling of human waste. Connecting household toilets to open drains, septic tanks or other unsafe systems, as well as employing workers to enter septic tanks, manholes or sewage pits without proper safety equipment, training and scientific safety standards, are unlawful and punishable acts, he said.

"It is extremely tragic that workers, particularly from poor, backward and marginalised communities, continue to lose their lives due to toxic gases and suffocation while carrying out such hazardous work. Such deaths must end completely," Obalesh said.

He demanded that sanitation work be carried out only with modern mechanised equipment and that adequate machinery be immediately de-

ployed wherever required in both urban and rural areas.

The State-level awareness rally is being conducted from August 24 to September 2 across various districts. The committee is meeting Deputy Commissioners and submitting memoranda addressed to the Chief Minister, highlighting the continued violations and demanding strict enforcement of the 2013 Act.

Comprehensive survey, rehabilitation sought

Safai Karmachari Vigilance Awareness Committee permanent member K. Nanjappa, Basavanagudi, said that despite the ban on manual scavenging, sanitation workers continue to die after being forced to enter septic tanks and sewage pits.

He alleged that adequate punishment was not being imposed on those responsible and that many already identified

manual scavengers had not received the compensation and rehabilitation benefits due to them.

He demanded a comprehensive and transparent survey and identification of manual scavengers across all districts of Karnataka in accordance with Sections 11 and 12 of the PEMSAR Act, 2013. A self-declaration mechanism should also be introduced to ensure that no family is left out of the identification process, he said.

Nanjappa called for speedy and complete rehabilitation under Sections 13 and 16 of the Act. Every identified manual scavenger should receive all rehabilitation benefits guaranteed under law.

Families without houses or sites should be provided free residential sites or pucca houses, while permanent alternative employment should be provided according to their interests and qualifications. Skill training, equipment, capital, loans and necessary financial assistance should also be extended, he demanded.

He further sought health insurance and health cards for all identified families, with the Government bearing essential medical expenses. Those unable to work should be provided adequate monthly pensions and social security benefits.

MLA Sait inaugurates new water tanks in NR Constituency

MYSURU

Three newly constructed large-capacity water storage tanks, each built at a cost of Rs 1.30 crore, were inaugurated by NR constituency MLA Tanveer Sait on Monday.

The tanks have been constructed at Hyder Ali Park in Kesare, on the Naidu Nagar Main Road, and at Shivaji Park on Shivaji Road.

Speaking after the inauguration, Sait said the tanks were constructed by the Mysuru City Corporation (MCC) using a special grant sanctioned by the Chief Minister. Each tank has a storage capacity of five lakh litres. The new tanks would help address the drinking water shortage faced by several residential areas in the constituency. In particular, the water problems in Belavatta, Usmania Block and different parts of Kesare are expected to be eased.

The MLA said the tanks

have been under trial for the past two months, and the water shortage will now be addressed. Pipelines still need to be laid at a few locations.

He expressed concern that several parts of Kesare had continued to depend on tanker-based water supply. It is unfortunate that water is still being supplied through tankers to many parts of Kesare. This problem is now being addressed through the newly constructed tanks.

Mysuru District Waqf Advisory Committee president Azizulla alias Aju Aziz, Block Congress president Syed Iqbal, vice-president Shahenshah Ahmed, former Mysuru City Corporation members Sami, Satish Chandra, Syed Hasratulla, Aftab Beg, Vinod, KPCC coordinator Shaukat Ali Khan, and leaders N. Madegowda, Iliyas Babu, Irfan Pasha, Syed Farooq and Abdul Waseem, among others, were present.

Six-day training prog launched for newly recruited CESC Junior Powermen

MYSURU

The six-day induction training programme for the fourth batch of newly recruited Junior Powermen of Chamundeshwari Electricity Supply Corporation Limited (CESC) was inaugurated here on Monday.

The training programme is being conducted at the KEB Engineers' Association Hall in Kadakola, Mysuru. On the first day, resource persons provided practical demonstrations and video-based training on key aspects of the electricity distribution system, transformer maintenance, safety measures and steps to prevent power theft, among other subjects.

M.Y. Hema, Deputy General Manager, CESC Training Branch, said Powermen served as the vital link between consumers and CESC and should always deal with customers with patience, restraint and cordiality. "Powermen must give top priority to ensuring uninterrupted and quality power supply. Whenever mistakes occur in the course of duty, corrective action should not be delayed. Above all, utmost care must be taken to avoid mistakes that could endanger human life," she said.

Hema added that providing quality and uninterrupted electricity to consumers at competitive tariffs was one of CESC's key objectives. They have to work continuously towards achieving this goal with the cooperation of the Central and State governments, various organisations and, most importantly, consumers.

During subsequent sessions, retired Superintending Engineer Vairamudi provided training on the duties of Junior Powermen and maintenance of power lines.

Retired Executive Engineer H.C. Mohan Shankar spoke on transformer maintenance, while retired Executive Engineer G.S. Vishwanath conducted a session on electrical safety.

The six-day induction programme will cover several

important areas, including electricity meters, billing, tariff fixation, Standard Operating Procedures (SOPs), earthing, detection of power theft, service rules and first aid. The trainees will also visit a 220-kV power station, transformer repair centre and meter testing laboratory as part of the programme.

The training has been organised with particular emphasis on the safety of Junior Powermen. Trainees will be educated on safety precautions to be followed while repairing electrical lines, ensuring quality power supply without interruptions, CESC's functioning, power generation, providing quality and uninterrupted electricity at competitive tariffs, and adopting new technologies and work procedures.

The programme is aimed at equipping the newly recruited Powermen with both technical knowledge and practical skills required to discharge their responsibilities safely and efficiently.

‘Javagal Express’ donates blood on his birthday

MYSURU

A warm birthday wishes to legendary Kannada cricketer Javagal Srinath, fondly known as the "Javagal Express" in international cricket! Adding a meaningful touch to his special day, Srinath visited Jeevadhaara

Blood Bank Centre and voluntarily donated blood, setting a wonderful example for the younger generation. His gesture went far beyond the cricket field—it carried a powerful message of humanity, service and social responsibility. By rolling up his sleeves and

donating blood, Srinath inspired youngsters to come forward and contribute to saving precious lives. A champion on the cricket pitch and a true hero in the community, Javagal Srinath continues to inspire generations—not just with his bowling, but with his heart.

Nelamangala toll rates rise, hitting daily commuters

CH NEWS, NELAMANGALA
The National Highway Authority of India has raised toll charges at Doddakarahalli and Karabailu plazas on the Nelamangala-Devihalli Expressway from midnight on September 1. The increase is Rs 5 to Rs 10, affecting regular commuters. Cars, jeeps, vans and light vehicles will pay Rs 60 one-way by FASTag, while same-day return costs Rs 90, up from Rs 85. LCVs pay Rs 105 one-way and Rs 155 daily. Buses and trucks will pay Rs 205 one-way and Rs 310 daily. Larger vehicles face Rs 330 one-way and Rs 495 daily.

Toddler dies during treatment after falling ill

CH NEWS, BENGALURU
A one-and-a-half-year-old girl died after falling seriously ill at Dasanapura Nagarur in Bengaluru North Taluk. The deceased child, Charvika, also known as Diya, was the daughter of Supritha and Pradeep, who are from Yalagud in Chitradurga. She had been staying with her grandparents, Rekha and Guru, after being left there during weaning. The child was admitted to a hospital three days ago after developing excessive phlegm. Despite receiving treatment in the intensive care unit, her condition worsened, and doctors could not save her.

Jalahalli road cave-in gets unusual helmet warning

CH NEWS, BENGALURU
Residents in Jalahalli have found an unusual way to warn motorists about a dangerous road cave-in. A wooden pole topped with a helmet has been placed in the middle of Jalahalli Main Road, alerting drivers to avoid the damaged section. Part of the road has collapsed near a drainage area, while traffic continues moving on the other side. Residents placed the wooden log and helmet to prevent vehicles from getting trapped in the pothole and to protect two-wheeler riders from falling into the pit. The makeshift warning highlights the road's poor condition and the need for urgent repairs.

RAMANAGARA POLICE BUST FAKE CURRENCY PRINTING RACKET

CH NEWS, RAMANAGARA
Police in Ramanagara have uncovered a fake currency printing racket allegedly operating from a house under construction in Shantilal Layout. The Aizur police arrested five people in connection with the case and seized materials believed to have been used to produce counterfeit ₹200 and ₹500 notes. According to police, the accused were running the illegal operation inside a building belonging to a person named Santosh. The premises had been kept closed to avoid attracting attention. Acting on information received about the suspected activity, police conducted a surprise raid and uncovered the alleged network. Investigators said the gang was using special paper sheets brought from outside and treating them with chemicals to make the counterfeit notes appear similar to genuine currency. The printed sheets were reportedly cut carefully, packed into bundles

Karnataka tightens ban on POP Ganesh idols

Reddy flagged Bengaluru's sewage treatment gaps, ordered plant repairs, and gave apartments 15 days to restore non-functional treatment systems

CH NEWS, BENGALURU

With the Gauri Ganesh festival approaching, the Karnataka government has stepped up action against the manufacture, storage, transport and sale of Plaster of Paris (POP) Ganesh idols. Forest, Biology and Environment Minister Ramalinga Reddy said on Monday that the state has a complete ban on making and storing POP idols. He warned that violators will face seizure of idols, fines and criminal cases. Speaking after a meeting with officials at the Environmental Pollution Control office in Bengaluru, Reddy directed authorities to identify units producing banned single-use plastic items and immediately stop their operations. Officials were asked to prepare lists of violating units and issue notices. The minister also sought BESCOM data on electricity connections and usage to help identify plastic manufacturing units. He asked the police department to support strict enforcement of the POP idol and single-use

plastic bans. Reddy also raised concerns over sewage treatment in Bengaluru. About 1,800 million litres of wastewater is reportedly discharged under the Bangalore Water Board's jurisdiction every day, while around 1,200 million litres is treated. The minister said some treatment plants are not functioning properly and directed officials to issue notices and ensure immediate repairs. Apartment complexes with non-functioning sewage treatment plants will be given 15 days to make them operational, failing which legal action will follow. The minister further or-

dered inspections of industries located along rivers and riverbanks under the National River Conservation Project. Units releasing untreated or poorly treated industrial wastewater into water bodies will face notices and action. He said industries that fail to install pollution-control measures within the given period could be shut down, with their electricity connections disconnected. Efforts under the National Clean Air Programme will also be extended to industrial and highly polluted areas. Reddy directed officials to act against violations of noise pollution rules and ensure that

AT A GLANCE
• POP Ganesh idol manufacture, storage completely banned
• Violators face seizures, fines and criminal cases
• B'lruru generates 1,800 MLD wastewater under jurisdiction
• Only around 1,200 MLD wastewater currently treated
• Apartments get 15 days to repair STPs
• Polluting industries face shut-down & power disconnection

prescribed sound limits are followed. He also called for action against unnecessary vehicle honking. With festival preparations underway, the government has made it clear that environmental rules will be enforced strictly. Officials will now be expected to monitor violations closely and take timely action to protect public health and the environment.

LOK SHAKTI LEADERS SHIFT ALLEGIANCE, JOIN AAP

CH NEWS, BENGALURU

Former Lok Shakti Party state president C.V. Sthavaramath joined the Aam Aadmi Party (AAP) on Monday, along with several party office bearers, leaders and supporters. The joining took place at a ceremony held at the Press Club in Bengaluru. The leaders said they wanted to support politics based on honesty, accountability and public welfare. AAP state president Dr. Chief Minister Chandru welcomed Sthavaramath and the others into the party. He said

ethical politics had weakened in the country and stressed the need to bring moral values back into public life. Chandru said AAP was working to promote decentralisation, accountable administration and people-focused governance. Sthavaramath said he had followed Arvind Kejriwal's political ideas and governance model for several years. He praised the Delhi administration for giving importance to education, healthcare and transparent governance. He also appreciated the changes made in Punjab under Chief Minister Bhagwant Mann,

particularly in the education sector, saying these examples showed that effective governance could improve ordinary people's lives. Sthavaramath said he and his supporters were now committed to the political movement led by Kejriwal. He said their goal was to strengthen honest, transparent and accountable politics in Karnataka. Party working president Sitaram Gundappa, general secretary Sanchit Sahwani, media coordinator Jagadish V. Sadam and several other state leaders attended the event. Among those who joined were Basavaraju Neerthadi from Davanagere, Satish B. Govindappa from Bengaluru, L. Mahadevaya from Chamarajanagar, Dharmendra K. from Vijayanagar, Yatish M.N. from Dasarahalli, and Ranganath R.S. from Madhugiri. Several other leaders and workers also joined. The induction is expected to add strength to AAP's organisation in Karnataka and expand its support base.

High Court grants divorce after marital cruelty

CH NEWS, BENGALURU

The Karnataka High Court has granted divorce to a Mysuru-based couple after finding that the husband faced repeated mental and physical harassment from his wife. The court also noted that the wife had been living separately since 2017 without a valid reason. A division bench of Justices D.K. Singh and H. Shanti Bhushan heard the husband's appeal against the Mysore Family Court, which had rejected his divorce plea in 2019. After reviewing the evidence and documents, the High Court said the lower court had failed to consider important material before dismissing the case. The bench accepted the husband's claim of cruelty, including allegations of repeated complaints, arguments and conduct that caused distress. The case records also referred to the daughters witnessing the wife with another person and being told not to disclose it to their father.

BJP leader seeks congress Clarity on Hinduism

Ravikumar defended Hinduism's legacy, questioned Congress leaders' respect for its traditions, and demanded Shivakumar and Karge clarify the party's position

CH NEWS, BENGALURU

BJP MLC N. Ravikumar on Monday demanded that Chief Minister D.K. Shivakumar and the Congress high command clearly explain the party's position on Hinduism. His remarks came after Minister Basavaraj Rayareddy reportedly described Islam as superior. Ravikumar questioned what place Hinduism holds within the Congress and asked whether the party considers Hinduism less important. He also urged Congress leaders to respond directly to Rayareddy's remarks. Ravikumar said Hinduism has a long history and has contributed important ideas to society. He questioned Rayareddy's comments about the religion and asked Congress leaders whether they considered Hinduism inferior or respected its traditions. He also referred to Congress leaders' earlier comments on Sanatan Dharma and Lord Ram, alleging that the party had repeatedly made statements that hurt Hindu sentiments. He demanded that Shivakumar and Congress president Mallikarjun Kharge clarify the party's position. The BJP leader also criticised the Youth Congress protest near the BJP office in Bengaluru on Sunday. He claimed that Congress workers had surrounded the BJP

office and alleged that similar incidents had occurred several times. Ravikumar questioned why the police had failed to prevent protesters from reaching the office. He sought details of FIRs registered against Congress workers over such incidents and demanded stronger action against those violating the law. Ravikumar said the BJP had repeatedly complained to the police and Commissioner about security concerns. He warned that if adequate protection was not provided to the BJP office, BJP workers would protest outside the Police Commissioner's office. He said political parties have the right to protest under democracy and the Constitution, but insisted that demonstrations should be conducted within legal limits and without disrupting the functioning of another party's office. He described his statement as a final warning and urged the police department to act against any future violations. The BJP leader said his party would not remain silent if similar incidents continued. His remarks have added another political dispute between the ruling Congress and opposition BJP in Karnataka, with both sides facing pressure to keep protests within democratic and legal boundaries.

Bengaluru police send 31 Bangladeshis toward deportation

CH NEWS, BENGALURU

Thirty-one Bangladeshi nationals detained by police in Bengaluru were sent to Malda in West Bengal on Monday as part of the process for their deportation to Bangladesh. The action was carried out under Operation Muktha, a continuing Bengaluru City Police drive to identify and track foreign nationals allegedly staying illegally in the city. The 31 individuals had been detained by 10 different police stations in Bengaluru. They were taken from Sir M. Visvesvaraya Terminal Bengaluru to Malda Railway Station by train. A team of 20 police personnel accompanied them during the journey as part of the security arrangements. According to police, the group is expected to reach Malda at around 5 p.m. on Tuesday, September 1. From there, the necessary procedures for their deportation to Bangladesh will be undertaken by the concerned authorities. The police said the action forms part of wider ef-

orts to address cases involving foreign nationals allegedly residing in Bengaluru without valid documents. M. Narayana, Deputy Commissioner of Police, Electronics City division, said the operation against illegal immigration would continue. He confirmed that the 31 Bangladeshi nationals secured by different police stations had been sent to West Bengal for further deportation proceedings. Police officials said teams are continuing to identify foreign nationals suspected of staying illegally in Bengaluru. After identification, authorities are taking appropriate legal steps and initiating deportation procedures wherever required. The latest movement highlights the continuing enforcement campaign in the city. Police said further action would be taken based on verification and legal procedures. Officials also stressed that such cases would be handled through the established process, with coordination among the concerned authorities.

Bengaluru bar questions handling of court-imposed fines

CH NEWS, BENGALURU

The Advocates' Association, Bengaluru, has issued show-cause notices to its Vice-President Shivashankar and Joint Secretary Prasanna Kempegowda over alleged irregularities in handling fines collected by magistrate courts. The association said its executive committee decided to issue the notices after concerns emerged over the col-

lection and use of court-imposed fines. The alleged irregularities involved unauthorised receipts used for collecting fines, with the amounts reportedly running into lakhs of rupees. According to the association, the receipts were allegedly used by Shivashankar and Prasanna Kempegowda through an association employee, Chandrashekar. The association has questioned the manner in which the money

was collected and handled. General Secretary H.V. Praveen Gowda issued the notices, seeking explanations from both office-bearers regarding the alleged misuse and irregularities. The association said the matter came to light during proceedings before its executive committee. The notices now require the two office-bearers to respond to the allegations. Further action is expected after their explanations are considered by the association's executive committee.

UNITY ACROSS REGIONS

Rashtriya Ekta Parv celebrates India's cultural unity

CH NEWS, BENGALURU

The two-day Zonal Level Rashtriya Ekta Parv 2026 began at PM SHRI Kendriya Vidyalaya MEG and Centre in Bengaluru on Monday, bringing together students and cultural teams from Chennai, Ernakulam, Hyderabad, Bhubaneswar and Bengaluru. The programme highlighted India's diversity and the spirit of Ek Bharat Shreshtha Bharat. The inaugural ceremony was attended by Shaik Tajuddin, Deputy Commissioner, Kendriya Vidyalaya Sangath-

an Bengaluru Region, as the chief guest. Assistant Commissioners R.M. Sokala and Ganesh S. Indrale attended as guests of honour, while Bal Bhavan Superintendent Pushpavathi was the special guest. Several principals from Bengaluru's Kendriya Vidyalayas also attended. The programme began with an invocation and traditional lamp lighting. Host Principal Lokesh Bihari Sharma welcomed the guests and highlighted the importance of unity among India's diverse communities. He said the country's strength lies in respect-

ing different cultures while remaining united as one nation. Students presented classical and folk dances, followed by a colourful dance drama by students of KV Malleswaram.

The performances reflected different cultural traditions and received appreciation from the audience. Addressing the gathering, Tajuddin said Ek Bharat Shreshtha Bharat plays an important role

in strengthening national integration. He praised the young participants for helping preserve and present India's rich cultural heritage. The inaugural programme concluded with a vote of thanks, marking the beginning of the two-day celebration. The event brought together young performers from different regions and provided them an opportunity to share their traditions. Organisers said the programme would continue to promote cultural understanding, national unity and pride among students through art and participation.

Kumaraswamy questions Kharge over x statements

Kumaraswamy challenged Kharge to face cameras and address recruitment corruption claims directly instead of hiding behind social media posts.

TUMAKURU

Union Minister H.D. Kumaraswamy continued his criticism of Karnataka Home Minister Priyank Kharge, questioning why he was avoiding direct answers to specific questions and responding mainly through the social media platform X.

Kumaraswamy said Kharge should address the issues in front of the cameras instead of making statements on X. Taking a sarcastic dig at the Home Minister, he said Kharge appeared to have made a big issue out of something without answering the questions raised. Kumaraswamy also said he was not someone who would run away from a confrontation and challenged Kharge to engage in a direct discussion.

Kumaraswamy made serious allegations regarding the ongoing controversy surrounding alleged irregularities in the Karnataka Public Ser-

vice Commission (KPSC) recruitment process. He questioned why an official accused of manipulating OMR sheets was allegedly brought from Delhi and kept at a resort in Devanahalli before being produced before CID officials. He also sought clarification about alleged appointments given to 24 people and asked whether any of them were relatives of those involved.

The Union Minister further claimed that allegations re-

garding the use of carbon paper to manipulate OMR sheets had been widely discussed and said such allegations had also been supported by the investigation and forensic laboratory findings. If the evidence established wrongdoing, he questioned why the Home Minister was attempting to defend the matter.

Kumaraswamy said he was raising the issue in the interest of unemployed youth and not out of personal animosity towards Kharge. He challenged the Home Minister to meet him anywhere for a discussion and said he would not back down. He added that he would speak in detail about the issue before the media in Delhi and would continue to raise concerns until the interests of unemployed youth were protected.

Asked whether he would return to state politics, Kumaraswamy said he would re-enter Karnataka politics for the 2028 Assembly elections. In an ap-

Kumaraswamy demands Kharge's resignation

Union Minister H.D. Kumaraswamy accused Karnataka Home Minister Priyank Kharge of shielding officials involved in recruitment scams within the Karnataka Public Service Commission (KPSC). Highlighting forensic evidence of OMR sheet manipulation in Assistant Executive Engineer posts, Kumaraswamy demanded accountability and a high-level probe to protect unemployed youth.

parent reference to Chief Minister D.K. Shivakumar, he remarked that people would ultimately decide whose political position remained.

Undertrial hospitalisation row: Jail superintendent transferred

Mandya District Judge C. Chandrashekar discovered a prisoner with a young woman during a hospital inspection, sparking widespread media coverage

MANDYA

Mandya District Prison Superintendent Shanthamma has been transferred to Bellary Central Prison following allegations that an undertrial prisoner was provided special treatment at a hospital. Director General of Prisons Alok Kumar issued the transfer order, which has come into effect immediately.

The undertrial prisoner, Mohammed Hussain, who was lodged in Mandya District Prison in connection with a land scam case, had been admitted to the Mandya Institute of Medical Sciences (MIMS) Hospital. During a surprise inspection, Mandya District Judge C. Chandrashekar reportedly found the prisoner with a young woman at the hospital. The incident was subsequently reported widely in the media.

The judge's inspection also reportedly revealed that the prisoner had been admitted to the hospital without prior information being given to the court. Taking serious note of the matter, the judge directed the concerned authorities to submit a report explaining the circumstances under which the prisoner was admitted and the arrangements made for his treatment.

Following the incident and the media reports, DGP Alok

Kumar visited the Mandya District Prison personally and inspected its administration and records. The department subsequently initiated an inquiry into the matter to determine whether there had been violations of prison procedures and lapses in supervision.

According to the official transfer order, prima facie dereliction of duty was found on the part of Superintendent Shanthamma in connection with the incident reported in various media outlets. Consequently, she has been transferred to Bellary Central Prison with immediate effect and assigned special duty there until further orders.

The prison department has also ordered a comprehensive inquiry into the allegations concerning the administration of Mandya District Prison. The department stated that further action would be considered after the detailed inquiry report is received.

The concerned prison superintendents have been di-

POINTS

- Judge inspected unauthorized hospital inmate admission.
- Court sought explanation for treatment arrangements.
- DGP Alok Kumar personally inspected prison.
- Department initiated formal supervisory inquiry.
- Superintendent Shanthamma found prima facie negligent.
- Transferred immediately to Bellary Central Prison.
- Comprehensive probe into prison administration ordered.
- Authorities directed to submit compliance reports.

rected to submit compliance reports to the headquarters confirming Shanthamma's release from her present duties and her reporting for duty at Bellary Central Prison.

Quick Read

Tiger finally trapped after repeated village sightings

Mysuru

A tiger that had been frequently spotted near Hosaholalu village in H.D. Kote taluk was finally captured in a forest department cage on Monday, bringing relief to residents.

The animal had been moving around the village outskirts for several days, causing fear among farmers and villagers who were hesitant to visit their fields. Forest officials monitored the tiger's movements and installed a cage at a suitable location three days ago. The tiger entered the cage early Monday morning. Villager Rangaraju said residents had requested officials to capture the animal. Dammanakatte RFO Hanumantharaju said the approximately three-year-old male tiger would be released into the Kakanakote forest area near the Kabini backwaters.

Grandmother, two grandchildren killed by express

Doddaballapur

A 52-year-old woman and her two grandchildren were killed after being hit by an express train near Doddaballapur railway station in Bengaluru Rural district on Monday morning. The deceased were identified as Irfana (52), Rukia (13) and Raqia (8). According to police, the three were walking towards Doddaballapur railway station from Muthur when the accident occurred. They were reportedly walking along the railway tracks and failed to notice the approaching train at a curve. The speeding express train struck them, killing all three at the spot. The children had reportedly come from Hindupur to stay with their grandmother during the holidays and were returning home with her. Yeshwanthpur Railway Police visited the spot and began an investigation.

Muniyappa warns detractors, says they'll regret

KOLAR

Minister K.H. Muniyappa has hit back at his detractors, saying those who are currently speaking against him will eventually regret their remarks. His statement comes amid reported differences within the Congress party in Kolar district, where tensions between sections of local leaders have attracted attention. Muniyappa said people were free to make statements against him, but indicated that their criticism would not affect his political work. "Let them speak, they will regret it," he said, asserting confidence in his position and political experience.

The minister also hinted that efforts were underway to resolve the differences within the Congress unit in Kolar district. He suggested that discussions were being held to address misunderstandings among party leaders and workers and bring greater coordination within the organisation.

The differences within the district Congress unit have emerged as a matter of concern for the party, particularly as leaders and their supporters

Congress faces factional heat in Kolar

Internal friction within the Kolar district Congress unit has flared up, prompting senior leader K.H. Muniyappa to issue a stern warning against critics amid ongoing disagreements over local political issues. While party high-command efforts continue to bridge gaps and secure grassroots coordination, Muniyappa's sharp remarks have magnified existing factional fault lines within state political circles.

have expressed divergent views on local political issues. Muniyappa's remarks indicate that the party leadership is keen to prevent the disagreements from growing further and affecting its organisational strength.

Muniyappa has been a prominent Congress leader from Kolar and has held several important responsibilities in the state government. His latest comments are being viewed against

the backdrop of continuing political discussions among Congress leaders in the district.

Party leaders are expected to hold further discussions to settle the differences and improve coordination among various groups. The focus is likely to remain on strengthening the party organisation and ensuring that internal disagreements do not affect its functioning at the grassroots level.

Meanwhile, Muniyappa's strong response has added a political edge to the ongoing developments in Kolar. While he did not elaborate on the individuals he was referring to, his warning that critics would regret their comments has drawn attention within political circles. The minister's remarks also underline the continuing challenges faced by the Congress in maintaining unity among its district-level leaders. With efforts reportedly underway to resolve the differences, party workers are hoping that the issues will be settled through discussions and that the organisation will remain united ahead of future political challenges.

Bharat Ko Jano symbolises national unity: Raju

RAMANAGARA

The Bharat Ko Jano programme, organised by the Bharat Vikas Parishad, was held at Patel Public English School near Kempegowda Circle on Magadi Road in Ramanagara. The programme was inaugurated by Patel C. Raju, founder-secretary of Patel English School. Speaking on the occasion, he said the Bharat Ko Jano initiative was being organised across the country with the message that every citizen should have a better understanding of India,

its heritage and its values.

He said quiz and question-paper examinations were being conducted for schoolchildren as part of the programme. The questions cover topics related to India's land and water resources, patriotism, devotion, respect for parents and the lives and contributions of great personalities who shaped the nation. Such activities help children develop knowledge, good values and a sense of responsibility towards society and the country, he said.

Raju explained that stu-

dents who qualify at the initial level would get an opportunity to participate in quiz competitions at the district, state and national levels. He urged students to make the best use of the opportunity and actively participate in the programme.

Rajanna, who presided over the programme, said India's reputation and respect had been growing both within the country and abroad. He said the Bharat Vikas Parishad was working to strengthen the feeling that all Indians belong to one nation.

DASARA INCLUSIVITY URGED

SRIRANGAPATNA DASARA TO GET PEOPLE-CENTRIC CELEBRATION

MANDYA

Srirangapatna Dasara should be organised in a new, meaningful and people-centric manner this year, with greater opportunities for local artists, rural sports and young talent, said Ramesh Bandisiddhegouda, MLA of Srirangapatna and chairman of Chamundeshwari Electricity Supply Corporation.

Speaking at a preparatory meeting held at the Deputy Commissioner's office, he said the Dasara celebrations should not remain limited to traditional festivities but should encourage participation from people across sec-

tions. Diverse and innovative programmes should be organised to provide the public with a new experience, he said.

The MLA called for greater priority to local artists in cultural programmes. Talented artists from the taluk and district should be identified and provided platforms to showcase their skills. He also stressed the need to effectively organise Sports Dasara by promoting traditional rural games and encouraging greater participation from youth and sportspersons.

Bandisiddhegouda also called for a three-day Yuva Sambhrama before the Dasara

celebrations, on the lines of the event held in Mysuru. He said the programme should provide a platform for young people to showcase their artistic abilities and talents.

Deputy Commissioner Dr Kumar said 12 committees had been formed to ensure the successful conduct of Sriran-

gapatna Dasara. Committees have been assigned responsibilities relating to the stage, cultural programmes, procession, exhibition, cleanliness, food festival, city decoration, Sports and Yoga Dasara, Yuva Sambhrama and Children's Dasara. Officials were instructed to coordinate with

concerned departments and complete preparations without lapses.

Zilla Panchayat CEO K.R. Nandini said programmes highlighting the talents, skills and achievements of women should be included. She also called for greater focus on galleries and stalls showcas-

Students from all colleges in the taluk should be given opportunities to showcase their talents through cultural and other programmes. A film festival featuring quality and message-oriented movies should also be organised for children. The education department should make arrangements for schoolchildren to attend the screenings.

- Ramesh Bandisiddhegouda, MLA of Srirangapatna

ing local art, handicrafts and products made by women's self-help groups. Superintendent of Police Dr V.J. Shobhani and senior district officials attended the meeting.

‘PUTTUR CHALO’ RALLY, HEAVY POLICE DEPLOYMENT

Police intensified surveillance across key roads, junctions, crowded zones, and sensitive areas to maintain public safety and law and order

PUTTUR

Hindu organisations and the BJP have organised a ‘Puttur Chalo’ rally in Puttur on Monday to protest against a recent clash reported in Darbe. Police have granted conditional permission for the rally and made elaborate security arrangements across the city. As a precautionary measure, a police route march was conducted in Puttur. The exercise was aimed at boosting public confidence and briefing personnel deployed for security duties. Police have increased surveillance at major roads, junctions, crowded areas and other sensitive locations.

A total of 168 police officers and personnel have been assigned specifically for the rally. The deployment includes one Additional Superintendent of Police, one Deputy Superintendent of Police, three police inspectors, 10 sub-inspectors, 14 assistant sub-inspectors and 139 other police personnel.

In addition to the local police force, five Karnataka State Reserve Police (KSRP) platoons, two State Armed Police (SAF) teams and seven District Armed Reserve (DAR) platoons have also been deployed. Personnel will be stationed at the rally venue and along important connecting routes to prevent any untoward incidents.

Police said strict security measures have been put in place to ensure that the programme remains peaceful and that public movement is not affected. Participants and or-

ganisers have been instructed to follow the conditions attached to the permission granted for the rally.

Authorities have warned against unlawful activities, provocative slogans, clashes or any attempts to disturb public order during the programme. Police patrols have already been intensified in the city, while vehicle checks are being conducted at important locations.

The police are also monitoring social media platforms to prevent the circulation of provocative content or false

POINTS
• Police route march conducted in Puttur.
• Surveillance increased across sensitive city locations.
• Total 168 police personnel specifically assigned.
• Reserves include KSRP, SAF, and DAR.
• Strict security measures ensure peaceful program.
• Authorities warned against unlawful provocative activities.
• Vehicle checks and intensified patrols implemented.
• Participants instructed to follow permit conditions.

information that could create tension during the rally.

With more than 200 personnel, including reserve forces, involved in the overall security arrangements, police officials said all necessary preventive measures had been taken to maintain law and order and ensure that the ‘Puttur Chalo’ programme concludes peacefully.

Drought anger awaits CM Shivakumar in Gadag

MALINGARAYA PUJAR, CH NEWS

Chief Minister D.K. Shivakumar is set to face political challenges and public anger during his first visit to Gadag district after assuming office as Chief Minister. While people are hoping for special development measures, farmers and opposition parties are preparing to protest against what they describe as the government’s inadequate response to the drought situation.

The Chief Minister is scheduled to visit Gadag to review the drought situation. However, there is speculation in political circles that his visit also has a personal purpose. Shivakumar is expected to visit the historic Muktimandir Mutt in Lakshmeshwar taluk to fulfil a vow. Some sections have questioned whether the religious visit is being presented as an official drought inspection.

Gadag district is reportedly facing a severe rainfall shortage this year. According to the information cited by local groups, the district has recorded an estimated 80 per cent deficit in rainfall, leaving farmers under considerable

stress. Despite the situation, only Gajendragad taluk has been declared drought-hit. Farmers and residents are demanding that the remaining taluks should also be included in the drought-affected list based on the actual ground situation.

Farmers’ organisations and JD(S) leaders are preparing protests during the Chief Minister’s visit. They have announced plans to display black flags and black cloth as a mark of protest against the government’s handling of the drought issue. The proposed demonstration is expected to put additional political pressure on the Chief Minister during his visit.

The district’s political circles are witnessing mixed sentiments. Congress workers and supporters have expressed disappointment over the absence of representation from Gadag in the Cabinet. At the same time, the district has welcomed the elevation

CM DK Shivakumar is coming to Gadag district to fulfill his vow, but he has only declared drought on the pretext of observing drought. Although the farming community in the district is in distress due to lack of rain, only one taluk in the district has declared drought, which is an injustice to the farmers. We will show black clothes to the CM.

— Venkanagouda R Govindagouda, State Spokesperson

of one of its leaders to the prestigious post of Speaker of the Legislative Assembly.

People are also expecting Shivakumar to announce a special development package and additional grants for Gadag. Residents argue that the district, which has faced developmental challenges for years, requires substantial investment in infrastructure, agriculture and public services.

The Chief Minister’s visit will therefore be closely watched, with protests on one side and expectations of development announcements on the other. How Shivakumar responds to the drought concerns and demands for special grants will be significant for the district’s political climate.

Quick Read

Brother kills elder brother over mobile phone

Mangaluru

A 40-year-old man was allegedly stabbed to death by his younger brother following a dispute over a mobile phone near Kottara Cross in Mangaluru. The deceased, Adivappa, and his 36-year-old brother Raju were from Bailhongal in Belagavi district and lived with their mother in a rented house. Police said the brothers argued over a mobile phone around 10.30 p.m., and the dispute escalated. Raju allegedly stabbed Adivappa with a knife. Their mother later found him seriously injured and rushed him to Wrenlock Hospital, where doctors declared him dead. Urwa police arrested Raju and began further investigation.

BPL cardholders asked to complete e-KYC

Chitradurga

Antyodaya and Priority Household (BPL) ration cardholders in Chitradurga district have been asked to complete e-KYC for eligible family members whose previous e-KYC was completed five years ago. The free e-KYC facility will be available at fair price shops from September 1 to 15. Cardholders must carry their latest caste certificate, active mobile phone and ration card when visiting the shop for biometric verification. Officials warned that beneficiaries who fail to complete e-KYC may lose access to government benefits. Food, Civil Supplies and Consumer Affairs Department Joint Director Shidram Marihal urged eligible ration cardholders to make use of the facility within the specified period.

Puttur MLA alleges corruption by KRIDL engineers

Rai has accused KRIDL Mangaluru Executive Engineer Vijay and Junior Engineer Prajwal of serious misconduct.

MANGALURU

Puttur MLA Ashok Kumar Rai has written to Chief Minister D.K. Shivakumar alleging corruption, irregularities and extortion by engineers of the Karnataka Rural Infrastructure Development Limited (KRIDL) in the execution of development works in the constituency.

Rai has levelled serious allegations against KRIDL Mangaluru Executive Engineer Vijay and Junior Engi-

neer Prajwal. He claimed that irregularities had occurred in the implementation and supervision of several development projects and sought the state government’s intervention into the matter.

According to the MLA, contractors and agencies involved in development works have faced difficulties due to the alleged conduct of the officials. He has raised concerns over the manner in which works are being executed and monitored and has

sought an inquiry into the alleged financial irregularities.

The MLA’s complaint comes amid concerns over transparency and accountability in the implementation of government-funded infrastructure projects. KRIDL undertakes several rural infrastructure and development works, making effective monitoring important to ensure that public funds are utilised properly.

Rai has maintained that the allegations should be investigated independently and that

responsibility should be fixed if any wrongdoing is established. He also called for measures to ensure that contractors and other stakeholders can execute development works without facing alleged harassment or pressure from officials.

The letter to the Chief Minister is expected to draw the government’s attention to the functioning of KRIDL officials in the region. Further action will depend on the state government’s response and any inquiry initiated into the allegations.

The allegations made by the MLA are yet to be established, and the concerned KRIDL officials are expected to have an opportunity to respond to the charges.

Chief Minister Shivakumar to take the allegations seriously and order a detailed investigation into the functioning of the concerned KRIDL officials, sought appropriate action if the allegations are established through the inquiry.

- Ashok Kumar Rai, Puttur MLA

Major Dhyan Chand remains a guiding light

HULKOTI

Major Dhyan Chand, regarded as one of India’s greatest field hockey players and an iconic figure in world sports history, continues to inspire generations of sportspersons through his exceptional skills, discipline and dedication, Sports Department Director Mahantesh said.

He was speaking at a National Sports Day programme organised by the Sports Department at Sri K.H. Patil Government First Grade College in Hulkoti under the IQAC, to mark the birth anniversary of Major Dhyan Chand. Mahantesh said Dhyan Chand was renowned for his extraordinary control of the ball and remarkable style of play, earning him the title of the ‘Wizard of Hockey’.

He recalled that Dhyan Chand had served in the Indian Army and practised hockey under moonlight after completing his military duties. This practice was reportedly one of the reasons he came to be associated with the name ‘Dhyan Chand’. During India’s golden era in hockey, he played a key role in the country’s dominance at the international level and helped India win three consecutive Olympic gold medals.

Mahantesh said August 29, Dhyan Chand’s birth anniversary, is observed as National Sports Day across the country to honour his contribution to Indian sports. Physical education teacher Shobha Adike delivered the introductory address and explained the importance of National Sports Day and the role of sports in students’ lives.

Dr Tanuja Patil felicitated for new leadership role

HUBBALLI

Professor Dr Tanuja Patil (Jawali), who was elected president of the Inner Wheel Club Hubballi North, was felicitated by various organisations at a programme held at the residence of Prabhu Sattigeri in Hubballi.

The Horkeri Masthar Education Foundation, Rani Channamma Environment Service Committee and Basava Environment Conservation Committee jointly organised the programme. Dr Tanuja Patil was honoured with a shawl and garland in recognition of her new responsibility. Members and well-wishers congratulated her and wished her

success.

The organisers expressed confidence that the club would undertake more socially oriented activities during her tenure, particularly in education, social service, women’s empowerment, healthcare and environmental protection.

Sohan Suresh Horkeri, personality development trainer Rajashekar Patil, writer Kavita Hegde Abhayam, Anupama G.R., Ravi M.B., Sumangala Somanakatti and Kavya Sattigeri were among those present.

Dr Suresh D. Horkeri, K.S. Inamati, B.L. Lingshettar and several others also attended the programme.

RAGHAVENDRA SWAMY ARADHANA...

Devotees gathered in large numbers in Koppal for the 355th Aradhana Mahotsava of RagHAVendra Swamy, featuring a grand chariot festival, devotional music by Puttur Narasimha Nayak, and mass prasada distribution.

STREET FOOD

- SUGANTHI

There is a distinct, undeniable rhythm to a city’s street food culture. Long before high-end restaurants began curating farm-to-table menus or experimenting with molecular gastronomy, sidewalk vendors were quietly perfecting the art of feeding the masses. From the sizzling taco stands of Mexico City and the aromatic night markets of Bangkok to the vibrant chaat stalls of Mumbai, street food is far more than a convenient bite on the go. It is the living, breathing heart of a community’s culture, history, and daily life.

To truly understand a city, one must eat from its streets. While fine dining often reflects an idealized, curated version of a region’s cuisine, street food offers an authentic, unvarnished portrait of local taste. The recipes sold from tiny carts and humble pushwagons are rarely invented in modern test kitchens; they are time-honored traditions passed down through generations. Each dish tells a story of migration, trade, resourcefulness, and local agriculture. The fusion of spices in a single bowl of Vietnamese pho or the complex layering of a Nigerian suya skewered on the roadside carries centuries of heritage in every single

bite.

Beyond its historical roots, street food acts as one of society’s greatest democratic spaces. On any given afternoon, you will find corporate executives in tailored suits standing side by side with construction workers, students, and artists, all waiting patiently for the same hot off the grill skewers or freshly fried dumplings. At the street cart, class distinctions dissolve. Quality is judged not by white tablecloths, sommelier lists, or Michelin stars, but by the richness of the broth, the crunch of the crust, and the speed of the cook’s hands. It is an egalitarian dining experience where everyone shares the exact same counter, sidewalk, or bench.

Moreover, street food serves as a vital economic engine for local communities. It provides low-barrier entrepreneurial opportunities for working-class families, migrants, and culinary artisans who might otherwise lack the capital to open traditional storefronts. These vendors are micro-entrepreneurs who power local economies, source ingredients from neighborhood markets, and enliven public spaces. A bustling street food alley transforms ordinary concrete pavement into a vibrant social hub, bringing foot traffic, safety, and human connection to urban neighborhoods.

Of course, modern urban development and rising regulatory hurdles frequently threaten these traditional food ecosystems. Gentrification, strict zoning laws, and misplaced sanitation fears often push long-time vendors off the pavement. While food safety regulations are necessary to protect public health, city planning must find a balanced middle ground that preserves street vendors rather than erasing them. Losing street food means losing a city’s unique sensory identity the sizzle of hot oil, the cloud of fragrant smoke, and the welcoming warmth of a neighborhood cook.

Street food is not merely quick fuel for busy days; it is a celebration of human creativity, community resilience, and shared culture. The next time you walk past a bustling roadside stall, skip the chain restaurant, follow the aroma, and take a seat on a plastic stool. You aren’t just getting a meal you are partaking in the authentic soul of the city.

THE HIDDEN COST OF RAPID WARDROBE REFRESHES

- BENEDICT INBARAJ

In today’s hyper-connected world, trends no longer take seasons to evolve; they change with the pull of a scroll. Fast fashion has mastered the art of democratizing style, transforming high-fashion runway looks into affordable, everyday wardrobe additions within a matter of days. Consumers can effortlessly update their closets for the price of a morning coffee, indulging in the thrill of novelty without breaking the bank. Yet, beneath this illusion of accessible glamour lies a relentless global supply chain driven by overproduction, excessive waste, and significant environmental and human costs.

The underlying model of fast fashion thrives on hyper-consumption. To keep prices ultra-low and output extraordinarily high, speed and volume are prioritized above all else. Garments are increasingly made from low-grade synthetic fibers like polyester and nylon, which require fossil fuels to produce and take hundreds of years to decompose. As these cheap garments lose their appeal after only a few wears, millions of tons of discarded clothing end up directly in landfills or incinerators each year. Beyond solid waste, the manufacturing process pollutes local waterways through toxic chemical dyes and sheds vast quantities of microplastics into the world’s oceans, quietly damaging marine ecosystems.

The human dimension of this system is equally concerning. To maintain wafer-thin profit margins, manufacturing is frequently outsourced to regions where labor regulations are lax or poorly enforced. Garment workers the majority of whom are women often endure long hours, unsafe working environments, and wages that fall far short of a living standard. The pressure to meet aggressive production deadlines routinely squeezes the most vulnerable hands in the chain, creating a stark contrast between consumer convenience in one part of the world and systemic hardship in another.

BALANCING SCREEN TIME FOR HEALTHY CHILD DEVELOPMENT

Smartphones have transformed from modern conveniences into central fixtures of childhood and adolescence. From early interactive gaming to social media platforms, children today are growing up saturated in digital media. While these devices offer unmatched educational resources and instant connectivity, their pervasive presence raises urgent questions regarding mental health, cognitive growth, and social development. As screen time continues to surge among young populations, parents, educators, and policymakers must confront the profound impacts of unmonitored smartphone use on the next generation.

At the heart of the debate is the impact of smartphone engagement on physical and mental well-being. Prolonged screen use is consistently linked to sedentary lifestyles, contributing to rising rates of childhood obesity and poor posture habits. More critically, the blue light emitted by

screens disrupts sleep architecture by suppressing melatonin production, leaving children chronically sleep-deprived. This lack of rest directly impairs emotional regulation, attention spans, and academic performance. Furthermore, the constant stream of curated content on social media exposes impressionable minds to unrealistic standards, cyberbullying, and relentless peer comparison, contributing to heightened anxiety and depression among youth.

Beyond psychological health, smartphone overuse fundamentally alters how children learn to interact with the physical world. Early childhood is a critical window for developing fine motor skills, spatial awareness, and face-to-face social intelligence. When interactive real-world play, reading, and outdoor exploration are replaced by passive swiping, foundational developmental milestones can be delayed. In classrooms, teachers increasingly

report fighting for students’ fractured attention. The instant gratification inherent to digital algorithms trains young brains to seek short-term dopamine hits, making the sustained focus required for complex problem-solving and deep reading far more difficult to cultivate.

However, demonizing technology outright is neither practical nor productive. Smartphones provide vital communication channels for safety, foster digital literacy essential for the modern workforce, and allow children to connect with diverse communities and learning tools.

The goal should not be complete isolation from the digital world, but rather the establishment of healthy digital boundaries and active parental guidance.

To foster a balanced relationship with technology, families and institutions must implement proactive solutions. Parents should establish clear household guidelines, such as

designating screen-free zones in bedrooms and during meals, while encouraging alternative activities like sports, arts, and face-to-face

tools that can either enrich or hinder a child’s development depending on how they are integrated into daily life. Ensuring that technology serves

socializing. Tech companies must also be held accountable to higher safety standards, enforcing strict age verification and designing algorithms that protect young users from addictive mechanics. Additionally, schools should implement digital literacy curricula that teach children how to navigate the online world critically and responsibly. Smartphones are powerful

our children rather than controlling them requires vigilant oversight, clear boundaries, and a shared commitment to prioritizing real-world experiences. By guiding youth toward intentional and balanced smartphone habits today, we protect their health, well-being, and capacity for meaningful connection tomorrow.

- MATTHEW C.R.

REVITALIZING GOVERNMENT SCHOOLS: THE FOUNDATION OF EQUAL OPPORTUNITY

Education is the single most powerful tool for social mobility, yet for millions of children, access to quality learning remains an unreachable privilege. At the heart of this divide sits the public education system. While private institutions often dominate discussions around academic excellence, government schools remain the backbone of society, educating the majority of the population particularly those from underprivileged backgrounds.

Reimagining and revitalizing these institutions is not merely a policy goal; it is a moral and economic imperative. For decades, public schools have struggled under the weight of systemic neglect. Inadequate infrastructure, shortage of trained teachers, and outdated learning materials have compromised the quality of education provided.

Outdated sanitation facilities, lack of digital access, and missing basic learning amenities have routinely led to high drop-out rates, particularly among young girls. When a school lacks electricity, clean water, or basic safety, learning naturally takes a back seat to survival.

However, writing off government schools overlooks their immense, irreplaceable potential. Public schools are democracy in action.

They bring together children from diverse socio-economic, cultural, and religious backgrounds into a shared space, fostering empathy, social cohesion, and mutual understanding. Unlike private academies driven by market logic, public schools exist solely to serve the public good. Every standard achieved within a government school lifts an entire family out of generational poverty.

In recent years, isolated success stories have proven that transformation is entirely achievable with dedicated political will and systemic reform.

Model public school initiatives across various regions have demonstrated that when governments invest heavily in modernizing classrooms, integrating digital learning, and

prioritizing comprehensive teacher training, students thrive. Upgrading physical infrastructure is only the first step; the true shift occurs when teaching methods are

modernized to encourage critical thinking rather than rote memorization.

Furthermore, community engagement plays a vital role in sustaining this transformation. When local communities, parents, and civic organizations take an active interest in school governance, accountability increases.

A public school should function as the vibrant nucleus of its community, offering nutritious meal programs, basic health checkups, and safe extracurricular spaces alongside academic instruction. Achieving equal opportunity demands that a child’s zip code or family income never dictates their future potential. Strengthening government schools is an investment in human capital that yields compounding returns in civic stability, innovation, and national prosperity.

To build a fair society, public education must be treated not as a secondary welfare program, but as the premier national priority.

- ALLAN B.

STRENGTHENING HOSPITALS: THE SACRED PILLARS OF PUBLIC HEALTHCARE

Hospitals stand as the ultimate sanctuaries of human vulnerability and resilience. Within their walls, life begins, healing occurs, and solace is offered in moments of deepest crisis. They serve not merely as physical structures filled with advanced medical equipment, but as the foundational pillars of public health, social stability, and economic vitality. Yet, as modern medicine advances at a breathtaking pace, hospitals worldwide face unprecedented strain, revealing a critical need for structural reform and sustained public investment.

For decades, healthcare systems have grappled with mounting pressures. Rising population density, growing rates of chronic illness, and recurring global health emergencies have repeatedly

pushed hospitals to their operational limits. Emergency rooms are often overburdened, medical staff face widespread burnout, and rural communities frequently lack immediate access to specialized care. These challenges highlight a fundamental reality: when hospitals struggle, the entire safety net of society begins to fray. Healthcare cannot function effectively if its frontline institutions are perpetually under-resourced.

Reimagining the modern hospital requires a dual commitment to technical innovation and compassionate care. On the technological front, integrating digital health records, modern diagnostic imaging, and smart triage systems can dramatically streamline hospital workflows, reducing waiting times and eliminating medical errors. Infrastructure modern-

izations such as expanding intensive care capacity, ensuring reliable supply chains, and modernizing sanitation systems are indispensable steps to ensuring patient safety and operational efficiency.

However, advanced equipment alone does not heal; human beings do. The true core of any hospital is its dedicated workforce of doctors, nurses, paramedics, and support staff. Sustained investment in healthcare infrastructure must prioritize the well-being and professional growth of medical workers. Expanding training programs, improving working conditions, and establishing competitive compensation packages are essential steps toward building a resilient healthcare workforce capable of meeting growing medical demands.

HARMONIZING MIND AND BODY: THE MODERN POWER OF YOGA

In an era defined by constant notifications, relentless productivity, and rising stress levels, the quest for inner peace has shifted from a wellness luxury to an urgent necessity. Amidst countless modern lifestyle trends, an ancient practice continues to offer the most enduring solution. Yoga, a discipline refined over thousands of years, transcends simple physical exercise to serve as a comprehensive blueprint for mental clarity, emotional balance, and physical vitality. As the pace of global life accelerates, rediscovering this holistic discipline is vital to restoring individual and collective well-being. At its core, yoga is far more than a sequence of physical postures performed

on a mat. Rooted in the Sanskrit word yuj, meaning "to unite," the practice establishes a conscious bridge between the breath, physical body, and conscious mind. In modern fitness culture, physical health is frequently measured through high-intensity exertion or muscular strength alone. While these attributes have value, yoga introduces a essential counterweight focused on flexibility, postural alignment, and nervous system regulation. Through controlled movements (asanas) and deliberate breathwork (pranayama), practitioners learn to move through discomfort with grace a skill that translates directly into everyday stress management.

- SHAZHA KHAN

LETTERS TO EDITOR

Regulating Children Screen Time

Smartphones are increasingly dominating childhood, replacing active play with passive screen consumption. This shift contributes to sleep deprivation, shortened attention spans, and heightened anxiety among impressionable youth. While technology offers educational value, unrestricted usage impairs emotional regulation and face-to-face social development. Parents must establish clear boundaries, such as designating screen-free zones at home, while schools should promote digital literacy. Regulating device habits early is essential to ensure technology enhances childhood rather than dictating it.

- Rohit Denzil T.

Protecting Young Mental Health

The rising prevalence of smartphones among children presents severe mental health risks that require urgent community action. Exposure to idealized social media content fosters peer pressure, low self-esteem, and persistent sleep disruption. Children need structured time away from digital screens to engage in real-world creative exploration, physical activity, and interpersonal relationships. Tech companies must strengthen child safety controls, but lasting change begins at home through balanced guidelines and active parental engagement.

- Teena Rachel

Rethinking Classroom Mobile Devices

Smartphones in schools have turned into constant distractions that disrupt the learning environment. Constant notifications and instant access to entertainment fragment students’ focus, making deep reading and complex problem-solving difficult. While digital tools can enrich education, unmonitored device access in classrooms undermines academic performance and social interaction during breaks. School boards should implement strict phone-free policies during school hours to restore focused, engaging learning environments for all students.

NAVIGATING THE DIGITAL REALM: BALANCING CONNECTION AND DISTRACTION

Social media has fundamentally reshaped the landscape of modern human interaction, transforming from simple platforms for personal communication into global infrastructures that drive culture, politics, and commerce. Today, billions of people navigate a continuous stream of updates, short-form videos, and algorithmic feeds that define daily life. While these platforms offer unprecedented connectivity, bridge geographical divides, and amplify marginalized voices, they also present complex challenges to individual psychological health and broader societal cohesion. Addressing this duality requires a deliberate reassessment of how society engages with digital spaces.

The undeniable advantage of social media lies in its ability to democratize information and foster community. It enables instant global communication, allows micro-businesses to reach international markets, and empowers grassroots movements to mobilize support with unprecedented speed. During crises, these networks serve as vital hubs for real-time news and community relief efforts. For isolated individuals, online communities offer a sense of belonging and shared identity that might be inaccessible in their physical surroundings.

However, the rapid proliferation of hyper-curated content has created significant psychological friction. The architecture of modern platforms relies heavily on engagement algorithms designed to capture and hold human attention. This dynamic often fuels compulsive scrolling, distorts perceptions of reality, and accelerates the spread of sensationalized information or outrage. Studies consistently link excessive, uncritical social media use with increased rates of anxiety, depression, and feelings of social isolation, particularly among younger generations who navigate their formative years under the constant glare of digital scrutiny.

Beyond individual well-being, social media

exerts a profound influence on civic discourse. The echo chambers created by personalized algorithms can exacerbate ideological polarization, making nuanced public debate increasingly difficult. Misinformation and deep fakes spread rapidly through these networks, posing ongoing challenges to public trust in democratic institutions, media integrity, and scientific consensus.

Mitigating these issues does not require abandoning digital platforms altogether, but rather cultivating a culture of digital literacy and intentional usage. Users must move from passive consumption to conscious engagement, setting personal boundaries to protect their mental health and privacy. Simultaneously, platform developers

bear a fundamental responsibility to prioritize user well-being over algorithmic metric optimization, implementing transparent policies, robust data protections, and effective measures against algorithmic manipulation.

Ultimately, social media is a powerful tool whose impact depends entirely on its design and application. By balancing the pursuit of technological connection with a commitment to real-world presence and critical thinking, society can harness the positive potential of digital networks while safeguarding mental health and civic health for the future.

CINEMA'S ENDURING MAGIC IN A DIGITAL AGE

Cinema, that mesmerizing art form that blends light, sound, and story, remains one of the most powerful and transformative mediums of human expression. For over a century, it has captured our imaginations, evoked profound emotions, and mirrored the complexities of the world we inhabit. It is more than just entertainment; it is a shared experience, a window into diverse cultures, and a testament to the enduring power of storytelling.

At its core, cinema possesses a unique ability to transport us to different realms, allowing us to walk in the shoes of others and experience lives vastly different from our own. From the epic landscapes of fantasy to the intimate struggles of everyday life, movies have the power to foster empathy and understanding. They challenge our perspectives, ignite our curiosity, and encourage us to reflect on the human condition. A truly great film can leave an indelible mark on our souls, staying with us long after the credits have rolled.

The collective experience of watching a movie in a darkened theater remains a vital aspect of cinema's magic. There is a communal energy that arises when a group of strangers simultaneously laughs, gasps, or sheds tears. This shared vulnerability creates a sense of connection, reminding us of our common humanity. In an increasingly digital world where interactions often occur through screens, the physical space of the cinema offers a refuge, a place to disconnect from our devices and engage with art in its fullest form.

However, the landscape of cinema is undergoing a dramatic transformation, propelled by the rise of streaming platforms and the convenience of at-home viewing. While these technological advancements have democratized access to films and provided opportunities for diverse voices to be heard, they have also raised questions about the future of the theatrical experience. The intimate setting of a living room cannot replicate the sensory immersion and collective energy of a cinema, and there is a legitimate concern that the theatrical model may become increasingly marginalized.

Despite these challenges, cinema continues to evolve and adapt. Filmmakers are pushing boundaries, experimenting with new techniques, and exploring a wide array of genres and narratives. The advent of digital technology has opened up possibilities that were once unimaginable, enabling creators to realize their visions with unprecedented precision and visual splendor. Ultimately, cinema's enduring appeal lies in its capacity to connect with us on a fundamental level.

- SAFA SYED

THE ENDURING POWER OF TRUE HUMAN CONNECTION

Friendship is the fundamental architecture of a resilient human life, serving as an anchor in a world characterized by relentless change and profound uncertainty. In an era increasingly defined by digital hyper-connectivity and fleeting digital interactions, the profound weight of a genuine platonic bond often goes tragically uncelebrated. We live in a society that readily measures social wealth in follower counts, algorithmic engagement, and superficial networking, reducing the beautiful, messy complexity of human relationships to mere data points on a screen. Yet, true friendship requires a deliberate and sustained investment of the soul that transcends the superficial limits of modern communication. It is meticulously built in the quiet, unrecorded moments the shared silences over morning coffee, the desperate midnight phone calls during sudden crises, and the unspoken, intuitive understandings that only years of shared, lived history can forge.

Beyond acting as mere pleasant companionship, friends serve as the critical mirrors to our own constantly evolving identities. They are the chosen family that holds us relentlessly accountable, bravely challenging our complacency while simultaneously offering a steadfast sanctuary from the harsh, relentless judgments of the outside world. A profound friendship provides the vital psychological scaffolding necessary to weather life's inevitable storms, offering emotional refuge when the foundational pillars of our personal or professional lives begin to violently tremble. When romantic relationships falter or career aspirations collapse, it is the quiet strength of a friend that helps piece together the fragmented remnants of our self-esteem.

Biologically and sociologically, we are inextricably hardwired for this spe-

cific brand of deep intimacy. Decades of research consistently reveal that profound social connections are not just pleasant additions to our daily routines; they are vital, non-negotiable imperatives for our physical and mental survival. Isolation breeds a unique and pervasive kind of modern despair, whereas the presence of a steadfast friend acts as a potent, life-saving antidote to the existential loneliness inherent to the human condition. Communities and societies thrive only when the individuals within them are tightly tethered to one another by invisible threads of mutual respect, reciprocal care, and unwavering support.

Cultivating and preserving these bonds across a lifetime, however, is never a passive endeavor. As we navigate the complex, often chaotic transitions of adulthood enduring career shifts, navigating geographical relocations, and managing evolving family dynamics maintaining deep friendships demands a radical, almost defiant inten-

tionality. We must actively choose to show up, to listen deeply without the immediate urge to fix, and to offer abundant forgiveness when human frailties inevitably emerge. The unmatched beauty of a lifelong friendship lies entirely in its capacity for elastic evolution, gracefully stretching and adapting to accommodate the different people we are becoming rather than stubbornly clinging to the ghosts of who we once were.

Ultimately, the friendships we dedicate ourselves to nurturing remain the most enduring legacy we leave behind. They stand as a powerful testament to our boundless capacity for empathy, courageous vulnerability, and selfless love. In a world that so frequently prioritizes the transactional, the profitable, and the temporary, choosing to hold tightly to those who truly know the depths of our character is an act of quiet rebellion and profound grace.

- DURGHA DEVI

UNLOCKING HUMANITY'S FUTURE THROUGH SCIENTIFIC DISCOVERY

The traditional institutions of global diplomacyity alliances.

Science is the relentless, curious engine that propels human civilizational progress forward. From the moment early humans harnessed fire to the modern deployment of deep-space telescopes, our desire to comprehend the natural world has defined our species. Science is far more than a rigid collection of facts, formulas, and laboratory experiments; it is a dynamic, self-correcting process of inquiry. It demands rigorous evidence, constant questioning, and a willingness to abandon deeply held beliefs when confronted with new data. In an increasingly complex and interconnected world, the scientific mindset serves as our most reliable compass for navigating uncertainty.

At its core, scientific enterprise transforms abstract curiosity into practical solutions that improve human life. Over the past century, breakthroughs in medicine, agriculture, and physics have dramatically extended human life expectancy, eradicated devastating diseases, and revolutionized global communication networks. Today, science stands at the forefront of tackling our most urgent global challenges, from mitigating climate change to developing sustainable energy sources and harnessing artificial intelligence. The ability of researchers worldwide to rapidly sequence viruses and develop life-saving vaccines under extreme pressure demonstrates the profound power of international scientific collaboration.

However, science faces significant modern challenges, chief among them being growing public skepticism and politicization. In an era saturated with misinformation and digital echo chambers, evidence-based consensus is too often dismissed in favor of ideological convenience. This dangerous trend undermines public health initiatives, delays environmental action, and weakens the societal trust necessary for scientific progress. To bridge this divide, the scientific community must prioritize clear, accessible communication. Scientists cannot remain isolated in academic silos; they must

actively engage with the public, explaining not just their conclusions, but the rigorous methodology and inherent uncertainties that define true research.

Furthermore, ethical considerations must keep pace with technological advancement. Breakthroughs in genetic editing, autonomous systems, and neural interfaces hold immense promise, but they also introduce profound moral dilemmas. Science provides the technical capability to reshape our world, but it cannot answer ethical questions on its own. Society as a whole must guide scientific application, ensuring that powerful tools are deployed responsibly, equitably, and with deep respect for human rights.

Ultimately, investing in science is an investment in human potential. Governments and private institutions must continue to fund both applied research and curiosity-driven basic science, which frequently yields unexpected, revolutionary discoveries. Cultivating scientific literacy among future generations is equally critical, fostering critical thinking skills that extend far beyond the laboratory. By embracing empirical truth, remaining open to continuous discovery, and aligning scientific endeavour with human values, we can build a healthier, more sustainable, and enlightened world for generations to come.

- STEPHEN JOSHUA J.

THE TIMELESS POWER AND BEAUTY OF FLOWERS

Flowers are among the most delicate yet profoundly influential creations in the natural world. Far more than temporary ornaments, they have captivated human imagination across cultures and civilizations for thousands of years. From ancient sacred rituals to modern personal celebrations, blossoms serve as universal symbols of emotion, beauty, and renewal. In an era increasingly defined by high-speed digital technology and urban concrete landscapes, our enduring connection to flowers offers a grounding reminder of nature's delicate rhythms, resilience, and quiet power to uplift the human spirit.

At their core, flowers possess an ex-

traordinary capacity to communicate complex human emotions when words fall short. A single rose, a bunch of vibrant sunflowers, or a subtle sprig of lavender can convey love, gratitude, deep sympathy, or quiet hope with effortless grace. This emotional resonance is not merely poetic; it is deeply biological and psychological. Exposure to natural floral displays has been scientifically proven to reduce stress levels, lower anxiety, and trigger positive emotional responses. The presence of living blooms in our immediate living and working environments introduces colour, organic texture, and subtle fragrance, instantly transforming static

rooms into refreshing, therapeutic sanctuaries.

Beyond their aesthetic and psychological appeal, flowers play an indispensable role in maintaining planetary biodiversity and supporting essential ecosystems. As the reproductive organs of flowering plants, or angiosperms, they are integral to the global food chain. Flowers rely on a fragile network of pollinators including bees, butterflies, birds, and insects to facilitate cross-pollination. In return, blossoms offer rich nectar and pollen, sustaining millions of species worldwide.

Delhi police arrest two in bus gang-rape case

CH NEWS, DELHI
Delhi Police arrested a bus driver and conductor for allegedly gang-rape of a 17-year-old girl inside a moving bus on August 4. The survivor was travelling from Mainpuri to visit a relative in Sector 63, Noida, when she was picked up near Pari Chowk. Police said she was assaulted inside the bus and later dropped near Ring Road in Delhi's Kashmiri Gate area. After her complaint was filed late that night, police registered an FIR under relevant POCSO Act sections on August 5, seized the bus and arrested both accused.

Three killed in Kaushambi factory explosion

CH NEWS, UTTAR PRADESH
Three people were killed and five injured after a massive explosion at a firecracker factory near Manauri Bazar on the Kaushambi-Prayagraj border in Uttar Pradesh on Monday. The blast followed a fire that triggered several explosions, damaging nearby houses and causing panic. District Magistrate Vipin Pal reached the site and directed officials to speed up rescue efforts and provide medical care. Firefighters, police, administrative teams and six to eight ambulances were deployed. The injured were taken to SRN Hospital in Prayagraj, while rescue teams continued searching the debris.

Deputy CM promises rights and dignity for nomadic tribes

MUMBAI
Maharashtra Deputy Chief Minister Eknath Shinde on Monday said denotified and nomadic communities need constitutional rights, dignity and justice rather than sympathy. Speaking at the Shiv Sena Nomadic and Denotified Tribes Rights, Justice and Development Convention 2026, he said the state government was committed to helping these communities build stable and worry-free lives. Shinde recalled that the British government had branded several working communities as "born criminals" under the Criminal Tribes Act. He noted that they were freed from this

Bindu Krishna opposes Kanthapuram's women restriction

MALAPPURAM
Keralam's Women and Child Development Minister Bindu Krishna has criticised All India Jamiyyathul Ulama general secretary Kanthapuram A.P. Aboobacker Musliar over his reported directive to Muslim organisations on women's participation in public religious celebrations. Kanthapuram had urged Muslim organisations to restrict women from mingling with men during public religious events. His remarks have drawn criticism from the minister, who said such directions could affect women's freedom to participate in public spaces. Krishna said directives aimed at restricting women could push them "centuries back". She questioned the acceptability of such restrictions in a society that guarantees equal rights to men and women. The minister made the remarks on Monday in Malap-

PINK TICKET EXTENSION

Delhi extends pink tickets for women commuters

NEW DELHI
The Delhi government has extended the use of paper-based pink tickets for women availing free travel on Delhi Transport Corporation (DTC) and Cluster buses until September 17. The decision gives women commuters additional time to shift to the Pink Saheli Smart Card, which will become mandatory for free bus travel from September 17. Delhi Health Minister Pan-kaj Kumar Singh said the earlier deadline of August 31 had been extended. He said the paper tickets would remain available

until September 17, after which women will have to use the smart card to continue receiving the free travel benefit. The government plans to end the existing system of paper tickets and move completely to the Pink Saheli Smart Card.

IN FOCUS	
■ 18.13 lakh+	Pink Saheli Smart Cards issued.
■ September 17 —	New deadline for paper tickets.
■ August 31 —	Earlier paper-ticket deadline.
■ Free travel —	Available on DTC and Cluster buses.
■ September 17 —	Smart card becomes mandatory.

The card, which works as a National Common Mobility Card, is designed to digitally record journeys. It will also be linked to the user's Aadhaar and mobile phone, according to officials. Officials said eligible women can continue receiving paper-based pink tickets and travelling free on DTC and Cluster buses until the revised deadline. The government has asked depot managers, regional managers, conductors and enforcement staff to inform

NEW DELHI

Delhi's draft electoral roll has excluded 47.7 lakh voters after the Special Intensive Revision, leaving nearly one in every three voters out of the newly published list. The draft roll was released on Monday and covers around 1.45 crore electors in the national capital. The final electoral roll will be published on November 4. Delhi Chief Electoral Officer Ashok Kumar said voters whose names are missing from the draft list can request inclusion. They must submit Form 6 along with the required supporting documents by September 30. The claims

will then be examined before the final electoral roll is prepared. Voters can check whether their names appear in the draft roll through the Election Commission's voter services portal. Officials have advised citizens to carefully verify their names and other details. Those who find their names missing should use the claim

"Those left out can seek inclusion through Form 6 with supporting documents by September 30"
- Ashok Kumar, Delhi Chief Electoral Officer

process within the given deadline to avoid problems later. The exclusion of such a large number of voters has made it important for residents to check the revised list. Being left out of the draft roll does not mean an eligible citizen has permanently lost the right to vote. Eligible voters can still apply for inclusion

Nine Naga MLAs seek action against Kuki leaders

IMPHAL
Nine Naga MLAs from Manipur's ruling coalition have written to Union Home Minister Amit Shah, seeking immediate action against Kuki-Zo leaders over their alleged involvement in the killing of Naga civilians. Deputy Chief Minister Losli Dikho travelled to Delhi on Monday to submit the letter on behalf of the legislators. The MLAs have sought action against Deputy Chief Minister Nemcha Kipgen and demanded the arrest of her husband, Thangnoi Kipgen. They alleged that his insurgent group was linked to violence against civilians. The allegations are part of growing tensions between Naga and Kuki communities in the state. The legislators also demanded the immediate cancellation of the Suspension of Operations (SoO) agreement with Kuki militant groups, citing alleged repeated violations and attacks on civilians. They urged Shah to take what they described as decisive action to prevent the situation from worsening.

sions between Naga and Kuki communities in the state. The letter was sent amid fresh Naga-Kuki clashes in Manipur. At least four Naga civilians were killed in an ambush on Thursday, while reports said two Kuki men were killed in Kangpokpi on Monday. The recent violence has added to concerns over the fragile security situation. Ethnic violence in Manipur began between Meitei and Kuki communities in May 2023 and later affected other communities. The conflict has killed at least 260 people and displaced around 60,000. The Naga MLAs said their demands were aimed at protecting civilians and restoring peace and normalcy in the state.

AIIMS CRE-5 re-exam disrupted by server failure

JAIPUR
The AIIMS Common Recruitment Examination (CRE)-5 re-examination was disrupted at an examination centre in Jaipur on Monday after a server failure delayed the test. The examination was scheduled from 9 am to 12 pm at the iON Digital Zone centre in Sitapura, but began around 9:30 am due to the technical problem. Candidates said the server failed again about 20 minutes after the examination started, leading to protests outside the centre. They demanded cancellation of the examination and another opportunity to appear under proper conditions, citing repeated technical disruptions at the venue. The incident came a day after the same Sitapura examination complex faced technical problems during the NEET-PG 2026 examination. The NEET-PG test, conducted nationwide on Aug 30, could not be completed at two centres in the complex because of internal power supply issues. According to the National Board of Examinations in Medical Sciences (NBEMS), the NEET-PG disruption affected 2,445 candidates. The board subsequently announced a re-examination for the affected candidates on Sept 5 at 3 pm in Jaipur.

Udhayanidhi questions TVK over Chennai sports city status

CHENNAI
A political dispute broke out in the Tamil Nadu Assembly over the ₹261-crore Chennai Global Sports City project at Semmenchery. The issue was raised by Leader of Opposition Udhayanidhi Stalin after reports suggested that the project had been dropped. The proposed sports city had earlier received attention as a major plan to strengthen sports infrastructure in Chennai. Udhayanidhi questioned Sports Minister Aadhav Arjuna about the status of the project. He said the DMK government had planned the facility across 128 acres to train athletes to Olympic standards and create international-level sports infrastructure. The project was also intended to provide facilities for a wide range of sporting activities. Responding to the concerns, Arjuna said the government was preparing a fresh Detailed Project Report for the sports city. The revised plan will cover facilities for around 42 sports, according to the minister. His response indicated that the project has not been completely abandoned, but is being reconsidered through a new development plan. The disagreement centred on whether the earlier proposal would continue in its original form or be replaced by a revised plan. The minister's statement provided a clearer indication of the government's current approach during the next stage of planning. Arjuna further said that construction work would begin within six months after the revised plan receives approval. The exchange in the Assembly has brought renewed focus on the future of the proposed sports city, which was planned as a major sports facility in Chennai. For now, the government is working on the revised DPR, with the project's next phase depending on its approval.

The ₹261-crore Chennai Global Sports City project faces uncertainty as Udhayanidhi Stalin questions its status, while Sports Minister Aadhav Arjuna proposes a revised plan.

Hindu activist found dead in Lucknow canal

LUCKNOW
Lucknow Police found Hindu activist Dharendra Pratap Singh dead with bullet wounds in a canal in Lucknow's Dubagga area after he had been missing for two days. Preliminary investigation suggests Singh was killed inside his Fortuner SUV before his body was dumped in the canal. Police suspect his driver may have colluded with rivals over an alleged land dispute. Singh's abandoned vehicle was earlier recovered in the Sushant Golf City area, about 15 km away. The driver has been taken into custody, while forensic teams continue examining the scene.

SC declines to restrict CJP's September 5 march

NEW DELHI
The Supreme Court on Monday declined to interfere with the Cockroach Janta Party's proposed September 5 protest march in Delhi. A bench headed by Chief Justice of India Surya Kant said there were no compelling circumstances to presume the mobilisation would turn violent. Participants were expected to remain peaceful there. The court said decisions on permission and law-and-order arrangements should be taken by the Centre and Delhi government. The bench was hearing petitions seeking restrictions on gatherings. Petitioners also sought postponement of the march until after the BRICS Summit scheduled for September 12 and 13. The CJP has announced the march from India Gate to Delhi Police headquarters. The group described it as peaceful and said it would protest the Centre's alleged failure to honour assurances after its earlier Jantar Mantar agitation. Families of students who died by suicide following the NEET controversy and people alleging police excesses during the July 20 protest are expected to participate. The Supreme Court also refused to summon CJP representatives, saying there was no identified organised group before it. It said authorities were responsible for deciding what was legal and maintaining public order. Petitioners may approach the court again if an alarming situation arises. The bench directed that copies of the petition be served on the Centre and Delhi government and posted the matter for September 10. It also connected the case with the Supreme Court-appointed enquiry committee examining allegations surrounding the July 20 protest. The committee is looking into police excesses, violence by protesters, injuries to police personnel and damage to public property.

The child "had been scared of visiting the washroom for several days, remained agitated, and cried uncontrollably through the night."
- Police officer, Delhi

alleged abuse. Following a complaint from the child's father, police visited the school, seized the CCTV recorder and registered an FIR under relevant sections. An attendant has been arrested in connection with the case. A teacher, the school principal and the director have also been booked. Police are continuing their investigation into the alleged assault and are examining the evidence collected from the premises.

Two trafficked women rescued from GB road brothel.

CH NEWS, NEW DELHI
Two women allegedly traf-ficked from West Bengal and forced into prosti-tution were rescued from a GB Road brothel, Delhi Po-lice said. Three women, identified as Geeta, Manju and Paro Khatoon, were arrested for their alleged involvement. Police began the operation after a 60-year-old woman re-ported her daugh ter miss-ing. The 26-year-old later contacted her mother and sought help from the brothel. Another 28-year-old woman was also res-cued. She alleged she was promised a cleaning job but was forced into prosti-tution.

Bengal police bust ₹72 crore cybercrime racket

CH NEWS, Kolkata
Bankura district police in West Bengal have busted a major cyber fraud racket operating from Ranibandh and arrested seven people, officials said Monday. The racket is estimated to in-volve around ₹72 crore. Po-lice used data analysis, bank account tracing, transaction records and criminal links to identify suspects. They also tracked money transfers and ATM withdrawals. Authorities seized 34 bank passbooks, 13 ATM cards, nine cheque books and identity docu-ments. Police suspect the accused are linked to a larger pan-India cybercrime network and are question-ing them to identify its masterminds.

Andhra CM pushes ahead with Amaravati city plan

AMARAVATI
Andhra Pradesh Chief Minis-ter N Chandrababu Naidu is pushing ahead with an ambi-tious plan to build Amaravati as a modern capital city, hop-ing to create an urban centre that can meet the needs of a growing population. The project is being developed on the banks of the Krishna River and is being presented as a future-focused city with modern infrastructure and technology. Thousands of workers are currently engaged at the large construction site, where roads, canals and government build-ings are taking shape. The planned city includes a major legislative assembly building, government offices and high-rise administrative towers. The design also includes a large freshwater lake and a planned grid-based layout. A major part of Naidu’s vi-sion is the development of the

Cites public health concerns and the risks of tobacco consumption.

GANDHINAGAR
Gujarat has extended its ban on the manufacture, storage, distribution and sale of gutkha and pan masala contain-ing tobacco or nicotine for another year. The renewed prohibition will come into effect from September 13, 2026, and remain in force un-til September 12, 2027. The Commissioner of Food Safe-

ty issued the notification on August 31, citing public health concerns and repre-sentations received from var-ious non-governmental or-ganisations. The ban, which has been in place in Gujarat since 2012, will continue to cover tobac-co and nicotine-laced gutkha and pan masala regardless of the name under which they are sold. The order also ap-plies to ingredients marketed separately when they are in-tended to be mixed later to prepare prohibited products. Authorities have been di-rected to take action against violations involving the man-ufacture, storage, distribution

or sale of products covered under the order. Officials warned that strict legal action would be taken against any-one found violating the pro-hibition. The extension will ensure that the restrictions continue without a break af-

ter the current period ends. The notification cited re-search by Tata Memorial Hospital, the Tata Institute of Fundamental Research and HAMER, which indicated that gutkha and pan masala consumption is carcinogenic

and can substantially in-crease the risk of oral cancer. The government said health protection remained a key reason for continuing the re-strictions. The notification also re-ferred to findings from the Global Adult Tobacco Sur-vey. According to the cited data, 35 per cent of adults in India consume tobacco, while 21 per cent use smoke-less tobacco. With the latest order, Gujarat will continue its long-standing restrictions on tobacco-laced gutkha and pan masala for another year, while enforcement agencies remain responsible for pre-venting violations.

Why Gujarat Extended the Ban
■ Cancer risk: Gutkha can increase oral cancer risk
■ Public health: Ban extended to protect citizens.
■ 35% tobacco use: Adults con-suming tobacco nationwide.
■ 21% smokeless use: A major health concern.
■ Since 2012: Gujarat has main-tained the ban.
■ Strict action: Violators face legal action.

Supreme Court seeks Roy’s interrogation records

NEW DELHI
The Supreme Court on Mon-day directed the West Bengal government to place on record the interrogation details of Su-mit Roy, personal assistant to Trinamool Congress MP Abhishek Banerjee, in the Sal-boni land-grabbing case. The court passed the direction after Roy claimed investigators had barely questioned him about the alleged offence. A bench headed by Chief Justice of India Surya Kant, along with Justices Joymalya Bagchi and V Mohana, also extended Roy’s protection from arrest until September 7. Roy has challenged a Calcutta High Court order that denied him pre-arrest bail. The Supreme Court had stayed his arrest in the case. Roy’s lawyer, senior advo-cate Gopal Sankaranarayanan, said the interrogation was au-dio and video recorded and that Roy had fully cooperated. He

claimed Roy was questioned for several hours over 11 days, but investigators focused main-ly on his family background and the Trinamool Congress rather than the alleged land transaction. The West Bengal government disputed the claim. Solicitor General Tushar Mehta told the court that Roy had been questioned about cash de-posits in his bank account and that investigators had docu-ments bearing his signature. He also referred to another deposit of Rs 2 crore and sought fur-ther questioning. The bench asked for Roy’s responses regarding the depos-its and sought details of their source. The court also noted that the case involved wider allegations of a substantial land scam, rather than only the al-leged Rs 10-lakh transaction cited by Roy’s lawyer. The matter will be heard again on September 7, when the court will consider the records and Roy’s protection from arrest.

UP turns Gen Z into cultural ambassadors

LUCKNOW
The Uttar Pradesh govern-ment has launched an initia-tive to encourage Gen Z and other young residents to pro-mote their cities through short videos. Under the ‘Visit My State Uttar Pradesh’ cam-paign, participants have been invited to create 60-second reels showcasing the culture, food, traditions and attrac-tions of their hometowns. The campaign aims to give young people a direct role in promoting tourism. Tourism and Culture Minister Jaiveer Singh said Uttar Pradesh’s cultural identity could be found across its cities, villag-

“The campaign puts local residents at the centre of tourism storytelling and that short videos can combine a place, personal voice and local experience”
- Amrit Abhijat, UPSTDC Chairman

es and districts. He said young residents could become cultural ambassadors by shar-

ing their experiences and pre-senting their cities in their own words. Participants must appear on camera and speak in either Hindi or English. The reel must be recorded outdoors with a well-known tourist site or recognisable location vis-ible in the background. Each video should not exceed 60 seconds and must end with the line, “Visit My State Uttar Pradesh.” Uttar Pradesh State Tourism Development Corporation chairman Amrit Abhijat said the campaign puts local resi-dents at the centre of tourism storytelling. He said short vid-eos could combine a place, a

personal voice and a local ex-perience, giving familiar des-tinations a fresh perspective and helping lesser-known lo-cations reach wider audiences. Residents can showcase dif-ferent aspects of places across the state. For example, partic-ipants from Lucknow can highlight its food, chikankari and historic neighbourhoods, while those from Braj, Bun-delkhand, Purvanchal and Ter-rai can present their local tradi-tions. Through the campaign, the government hopes to make tourism promotion more par-ticipatory and encourage young people to explore and share their surroundings.

J&K medical interns strike over seven-year-old stipend

JAMMU
MBBS and BDS interns across Jammu and Kashmir began an indefinite strike on Monday, demanding an in-crease in their monthly stipend from Rs 12,300 to Rs 30,000. The interns said the current amount, which works out to nearly Rs 400 a day, has remained unchanged for almost seven years despite re-peated requests and protests. The protesting interns said they were left with no option but to stop work after the gov-ernment failed to act on their long-standing demand. They said their stipend does not match the workload and re-sponsibilities they handle during their internship. Their duties include attending to pa-tients, working in emergency departments, handling night shifts and serving at rural postings. The protest was held at sev-eral medical institutions across the Union Territory. Interns gathered outside med-ical college hospitals, includ-ing SKIMS Bemina and GMC

Srinagar, while similar demonstrations were reported at different locations in Jam-mu. They carried out the pro-test peacefully and called for the government to address their concerns. The interns also pointed to a wide difference between their stipend and the amounts paid to medical interns in sev-eral other States. They said interns elsewhere receive sig-nificantly higher payments despite performing similar clinical duties. According to the protesters, the financial gap has increased frustration among students who are al-ready dealing with demanding working hours. “We have been forced to abandon work and take to the streets. All we are demanding is a stipend commensurate with the number of hours we work,” a protesting intern said. The interns are seeking a revision of the stipend to Rs 30,000 and have indicated that the strike will continue until their demand receives a response from the govern-ment.

Delhi girl dies after alleged school punishment

“An inquiry would be conducted and strict action would be taken against any school staff member found guilty.”
- Ravinder Singh Negi, BJP MLA

A 10-year-old girl studying at a government school in east Del-hi’s Vinod Nagar died during treatment after her family al-leged that she was made to stand in the sun as punishment for not bringing a book. Police sources said the incident took place at Sarvodaya Kanya Vidy-alaya on August 27. According to the family, the school called the girl’s mother, Anjali, after her health reported-ly worsened. She alleged that when she reached the school, she found her daughter standing outside in the sun and appearing unwell. The girl was then taken to a hospital for treatment. The family alleged that a teacher had punished the child for failing to bring a book to school. The girl later died during treatment on August 27.

Police said the allegations are being investigated and that the exact circumstances leading to her death are being examined. Following the incident, the girl’s family and local residents protested outside the school, de-manding strict action against those responsible. BJP MLA Ravinder Singh Negi also visit-ed the spot and said an inquiry would be conducted. He said action would be taken against any school staff member found guilty. Police are continuing to in-vestigate the case and establish what happened at the school before the girl’s health deterio-rated.

Bomb threat diverts Air India flight

AHMEDABAD
An Air India flight travelling from Dammam in Saudi Ara-bia to New Delhi made an emergency landing at Ahmed-abad airport on Monday after a crew member found a tissue paper carrying a bomb threat.

The aircraft had 32 passengers on board, all of whom were reported safe, police said. The Delhi-bound flight was diverted after the crew mem-ber discovered the message. The pilots decided to land at Ahmedabad International Airport as a precautionary

measure. The aircraft touched down at around 4.30 pm, following which security agencies be-gan a detailed inspection. As-sistant Commissioner of Po-lice V N Yadav said the threat was written on a tissue paper found by a crew member.

Two Kerala women killed in California

NEW DELHI
Two women from Kerala were allegedly killed in Milpitas, California, with police detain-ing a woman described as their friend. The victims were iden-tified as Anjana Hari, 35, from Thrissur, and Ann Mathew, 40, from Thiruvananthapuram.

The incident occurred around 1.53 am on August 28, accord-ing to police. Reports said one woman was allegedly killed inside a flat, while the other was hit by an SUV. Union minister Suresh Gopi said efforts were underway to bring their mortal remains back to Kerala.

Ganpati special trains see 1.17 lakh bookings

MUMBAI
More than 1.17 lakh passen-gers have booked tickets on special trains being operated for the Ganpati festival, as In-dian Railways prepares for a major festive rush. Central Railway has announced 262 special train trips to help pas-sengers travelling from Mum-bai, Pune and Nagpur to des-tinations across the Konkan region of Maharashtra and Goa. Of the total services, 200 will be reserved special trains while 62 will be unreserved services. The reserved trains will include air-conditioned coaches along with Sleeper and General coaches, giving passengers different travel op-tions during the festival peri-od. According to Central Rail-way Chief Public Relations Officer Dr Swapnil Nila, the

200 reserved special trips in-clude 112 to-and-fro services to Sawantwadi Road, 64 trips to Ratnagiri and 24 trips to Madgaon. The special train services are scheduled to be-gin from September 9, 2026. The large number of book-ings has highlighted the ex-pected increase in passenger movement during the Ganpa-ti festival. Railways has ad-vised travellers to plan their journeys in advance and fol-low official travel instructions to avoid difficulties during the busy period. The special trains are aimed at providing additional travel capacity and easing pressure on regular services. With thousands of passengers ex-pected to travel towards Ma-harashtra’s Konkan region and Goa, the additional ser-vices are expected to make festive travel more convenient and organised.

Centre defers Manipur Census amid NRC demands

GUWAHATI
The Centre on Monday de-cided to defer the Census exercise in violence-hit Manipur amid growing protests demanding an update of the National Reg-ister of Citizens (NRC) before the population count. The de-cision was announced after Union Home Minister Amit Shah chaired a high-level meeting in New Delhi to re-view the situation in the state. The meeting was attended by Manipur Governor Ajay Kumar Bhalla, Chief Minister Yumnam Khemchand Singh, Union Home Secretary Gov-ind Mohan and other senior

officials. According to the Chief Minister’s Office, the decision followed demands from people in Manipur who want the NRC updated before the Census. Chief Minister Singh thanked Prime Minister Nar-

endra Modi, Home Minister Shah and other central leaders for considering the concerns raised by people in the state. The decision came as protests, shutdowns and clashes with security forces were reported in the Valley over the NRC de-

mand. The Manipur High Court also withheld Census opera-tions on Monday while hear-ing two petitions seeking di-rections to begin the NRC update process. The petitions called for 1951 to be used as the base year and sought mea-sures against alleged threats from illegal migration, partic-

ularly from neighbouring Myanmar. Several Meitei and Naga or-ganisations have been de-manding the NRC update be-fore the Census, saying it could help address the conflict between communities. Repre-sentatives of various commu-nities recently met central of-ficials in New Delhi to press their demand. Some ruling BJP MLAs also supported the call. However, Kuki groups have opposed the NRC update. The Centre’s decision to defer the Census has now given au-thorities more time to consider the issue amid continuing ten-sions in Manipur.

“The meeting discussed in detail on the demand raised by the people of Manipur to defer the Census exercise in the State before the implementation of the NRC.”
- Manipur, Chief Minister’s Office

Turkey ignoring sea route in link with ASEAN

CH NEWS, New Delhi Turkey considers itself to be a bridge connecting continents. This is a good image for its connection with Southeast Asia, except that it focuses more on the land and its two extremes while neglecting the waters filled with container vessels, oil tankers and undersea cables, according to an article in India Narrative. These ships and cables are already connecting Turkey and Southeast Asia. Only Turkey policy is yet to catch up with that reality, states the article by Mehmet Enes Beşer.

CCPA fines United Biscuits Rs 1 lakh

NEW DELHI

The Central Consumer Protection Authority (CCPA) has imposed a penalty of Rs 1 lakh on United Biscuits Private Limited, formerly known as Pladis India Private Limited, over what it termed a misleading “wholewheat” claim in the marketing of McVitie’s Wholewheat Marie Biscuits.

The action followed suo motu cognisance of a social media article questioning the product’s ingredients and claims. The authority examined the biscuit packaging and its online listings before initiating proceedings. According to the CCPA order, the ingredient declaration showed whole wheat flour accounted for only 19.5 per cent of the biscuits, while refined wheat flour, or maida, made up 52 per cent. The authority said prominently using “wholewheat” in the product name could lead an average consumer to believe that whole wheat flour was the predominant ingredient.

The Directorate General (Investigation), tasked with examining the matter, submitted its report on July 16, 2026. It noted that the biscuits were marketed as “McVitie’s Wholewheat Marie Biscuits” despite containing only 19.5 per cent whole wheat flour.

Semiconductor push could create around 60K direct jobs: Min

NEW DELHI

The semiconductor ecosystem being developed in India is expected to create 50,000–60,000 direct jobs, Union Minister for Electronics and IT, Ashwini Vaishnaw, said on Monday. India achieved its target of developing 85,000 semiconductor engineers over a period of 10 years in just four years and has now set a new target of developing one lakh more engineers.

“In the coming years, close to 10 per cent of the global semiconductor industry’s market is expected to be in India. Students from Tier-II and Tier-III cities have already designed more than 250 chips,” he said while outlining the government’s vision for taking India’s semiconductor ecosystem to the next level.

“In one case, commercial production commenced within just 13 months of the groundbreaking, while approvals were granted within 200 days, 150 days and even 90 days in multiple cases,” said the minister.

The government has notified all six pillars of the Semicon 2.0 Scheme, marking a significant step towards strengthening India’s semiconductor design and manufacturing capabilities. The scheme builds on the momentum generated by the first Semicon India Programme and provides fiscal and infrastructure support across the semiconductor value chain from chip design, fabrication and packaging to equipment, materials, research and development, and talent development.

The six pillars under Semicon 2.0 are Design; Machines and Materials; Setting up more Fabs; Further strengthening the ATMP/OSAT industry; Research and Development; and Talent Development. Projects supported under Semicon 2.0 will generally have a duration of up to six years, while the scheme will initially remain open for applications for three years.

The India Semiconductor Mission (ISM) will be the nodal agency for Semicon 2.0. It will invite applications, undertake technical and financial appraisal, recommend applicants, and oversee implementation.

ISM may implement the design and deployment categories with the assistance of C-DAC. The mission may also announce semiconductor deep-tech awards from 2026 to promote niche innovation, said the notification.

GANDHINAGAR

Gujarat Chief Minister Bhupendra Patel held a series of meetings with industry leaders in New Delhi on Monday, discussing proposed investments running into thousands of crores across automobiles, chemicals, renewable energy, green manufacturing and advanced technology ahead of the Vibrant Gujarat Global Summit (VGGS) 2027.

At the VGGS 2027 curtain-raiser at Bharat Mandapam, Patel met representatives of JBM Group, DCM Shriram, Schneider Electric India, JSW

MG Motor India and Tata Power Renewable Energy, among others. The meetings focused on expansion plans and investments in Gujarat.

JBM Group discussed a proposed Rs 3,500 crore investment to expand auto-component and electric bus manufacturing in the state. Patel said the company has maintained a 17-year manufacturing presence and employs more than 9,000 people across Sanand, Vithalapur

ment to expand auto-component and electric bus manufacturing in the state. Patel said the company has maintained a 17-year manufacturing presence and employs more than 9,000 people across Sanand, Vithalapur

and Becharaji. Talks also covered potential partnerships for compressed biogas plants and advanced energy-storage systems. With DCM Shriram Chairman and Senior Managing Director Ajay Shriram and Aditya

Shriram, Patel discussed plans to invest Rs 8,000-10,000 crore at Dahej over the next five to seven years. The plans include expansion of captive green-energy integration. Patel also congratulated the company after its

UPI set to expand in Uzbekistan

TASHKENT

Indian travellers visiting Uzbekistan will soon be able to make instant merchant payments through the Unified Payments Interface (UPI), after NPCI International Payments Limited (NIPL) signed a commercial agreement with the National Interbank Processing Centre JSC (NIPC), operator of Uzbekistan’s HUMO payment system.

The agreement, signed on August 30 during Prime Minister Narendra Modi’s bilateral visit to Uzbekistan, expands UPI’s international reach and enables Indian users to scan Uzbekistan’s national interoperable QR code, UZQR, using their UPI-enabled applications.

The partnership follows approvals from the Reserve Bank of India and the Central Bank of Uzbekistan. The Uzbek central bank has designated HUMO as NIPL’s authorised partner for cross-border merchant accep-

UPI in Uzbekistan	
■ Indian tourists, business travellers and students can make direct merchant payments.	■ Integration covers retail, hospitality and services.
■ UZQR will be scannable through UPI-enabled applications.	■ The move reduces reliance on cards and cash while easing foreign-exchange payment friction.
■ Payments can be made directly from Indian bank accounts.	■ Uzbekistan joins India’s expanding UPI international network.

tance. Through integration with the Central Bank of Uzbekistan’s mandated Unified National QR infrastructure, UPI users are expected to gain broad acceptance across retail, hospitality and service merchants. Indian tourists, business travellers and students will be able to make person-to-merchant payments directly from their Indian bank accounts. The arrangement is expected to reduce de-

pendence on international cards and cash while easing foreign-exchange payment friction. It also marks another step in digital public infrastructure cooperation between the two countries and supports their economic engagement.

The development comes as India continues expanding UPI-linked payment systems overseas. The Maldives last month became the ninth country to announce the successful go-live of integration between its Maldives Instant Payment System, Favara, and UPI.

The Uzbekistan agreement adds another destination to India’s growing cross-border digital payments network, making transactions simpler for Indians travelling, studying or conducting business there.

UPI’s latest overseas expansion will let Indian visitors pay Uzbek merchants directly through familiar apps by scanning UZQR codes.

Swiss police arrest suspect after rave shooting

Aarau

Swiss police said on Monday that they had arrested a 43-year-old suspect in relation to a deadly shooting incident at a rave in the town of Aarau on the weekend. A 22-year-old Italian woman was killed and five people injured after the shooting at the event at a covered horse race track in the early hours of Sunday morning. Police launched a massive operation and just before 1am on Monday arrested a 43-year-old Swiss man on suspicion of carrying out the attack, it said. Investigations into the exact circumstances of the incident, as well as its background and possible motive, are currently underway.

Mother tells how daughter slipped away in Cyprus

KYRENIA

Ayten Bicer felt her 12-year-old daughter slip from her hands and disappear as a ferry capsized off northern Cyprus on Sunday, killing at least eight people. Her daughter Miray, and 6-year-old son Mehmet Asaf, were among nearly 20 people still missing on Monday as search teams looked for survivors in waters more than 500 metres (1,640 feet) deep. "She was saying, 'Don't let go'. And I didn't let go of my daughter. I swear, I didn't let her go," Ayten Bicer sobbed. A suitcase fell on top of her, forcing the girl from her grasp.

Spanish PM blames Israel for Ceuta migrant crisis

MADRID

Spanish Prime Minister Pedro Sanchez said on Monday there were signs Russia and Israel had spread the disinformation over Spain's migration policy that triggered last month's rush of migrants into Ceuta, but no evidence of Moroccan involvement.

Over 72,000 migrants irregularly crossed from Morocco into the tiny Spanish territory between July 30 and 31 in an unprecedented surge at one of the European Union's only two land borders with Africa, prompting alarm across the bloc. At least 100 people died in the attempt, according to Ceuta's local authorities.

Spanish opposition parties and some human rights groups have accused Rabat of deliberately allowing the mass crossing, an accusation Morocco has denied.

"When people talk and speculate about the participation of Moroccan authorities, I deny this outright," Sanchez told radio station SER. Videos on Instagram, TikTok and other social media spread misleading claims

TEHRAN

Iranian President Masoud Pezeshkian said on Monday that Tehran still wants a negotiated solution to its conflict with the United States, even as the two countries resumed hostilities and oil prices rose sharply.

Speaking to Prime Minister Narendra Modi on the sidelines of a regional security meeting in Kyrgyzstan, Pezeshkian said continuing the war was in nobody's interest and called for dialogue and cooperation to prevent the conflict from spreading.

His remarks came a day af-

ter US forces struck two Iranian launchers on Larak Island, according to a US official. Iran subsequently struck two US bases in Jordan, Iranian media reported. Two people were killed and others injured in the Larak attack.

Iranian state news agency IRNA quoted the local governor as saying.

The renewed fighting followed weeks of escalating US sanctions against Tehran and its business partners, while diplomatic efforts remained stalled.

Tensions also rose after US President Donald Trump posted an AI-generated video that

Nepal races to rescue workers trapped in tunnels

Chinese and Indian experts are helping Nepal search tunnels and underground areas of about half a dozen hydropower projects following the Himalayan flood disaster.

KATHMANDU

Nepal's rescue teams, backed by Chinese and Indian experts, intensified efforts on Monday to reach hundreds of workers believed trapped inside tunnels at hydropower projects after last week's Himalayan flood. Officials said 933 workers were believed to be trapped across 11 hydropower projects, many inside tunnels in the hard-hit districts of Rasuwa and Nuwakot. Rescue teams used excavators, searchlights and controlled blasts to clear huge amounts of mud, rocks and water blocking access. The Nepali army said teams had recovered three bodies after entering two tunnels, while other sections remained buried and continued to be searched. Army spokesperson Raja Ram Basnet said the enormous debris deposits

were making it difficult to reopen the tunnels, adding that reaching the trapped workers remained the main priority.

The disaster followed a surge of ice, rock, mud and debris through Himalayan valleys and settlements on Wednesday. A glacier collapse is believed to have triggered the flood, which caused destruction in Nepal and across

the border in China. By Monday, Nepal had confirmed 903 deaths and reported 4,247 people missing. Chinese authorities said 16 people had died and 546 were missing in Gyirong County. Nepal's foreign ministry said about 590 foreign nationals from 39 countries remained missing, while more than 10,000 people had been rescued from

Nepal tragedy deepens, thousands still missing

- 933 workers feared trapped at 11 hydropower projects
- 903 deaths confirmed in Nepal
- 4,247 people reported missing
- Three bodies recovered from two tunnels
- Controlled blasts, excavators used in rescue
- About 590 foreign nationals remain missing

affected areas. The Red Cross estimated that more than 90,000 people were likely affected. As bodies began decomposing in humid conditions, hundreds of unidentified victims were buried in shallow graves, adding urgency to the continuing rescue and recovery operation.

Ukraine frontline towns face destruction

FRONTLINE REALITY

- Russian forces are about 15 km from Druzhkivka
- Ukraine's eastern and southern front stretches about 1,200 km
- Thousands of drones operate near frontline areas
- Druzhkivka forms part of the strategic "fortress belt"

Burned-out cars, flattened buildings and deserted streets have become the grim reality in Druzhkivka, an eastern Ukrainian town where a small number of civilians remain alongside soldiers fighting Russian forces only 15 km away.

Artillery fire and the high-pitched buzz of attack drones punctuate daily life as Russian troops gradually move closer. The devastation in Druzhkivka reflects conditions across much of the 1,200-km front in eastern and southern Ukraine, where apartment blocks, markets and shops have been destroyed and entire communities are becoming increasingly uninhabitable.

Druzhkivka sits along a strategic route connecting towns and cities known as

Ukraine's "fortress belt". Russia is seeking to break through this defensive chain as it pursues control of the wider Donbas region, one of President Vladimir Putin's central objectives in the war.

Yet more than four years after Russia launched its full-scale invasion, Ukrainian forces continue to resist the advance.

For civilians who remain,

danger comes from above as well as from artillery. Thousands of Russian and Ukrainian drones operate near the front, searching for targets. Roads in Druzhkivka and surrounding towns are covered with protective netting to reduce the threat from unmanned aircraft.

Iryna Litovchenko, 56, said her home had been destroyed and described the loss as though her entire past had disappeared. Another resident, 63-year-old Zoya, continues selling basic food despite knowing she could be killed by a bomb.

"I know a bomb could come flying in and I'll die," she said.

Still, she refuses to abandon her hometown, saying she was born and raised there. For residents like her, staying has become an act of attachment amid destruction.

'Italy's population to shrink by 4 mn by 2050'

ROME

Italy's population will shrink by almost 4 million by 2050, undermining the sustainability of its economy and welfare system as the proportion of elderly people increases, national statistics bureau ISTAT warned on Monday.

In new demographic projections extending to 2080, ISTAT said Italy's resident population would fall to 55 million in 2050 from 58.9 million at the start of 2025, before dropping to 45.8 million by 2080. Prime Minister Giorgia Meloni said when she took office in 2022 that boosting the birth rate would be a government priority, but her efforts have produced scant results. Births have declined steadily since 2008 and fell last year to around 355,000, the lowest number since Italy's unification in 1861, while deaths have risen as the population ages.

Italy to extend border checks on Spain as Ceuta row escalates

ROME

Italy said on Monday it would suspend its open-border arrangements with Spain for another 15 days, extending restrictions it imposed after a mass rush of migrants into the Spanish enclave of Ceuta a month ago.

In response, Spain said it would also keep checking passengers arriving from Italy by air and sea for 15 more days, prolonging tit-for-tat restrictions that have undermined the European Union's passport-free Schengen zone.

Rome's right-wing government initially brought in the restrictions on August 1, saying it wanted to make sure no migrants entering Ceuta could travel on to Italy. Those curbs had been due to expire on Monday.

The decision to extend the suspension "was taken ... due to the persistence of the

factors that had led to the reintroduction of the measures," Italy's interior ministry said.

Spanish authorities say between 5,000 and 8,000 people remain in Ceuta after at least 72,000 crossed from neighbouring Morocco on July 30.

At least 82 migrants were found dead on the Spanish side of the border and Morocco confirmed 14 more deaths. The ministry said Italy was aware of "the steps already undertaken by Spain, together with the European Union, to help bring the situation in the area back to normal in the near future." Prime Minister Giorgia Meloni, who has taken a hard line against illegal immigration, is under pressure from a new far-right party, Futuro Nazionale, whose rhetoric is resonating with some voters ahead of elections due next year.

Meloni on the cusp of history

ROME

Giorgia Meloni is poised to make political history as Italy's longest-serving consecutive prime minister since World War II.

Meloni, who came to power in October 2022, has outlasted Italy's long tradition of unstable governments by maintaining a durable coalition and moderating some of her earlier populist positions in favour of pragmatic governance. She plans a rally on September 4 to mark the milestone and present the government's longevity as a crowning political achievement.

Italy has gone through 68 governments in 80 years, yet its current administration has proved more resilient during a period of conflict than governments in France and Britain.

France has had five prime ministers since autumn 2022, while Britain has gone through four.

However, Meloni's political stability may face a tougher test after the 2027 parliamentary elections. Opinion polls point towards a more fragmented parliament, raising concerns that Italy could return to coalition instability.

Analysts say one of Meloni's strongest achievements has been restoring investor confidence in Italy's public finances. Her government

'COALITION BENEFITED FROM BUDGET DISCIPLINE'

MELONI'S COALITION HAS BENEFITED FROM BUDGET DISCIPLINE AND STRONGER INVESTOR CONFIDENCE, WHILE EMPLOYMENT HAS RISEN. ANALYSTS, HOWEVER, SAY ECONOMIC GROWTH AND BROADER REFORMS REMAIN LIMITED, LEAVING QUESTIONS OVER WHETHER TODAY'S POLITICAL STABILITY CAN SURVIVE A MORE FRAGMENTED PARLIAMENT AFTER THE 2027 ELECTIONS.

has maintained budget discipline and moved away from costly policies such as the Superbonus home renovation scheme.

Coalition officials point to employment gains, saying 1.2 million workers have been added to the labour market and unemployment has fallen below 6%.

Still, economists argue that the government's record on economic growth and reform is weaker.

Former Treasury chief economist Lorenzo Codogno said fiscal responsibility had improved, but little progress had been made on promoting growth and reforming the economy.

WANT AN END TO WAR

'Iran still seeks dialogue with US'

he claimed showed Iran's Kharg Island oil hub being destroyed. Reuters found the footage was most likely synthetically generated, while a US official said the military had not targeted Kharg Island.

Iranian officials dismissed Trump's post as laughable. National Iranian Oil Company

chief Hamid Bovard said conditions on Kharg remained calm and oil operations continued.

Kharg handled about 90% of Iran's oil exports before the war began on February 28. Any attack on the facility could severely disrupt energy trade and intensify economic pressure on Tehran.

"Continuing the war is in no one's interest, neither ours, nor the region's, nor humanity's." — Masoud Pezeshkian

"We believe the solution to the existing issues is dialogue and cooperation." — Masoud Pezeshkian

INDIA FINALISE U23 WOMEN'S WRESTLING SQUAD

India's women wrestlers have completed U23 world selection trials, with Haryana leading the results and Maharashtra also producing multiple winners across the 10 weight categories for the upcoming global championships.

NEW DELHI

The Wrestling Federation of India (WFI) has finalised India's women's squad for the upcoming U23 World Wrestling Championships in the United States after selection trials at New Delhi's Indira Gandhi Stadium.

Wrestlers competed across all 10 women's weight categories, with athletes from Haryana, Maharashtra, Delhi, Uttar Pradesh and Madhya Pradesh fighting for places in the national contingent. The winners will represent India at the championships, while runners-up will join the national camp as sparring partners to strengthen preparation and squad depth.

Haryana emerged as the dominant state at the trials, securing top positions in several divisions. Parveen won the 50kg category, Sweety topped 53kg, Komal took 59kg, Neha won 62kg and Diksha Malik finished first in 76kg. Maharashtra's Ahilya Shinde, Vaishnavi Patil, Mansi Lather and Amruta Pujari won the 55kg, 65kg, 68kg and 72kg categories respectively.

INDIA'S U23 WOMEN WRESTLERS SELECTED FOR WORLDS
• Trials held at Indira Gandhi Stadium in New Delhi
• Selection covered all 10 women's weight categories
• Haryana dominated with five category winners
• Maharashtra produced four winners
• Runners-up will join the national camp
• Preparations will also focus on senior global assignments
• Winners will represent India at the U23 Worlds

Delhi's Neha Sharma secured the 57kg title.

WFI President Sanjay Singh praised the competitive standard at the trials, saying the

performances demonstrated the depth and strength of Indian women's wrestling. He expressed confidence that the selected wrestlers would per-

form strongly at the U23 World Championships in the USA and the Senior World Championships in Kazakhstan.

The selected contingent will now assemble for an intensive preparatory camp before leaving for their international assignments. The runners-up will also remain involved through the national camp, providing quality competition and helping the federation build greater depth ahead of major global events. The trials underlined intense competition in domestic women's wrestling and gave selectors a strong pool of contenders.

FIH World Rankings: Indian Women Rise to Eighth

India's historic fifth-place World Cup finish has lifted the women's hockey team to eighth in the latest FIH World Rankings.

MUMBAI

India's women's hockey team climbed to eighth in the FIH World Rankings after producing their best World Cup finish in 52 years. The rise followed their fifth-place finish at the FIH Hockey World Cup 2026, lifting the Olympic semifinalists one place in the rankings.

The rankings were updated after the World Cup concluded, with Argentina winning the women's title and Germany claiming the men's crown. India collected 2,938 ranking points to move ahead of Australia, who dropped to ninth with 2,812 points.

The Netherlands remain at the top despite suffering their first World Cup defeat since 2010. They lead the standings with 4,083 points, while champions Argentina strengthened their second position with 3,757. Belgium are third on 3,494 after returning to the World Cup podium for

the first time in 48 years.

China remain Asia's highest-ranked women's side in fourth with 3,182 points. Spain, Germany and England occupy fifth, sixth and seventh respectively, with only 45 points separating the three teams.

India's eighth-place ranking represents another positive marker after their World Cup campaign. Their fifth-place finish was their strongest showing in more than five decades and has provided momentum for the team internationally.

Australia now sit ninth, followed by the United States in 10th. Japan, New Zealand, Ireland and Scotland occupy positions 11 to 14, while

Chile, France and Korea follow. South Africa, Italy and Uruguay complete the top 20.

The Indian men's team retained eighth place despite another disappointing tournament. The Olympic bronze medallists retained their position at eighth.

FIH on India: The governing body highlighted India's fifth-place World Cup finish as their best showing in 52 years. The result earned the women's team 2,938 ranking points and moved them above Australia into eighth position. The Netherlands retained the top spot, while Argentina strengthened second place after winning the World Cup. Belgium completed the women's top three.

Koren's UFC journey ends in Shanghai

IMPHAL

Manipuri fighter Chungreng Koren's Road to UFC Season 5 campaign ended in Shanghai after a unanimous-decision loss to Japan's Ryo Tajima in the bantamweight semifinal. Entering as a short-notice replacement, the 28-year-old impressed by submitting previously unbeaten Ryuho Miyaguchi in Macau. Known as "The Indian Rhino", Koren's semifinal run marks a significant milestone for Indian MMA. He holds an 8-2 professional record and won the 2024 Matrix Fight Night Interim Bantamweight Championship.

PATNA

Bihar Cricket Association officials congratulated young batting prodigy Vaibhav Sooryavanshi for becoming the youngest player to score a half-century in Duleep Trophy history during East Zone's ongoing semi-final against Central Zone in Bengaluru. At the BCCI Centre of Excellence (CoE) Ground in Bengaluru, Sooryavanshi, who became the youngest debutant for India in international cricket via the T20I series in England in July, reached his milestone fifty off 42 deliveries before eventually ending up making a sparkling 92 off 81 balls, an innings featuring seven fours and seven sixes.

In doing so, he surpassed a 57-year-old mark set in 1969 by Laxman Singh, who scored a fifty at 16 years and 23 days. "On behalf of the Bihar Cricket Association, I extend my heartfelt congratulations to Vaibhav Sooryavanshi on this historic achievement. Breaking a 57-year-old record in the Duleep Trophy at such a young age is an extremely proud moment for Bihar cricket. "Vaibhav has once again proved through his talent, confidence and hard work that he is a star for the future. We are confident that he will go on to achieve many more milestones in the years to come," BCA President Harsh Vardhan said in a statement on Monday.

The teenager's record-breaking knock laid the foundation for a 161-run opening partnership with Abhimanyu Easwaran, thus placing East Zone in complete control of the match after they previously bowled out Central Zone for 266.

BCA Secretary Ziaul Arfin added that the young batter's composure under pressure pointed toward a promising career on the national stage. "Vaibhav Sooryavanshi's achievement is a matter of great pride for the entire Bihar cricket family. Becoming the youngest player to score a half-century in the Duleep Trophy at the age of just 15 years and 157 days reflects his exceptional talent and dedication.

BENGALURU

Sports can build character while strengthening students physically and mentally, Bengaluru University's physical education director said. Sports play an important role in developing human values and helping students grow physically and mentally, said Dr T.C. Krishnaswamy, Director of Physical Education at Bengaluru University.

He was speaking after inaugurating the International Sports Day celebrations and the 21st annual sports meet of Seshadripuram Academy of Business Studies in Kengeri, held at the Bengaluru University Physical Education Stadium.

Dr Krishnaswamy said sports provide physical nourishment while contributing to students' physical and mental development. He urged students to develop a sporting spirit and use sports as a platform to discover and demonstrate their abilities.

"Winning and losing are both part of sport and should be accepted equally," he said, adding that while victory brings happiness, defeat provides valuable experience. Such experiences, he said, can eventually become a stepping stone to future success.

Dr C.M. Parthasarathi,

Treasurer of the Seshadripuram Educational Trust, said sports help students develop a competitive spirit in today's increasingly competitive environment. Participation in inter-collegiate, state and national-level sporting events also helps athletes build friendships, camaraderie and healthy relationships, he said. Such exposure can further encourage talented students to aim for higher levels of competition and eventually seek recognition on international platforms.

Principal Dr Jayaram urged students to spend less time on mobile phones and devote more time to sporting activities. Regular participation in sports, he said, can help students maintain good health and physical fitness. Former Indian sol-

dier Rajendra Singh H, Physical Education Director Suresh C and students and staff members were present at the event.

Students should reduce the time spent on mobile phones and participate more actively in sports, Principal Dr Jayaram said. Regular sporting activities can help maintain physical fitness, promote good health and encourage a more active lifestyle among young people.

DHASH Bengaluru Half Marathon returns on December 6

BENGALURU

The DHASH Bengaluru Half Marathon (DBHM) will return for its second edition on December 6, 2026, bringing together the city's running community for a premium and accessible race experience. Powered by the Bengaluru Runners Association, the event will be anchored at Kanteerava Stadium, with

participants running through Bengaluru's Central Business District. Built around the philosophy "For the Runners, By the Runners," DBHM promotes fitness, community and social impact. Its "One Runner, One Tree" initiative encourages environmental responsibility. Indian cricketer Shreyanka Patil will be the face of DBHM 2026. Registrations are currently open.

NEW YORK

Novak Djokovic suffered his earliest Grand Slam exit in more than two decades after the 39-year-old Serb was knocked out in the first round of the US Open by unseeded Argentine Mariano Navone on Sunday.

Djokovic, who arrived at Flushing Meadows targeting a fifth US Open title and a record 25th Grand Slam crown, lost 7-6(5), 5-7, 4-6, 6-2, 6-1 in a stunning five-set contest at Arthur Ashe Stadium.

The defeat marked Djokovic's first opening-round loss at a Grand Slam since the 2006 Australian Open. His hopes were further hampered by shoulder and back problems, while he also

vomited during the match as his physical struggles intensified.

"I pretty much despised every moment I spent on the court for that," Djokovic told reporters after the defeat.

The result sent shockwaves through the year's final Grand Slam, particularly with world number one Jannik Sinner absent and defending champion Carlos Alcaraz returning after a lengthy injury layoff. Djokovic had appeared to have a major opportunity to challenge for another historic title.

Navone, ranked 49th in the world, recovered from a nervous start to produce the biggest victory of his career. He admitted being overwhelmed by facing his idol but remained composed as Djokovic's condition deteriorated.

DJOKOVIC'S SHOCK EXIT

Djokovic Suffers Shock US Open Exit

"I was 0-3 down, feeling a bit nervous out of respect for the star I was up against," Navone said. Former champion Daniil Medvedev, meanwhile, avoided an upset and advanced comfortably with a 6-4, 6-2, 6-4 victory over French qualifier Hugo Gaston. Medvedev, who suffered a chaotic first-round defeat last year, said he was pleased to produce high-level tennis after difficult weeks.

It's tough to play against Novak, he's an idol. You don't get many chances to play an idol on a stage like this. Mariano Navone

I pretty much despised every moment I spent on the court for that. Novak Djokovic
