Ram Temple gets top commander as CEO

From leading the Indian Air Force's Western Air Command during Op Sindoor to being the first CEO of Ram Temple, Air Marshal (Retd.) Mishra prepares for a completely different role after over 38 years of service.

The appointment came amid a raging controversy over the alleged embezzlement of temple donations that led to the arrest of eight people.

AYODHYA

The Shri Ram Janmabhoomi Teerth Kshetra Trust on Wednesday named Air Marshal (retd.) Jeetendra Mishra, who played a key role in commanding air operations during Operation Sindoor, as its first chief executive officer (CEO), from a shortlist of three candidates picked from 5,585 applications by a high-powered committee.

The decision was taken unanimously during a Trust meeting in Ayodhya. The decorated former Indian Air Force commander retired in April 2026 and will now oversee the temple Trust's expanding administrative responsibilities.

He was among the senior military commanders recognised for leadership during Operation Sindoor. President Droupadi Murmu conferred the Sarvottam Yudh Seva Medal on him in recognition of his distinguished service during the operation. The medal is awarded for the highest order of distinguished service during war, conflict or hostilities. It remains one of India's rarest military decorations.

Mishra's appointment brings to the Trust a senior leader with extensive experience in

WHO IS JEETENDRA MISHRA?

A fighter pilot with nearly 4 decades of service

Mishra was commissioned into the fighter stream of the Indian Air Force on December 6, 1986, as part of the 138 Course. Over a career of more than 38 years, he accumulated over 3,000 hours of flying experience on various aircraft. His professional education and training included the National Defence Academy, Air Force Test Pilots School, the Air Command and Staff College in the United States and the Royal College of Defence Studies in the United Kingdom. He also qualified as a Fighter Combat Leader and experimental test pilot.

Role in Kargil War and test flying

Mishra's operational record includes the Kargil War, when he served as a Squadron Leader and was involved in the operationalisation of laser-guided bombs on Mirage 2000 aircraft during Operation Safed Sagar.

operational planning, coordination, logistics and managing large formations.

Mishra has roots in Uttar Pradesh. He originally belongs to Bhopatpura in Deoria dis-

trict, around three hours by road from Ayodhya. He comes from a middle-class family and his father was a lecturer.

He served in the Indian Air Force for nearly 40 years be-

fore retiring on April 30, 2026 as Air Officer Commanding-in-Chief, West Air Command. Earlier, he served as the Deputy Chief of Integrated Defence Staff (Operations).

CEO selection process at a glance

5,585: Total applications received for the CEO post

1,580: Applications found eligible and suitable after scrutiny

108: Applicants shortlisted for online interactive session

16: Finalists called for face-to-face interactions in Ayodhya

3: Candidates recommended by search committee for CEO post.

75 pages: Length of the committee's final report

Selected retired Air Marshal Jeetendra Mishra as CEO.

The appointments came amid a raging controversy over the alleged embezzlement of temple donations that led to the arrest of eight people and the resignation of Champat Rai as general secretary in June.

The CEO will serve as the highest executive authority responsible for the officers, functionaries, employees, and staff of the organization.

3 new trustees

Besides, the Trust named Mahesh Bhagchandka from Delhi, former additional advocate general Madan Mohan Pandey from Ayodhya and Nirmala Yadav from Shikohabad as new trustees.

'Not charity': Nepal wants India, China, US to pay up for floods

PM Balendra 'Balen' Shah may raise the issue at the UN General Assembly.

KATHMANDU

Nepal is seeking "climate-related compensation" from the US, India, and China -- which the Himalayan nation named as the major greenhouse emitters -- for deadly flash floods in the Bhotkoshi River that swept away villages across at least three districts in the country a week ago.

Launching a diplomatic pitch to seek international monetary assistance, Nepal Foreign Minister Shisir Khanal asserted that post-disaster aid should be treated as a matter of "moral liability," "not charity."

He pointed out that despite contributing "virtually negligible" greenhouse gas emissions, Nepal is bearing the disproportionate consequences of global warming, including rapid glacier melt and extreme mountain disasters.

"We are paying the ultimate price for a global crisis we did not create. The rapid melting of glaciers and these catastrophic mountain tsunamis are direct consequences of global climate change," he added.

Nepal floods: Death toll rises to 1,127, over 4,800 still missing

Kathmandu: The death toll from the devastating flash floods that struck Nepal last week has climbed to 1,127, with search and rescue teams continuing to look for 4,858 people still missing, police said on Wednesday. The latest toll includes 348 bodies recovered from Chitwan, 217 from Nawalparasi East, 190 from Nawalparasi West and 155 from Nuwakot. Another 66 bodies were recovered in Gorkha, 59 in Dhading, 45 in Rasuwa and 38 in Tanahu. Of the 1,127 bodies recovered so far, postmortem and legal identification procedures have been completed for 1,113. Authorities have handed over 95 bodies to their families. To help locate missing relatives, the Nepal Police has uploaded details of 911 unidentified bodies on its website for identification.

FIR against RaGa: Cong hits Bengaluru streets

BENGALURU

Karnataka Congress on Wednesday staged a protest at Freedom Park here, condemning the FIR registered against Leader of Opposition in the Lok Sabha Rahul Gandhi over his remarks on an alleged purification ritual held at the venue in Uttarakhand where AICC chief Mallikarjun Kharge addressed a rally.

The protest, held under the leadership of KPCC chief B K Hariprasad, was attended by Chief Minister DK Shivakumar, senior Congress leader and former CM Siddaramaiah, along with other leaders and party office-bearers.

Addressing the gathering, Hariprasad said that Gandhi questioned the alleged "purification" ritual carried out at the venue where Kharge had addressed a public meeting.

"The act of purification was an insult to Kharge and the Dalit community. Gandhi raised the issue and demanded action under the SC/ST Act, but an FIR was filed against him instead. We will not remain silent over this. We have a tradition of fighting through

Rahul Gandhi has right to raise voice for Dalits: DKS

Chief Minister Shivakumar defended Rahul Gandhi over the FIR registered against him for his remarks on the alleged "purification" ritual after Mallikarjun Kharge's Haldwani rally, saying that as Leader of the Opposition, he has every right to raise his voice for Dalits. "This is a great democratic country...Rahul Gandhi has been pressurising that what has been done wrong has to be rectified through an FIR. Since he is raising his voice for the Dalits of this country, and the BJP is filing an FIR against him...as the LoP, he has every right to speak and every right to raise his voice, stand by all sections of society..."

truth and non-violence," he said. Gandhi had been targeted with an FIR in an attempt to silence his voice, he added.

'Sita's character greater than Rama's' DKS bats for women's leadership

'Women are creators, and those of you who have built enterprises by overcoming challenges are also role models'.

BENGALURU

Hailing women for their strength and sacrifices, Karnataka Chief Minister D K Shivakumar said that Sita's character in the Ramayana was greater than Rama's. Shivakumar also urged women entrepreneurs to take up leadership roles in the state's growth.

He was speaking after inaugurating the fifth edition of 'Together We Grow - International Women Entrepreneurship Day', organised by Ubuntu Consortium of Women Entrepreneurs Association here.

He urged women entrepreneurs to take a leadership role in the state's development. He said, "Women are creators. They should lead all the way to Parliament. The government will extend full support."

Women leadership needed from GPs to Parliament

Shivakumar said women's leadership is essential at every level, from gram panchayats to

Parliament. He said the state government is committed to empowering women.

He said, "When women's creativity, ability and determination get access to capital, technology and markets, there is no limit to what they can create. It is the government's responsibility to create an environment where their potential can grow."

Sonia Gandhi, women from Mahabharata as examples

He described women as the "eyes" of the family in Indian culture. He praised women entrepreneurs for overcoming financial challenges while running their businesses and assured them of the government's full support.

Citing Congress leader Sonia Gandhi as an example, he

K'taka govt has no women ministers!

The Karnataka government has 33 ministers, including the Chief Minister and Deputy Chief Minister. However, not a single woman is part of the state Cabinet. On August 3, 2026, DK Shivakumar inducted 20 new ministers, but no woman was included in the Cabinet expansion either.

said she faced the loss of her mother-in-law, former PM Indira Gandhi, and her husband, former Prime Minister Rajiv Gandhi. Despite these setbacks, she stepped forward and led the party.

BRICS SUMMIT 2026

UN chief to join Modi-Putin-Xi in Delhi this month

NEW DELHI

UN Secretary-General Antonio Guterres will take part in the 18th BRICS Summit in New Delhi later this month. India, which holds the BRICS chair this year, will host the summit at Bharat Mandapam on September 12 and 13.

Guterres' participation was indicated by his spokesman, Stephane Dujarric, at a press briefing on Tuesday. He said, "... we have yet to officially announce that the secretary-general will participate in the BRICS meeting in New Delhi in about 10 days' time." He was replying to a question on possible meetings between Guterres and Prime Minister Narendra Modi, Chinese leader Xi Jinping and Russian President

Vladimir Putin during the Shanghai Cooperation Organisation Summit in Kyrgyzstan on August 31 and September 1.

According to the Ministry of External Affairs, the BRICS summit will bring together leaders of BRICS member and partner countries, along with outreach invitees. The theme of India's BRICS chairship is 'Building for Resilience, Innovation, Cooperation and Sustainability'.

The MEA said more than 350 meetings and high-level engagements have been held in over 25 cities across India to strengthen the BRICS strategic partnership across three pillars: political and security, economic and financial, and cultural and people-to-people

exchanges. It said these engagements, along with business-to-business and people-to-people initiatives, have contributed to advancing BRICS cooperation through practical and development-oriented outcomes.

India, a founding member of BRICS, previously held the chairship in 2012, 2016 and 2021. It assumed its fourth BRICS chairship on January 1, 2026. BRICS is also celebrating its 20th anniversary this year.

Guterres, whose second five-year term as UN chief ends in December 2026, had visited India in February to attend the India-AI Impact Summit 2026 in New Delhi. The event was the first global AI summit to be hosted in the Global South.

SUMMIT DETAILS	
Dates	September 12-13, 2026.
Location	Bharat Mandapam, New Delhi.
Theme	'Building for Resilience, Innovation, Cooperation and Sustainability.'

ATTENDEES AND CONTEXT

Leaders: Indian Prime Minister Narendra Modi, Russian President Vladimir Putin, and Chinese President Xi Jinping are slated to gather under one roof following recent engagements at the Shanghai Cooperation Organisation (SCO) Summit in Bishkek.

UN participation: UN chief António Guterres is expected to participate, continuing diplomatic talks following his recent discussions on regional conflicts and global governance.

Milestone: The 2026 event marks both the 20th anniversary of the BRICS grouping and India's fourth chairship of the bloc.

Bus crash in Egypt's South Sinai kills 21

SOUTH SINAI: A bus crash in Egypt's South Sinai governorate has killed 21 people and hurt 20 others, the government sources said.

The incident happened on Wednesday morning on the road from Dahab to Nuweiba on the eastern coast of the Sinai Peninsula, an area with resorts along the Red Sea popular with tourists. A number of Jordanians were on the bus and initial information indicated several were killed and injured. Jordan's foreign ministry said. Deadly road accidents are common in Egypt. Last year, nearly 6,000 people died in road accidents across the country, according to Egypt's state statistics agency. Last month, 18 people were killed and 30 injured in a road accident in the northeastern governorate of Ismailia.

FROM CLASSROOM TO CABINET

Rizwan Arshad walks down memory lane at St. Philomena's

MYSURU

The classrooms of St. Philomena's College (Autonomous), Mysuru, resonated with memories, aspirations and lessons in leadership as distinguished alumnus and Minister for Food, Civil Supplies and Consumer Affairs, Rizwan Arshad, returned to his alma mater to share his journey from a B.Com student to a minister in the State Cabinet.

Nearly 300 B.Com students took part in the inspiring alumni interaction, titled "From Classroom to Cabinet: A Conversation with Our Alumnus."

The programme offered students a glimpse into the academic, professional and public-life journey of their former fellow student, while underlining the role of education in shaping responsible citizens and leaders.

Revisiting his college days, Rizwan Arshad shared experiences from his academic journey and professional life, speaking about the challenges, opportunities and perseverance that paved his way into public service. His interaction struck a chord with the students, reminding them that success is often built on knowledge, commitment, determination and a willingness to serve society.

The programme was presided over by Rev. Dr. Lourdu Prasad Joseph, Rector, St. Philomena's Educational Institutions. Principal Dr. Ravi J. D. Saldanha, Finance Officer Rev. Fr. Roshan S., and PU College Principal Sunil

D'Souza were present.

The occasion acquired a nostalgic touch when three retired professors who had taught the Minister recalled their association with their former student. Prof. S. Srinivasa Setty, Retired Professor of Commerce; Dr. A. John Siluvai, Retired Professor of English; and Prof. Jacob Chandy, Retired Professor of English, felicitated Rizwan Arshad and shared fond memories of his college years, tracing his growth from a student on the campus to a public figure.

The presence of senior and retired faculty members added further warmth to the homecoming. Prof. C. V. Sreedharamurthy (Kannada), Prof. M. Raphael (Sociology), Christopher (Physical Director), Prof. H. Anantha Sharma (Hindi), and Prof. R. Britto Dominic Rayan, Retired Professor of Chemistry, joined the occasion.

The programme reflected the enduring bond between an institution and its alumni—a bond that transcends classrooms, careers and decades.

The event was meticulously coordinated by A. Thomas Gunaseelan, IQAC Coordinator, while Dr. Deepa V., IQAC Co-Coordinator and Master of Ceremonies, anchored the proceedings with professionalism.

For the students, it was more than an alumni interaction—it was an inspiring reminder that the journey from the classroom to the corridors of public service can begin with a dream, determination and the right education.

Expand 'Swasthya' doorstep healthcare scheme Across Mysuru: GTD

MYSURU

Former Minister and Chamundeshwari Assembly MLA G.T. Devegowda urged the authorities to expand the "Swasthya" healthcare initiative across Mysuru city and the entire Mysuru taluk, so that more people can benefit from doorstep health services.

Speaking after launching 'Swasthya Ramakrishnanagar Yojana – Suyog Hospital at Your Doorstep', organised by Suyog Hospital in association with the G and H Block, Arogya Nagar and Surabhi Mahila Samaja here, he appreciated the initiative and said it was a welcome development that doctors, nurses and other healthcare personnel would visit homes and conduct health check-ups, thereby contributing towards building a healthier society. The programme should be extended to the entire city and Mysuru taluk, enabling people to access timely healthcare and preventive medical services.

"Today, many people are suffering from heart disease and several other health problems. Timely detection and treatment can prevent loss of life," he said.

Devegowda appreciated Suyog Hospital founder Dr. S.P. Yogananna for coming forward to provide treatment to people at affordable rates.

The MLA said Suyog Hospital had introduced a special initiative called 'Hrudayakke Hrudayavanta Package' (Heart-Friendly Package) for cardiac care. He promised to invite the Health Minister for its

launch and work towards making similar affordable healthcare facilities available across the State.

Presiding over the programme, Dr. S.P. Yogananna said diabetes must be detected early and brought under control. If left unmanaged, it could lead to heart disease, stroke and other serious health complications. People who enrolled in the hospital's healthcare schemes and obtained health cards could avail themselves of treatment at highly affordable rates.

Senior journalist Amshi Prasannakumar, Residents' Welfare Association president Prof. Nagarajamurthy, former president M.D. Kini, and Surabhi Mahila Samaja president Shashi Sampath were among the chief guests.

Asha rendered the prayer, while Residents' Association secretary R. Nataraj welcomed the gathering. Vaidyanathan compered the programme. Social worker M. Ravi, former corporator Dinesh, Suyog Hospital General Manager P.J. Arun Kumar, Naidu and others were present.

NO ENTRY FEES TO LINGAMBUDI PARK: GTD

The entry fee proposed by the Forest Department for people visiting Linganabudhi Lake for morning and evening walks has been permanently scrapped, said G.T. Devegowda. He said he had brought the matter to the notice of Forest Minister M. Ramalinga Reddy, who recently visited Mysuru and ensured that the proposed fee was withdrawn immediately. Devegowda also said repair works had been completed on the Dakshineshwara route, while the road beyond Shirdi Sai Baba Circle needed attention. Contractors were reluctant to take up road works owing to the increase in the price

of asphalt, he said. "I have instructed officials to blacklist contractors who fail to execute the works and ensure that the roads are asphalted at the earliest," he said. M.D. Kini said residents had brought the proposed entry fee at Linganabudhi Lake to the MLA's notice, and Devegowda had acted even before the residents' association could submit a formal memorandum. "On behalf of all walkers and residents, we thank the MLA for his prompt intervention," Kini said. The residents' association also felicitated Devegowda on the occasion.

Free mock test held for candidates appearing for armed reserve cops

MYSURU

A free mock test was held for candidates appearing for the Karnataka State Police Recruitment Committee's written examination for the recruitment of 1,421 Armed Reserve Police Constable (CAR/DAR) posts across the State on September 6.

The mock test was organised at the City Central Library at People's Park in collaboration with the Jnana Gangotri Competitive Examination Centre, Bengaluru, for the benefit of the candidates appearing for the recruitment examination. More than 60 job aspirants attended the mock test.

Speaking as the chief guest, Siddanagowda Y. Patil, Deputy Commissioner of Police, City Armed Reserve Force, Mysuru said that candidates could succeed in any competitive examination by cultivating discipline, hard work and honesty. The competitive examinations have become increasingly transparent in recent times and merit alone is the criterion for selection of candidates. "There is no shortcut to success in any competitive examination. Self-confidence, talent and hard work are essential for success",

Patil said the increasing number of candidates from rural areas being selected for government jobs was a welcome development. Youngsters must develop the habit of appearing for various competitive examinations. This would not only give them valuable experience in facing examinations but also help them identify the departments and fields in which they had the aptitude and interest. The youths must not to focus exclusively on careers in medicine and engineering. Several other fields, too, offer good career opportunities and a fulfilling life. "If everyone becomes a doctor or an engineer, who will take up other professions?" he asked, stressing that once a person enters a profession, he or she should work with commitment and strive to bring dignity and justice to that profession.

City Central Library Deputy Director B. Manjunath said that the selection examination for KSRP Constable posts would be held this month and two more mock tests would be conducted in the coming days to help aspirants prepare for it. Similar training programmes and mock tests would also be organised for the KAS and other competitive examinations.

Manjunath appreciated the support and guidance extended by Ramesh Narasaiah, retired Deputy Commissioner, Commercial Taxes Department, Mysuru, who is also a member of the Mysuru City Library Authority, in conducting the training programmes and mock examinations.

Assistant Commissioner of Police Chandrashekar and Police Inspector Anand were present at the programme.

“Shedding the light of knowledge through Karnataka’s ancient heritage”

MYSURU

A. Devaraju, Commissioner, Department of Archaeology, Museums and Heritage, Mysuru, said knowledge shapes personality and reflects a person's conduct and character. Therefore, it is not enough to set a goal; one must also make sincere efforts to achieve it but also continuous learning required the support of those who facilitate learning.

He was speaking after inaugurating a one-day State-level seminar on "Ancient Cultural and Educational Centres of Karnataka", organised by the Department of History and IQAC of Vidyaavardhaka First Grade College, Mysuru, in association with the Department of Archaeology, Museums and Heritage, Government of Karnataka.

Devaraju said the primary objective of the department was to ensure that its work and information reached the public. If they want to build their future, they must constantly enhance their knowledge. Only then can they shape the future according to their aspirations. Knowledge cannot be acquired without effort.

The commissioner said a student's life should begin with learning and life would become increasingly challenging as competition among future generations intensified. Hence, students should make the best use of every opportunity available to them for learning. Karnataka has around 844 ancient monuments, making it the State with the highest number of such monuments in the country. These include centrally protected, State-protected and unprotected monuments. In addition, the State

has more than one lakh archaeological remains, including inscriptions, sculptures and historical sites.

Through the use of science and technology, around 545 monuments have been digitised, while digitisation of another 300 monuments was still pending. "Protecting these monuments is their responsibility. It is not enough to merely share information; they must also actively participate in preserving their heritage."

Chief guest Dr. Manjula C.N., Deputy Director, Department of Archaeology, Museums and Heritage, said society must take responsibility for preserving and promoting tangible, intangible and natural heritage.

College Principal Dr. S. Marigowda, explained the significance and usefulness of the seminar, and said the college had been organising such academic programmes for decades in collaboration with the Archaeology Department. The department's efforts to familiarise the younger generation with history and heritage were commendable, he added.

Presiding over the inaugural session, institution's Honorary Secretary P. Vishwanath said India once possessed such a glorious heritage and rich history that researchers and historians from different countries travelled to its ancient universities to study history and archaeology. However,

over time, Indians themselves had reached a situation where they travelled abroad in search of education.

He hoped that the seminar, organised on subjects relevant to arts students, would serve as a valuable platform for academic exchange and knowledge sharing.

The programme began with a prayer by Dhatri, followed by the welcome address by seminar secretary Savitha K.S. Honorary Treasurer Srisailaramannavar, College Management Committee President Dr. Tejas Babu K.C., Convener Dr. Sriharsha B.S., faculty representatives, research scholars, teaching and non-teaching staff and students participated in the programme.

The event was compered by Yamuna M.J. of the Department of History, while co-convener Madeshgowda T.M. proposed the vote of thanks.

The seminar featured two technical sessions. The first, on "Ancient Cultural Centres of Karnataka," was led by Prof. Shelvapille Iyengar, Head of the Department of Ancient History and Archaeology Studies and Research, Karnataka State Open University, as the resource person.

The second session focused on "Ancient Educational Centres of Karnataka," with Dr. Jayasimha, senior researcher at The Mythic Society, Bengaluru, serving as the resource person.

BID A ROYAL FAREWELL TO ABHIMANYU IN MYSURU

Retain Bhima in Dasara jumbo squad

MYSURU

Social activist Vikram Iyengar has urged the authorities concerned to organise a grand and emotional farewell in Mysuru for Captain Abhimanyu, the iconic elephant who carried the famed Ambari during the world-renowned Mysuru Dasara celebrations for several years and won the admiration and affection of people across the State.

A towering symbol of the Dasara elephant squad, Abhimanyu captured millions of hearts with his majestic presence, calm temperament and unwavering sense of duty. Giving the veteran elephant a dignified farewell in Mysuru would be a fitting expression of the city's gratitude towards an animal that has played a cherished role in one of Karnataka's most celebrated cultural traditions, Iyengar said.

He emphasised that Abhimanyu's association

with Mysuru Dasara went far beyond his role as an elephant in the procession. Over the years, he became a familiar and beloved figure among visitors and residents, embodying the grandeur, discipline and tradition associated with the historic Jamboo Savari.

At the same time, Iyengar has called upon the authorities to retain Bheema in the Dasara elephant squad for future celebrations.

Bhima has emerged as another popular and majestic member of the Dasara Gajapade, earning admiration for his imposing presence, discipline and ability to draw crowds. Considering his popularity and contribution to the festival, the Forest Department and Dasara authorities should take an appropriate decision to continue his participation in future Dasara celebrations, he urged.

"Mysuru Dasara is not merely a festival; it is a

magnificent symbol of Karnataka's culture, heritage and traditions. The elephants that form an inseparable part of the Dasara procession deserve the highest respect and care," Iyengar said.

He appealed to the authorities to ensure that Abhimanyu receives a memorable and dignified send-off in Mysuru, the city where he earned a special place in the hearts of generations of Dasara enthusiasts.

At the same time, retaining Bheema in the annual elephant contingent would help preserve the continuity and grandeur of the Dasara tradition, he added.

Through the media, Iyengar urged the Forest Department and the Dasara administration to consider the sentiments of Mysuru residents and thousands of Dasara admirers while taking decisions concerning the future of the two celebrated elephants.

Sports boost mental, physical and emotional health

MYSURU

Sports play a vital role in enhancing mental, physical and emotional strength and contribute to a joyful and healthy life, said Dr. H.V. Uday Kumar, Principal and Director of Physical Education at Government First Grade College, T. Narasipura.

Speaking at the National Sports Day celebrations organised by the Department of Physical Education at Maharani's Women's Arts College here to commemorate the birth anniversary of legendary hockey player Major Dhyhan Chand. The programme began with floral tributes being offered to the portrait of Dhyhan Chand, he said sports not only improve

physical fitness but also strengthen mental and emotional well-being. Participation in sports was essential for maintaining enthusiasm and a positive outlook towards life.

Recalling the contribution of Major Dhyhan Chand, he said Dhyhan Chand pursued his career in the armed forces while making hockey an integral part of his life. His dedication, hard work and patriotism played a significant role in India's remarkable achievements, including winning gold medals at the Olympic Games, he said.

Uday Kumar called upon youngsters to devote at least one hour every day to some form of physical activity. Regular participation in

sports and physical exercise would help improve fitness, promote individual and social well-being and enable young people to contribute more effectively to the development of the nation, he said.

Presiding over the programme, college Principal Dr. M.S. Anita said Major Dhyhan Chand was an inspiration to sportspersons across the country. His discipline, patriotism and commitment to punctuality were qualities that the younger generation should imbibe, she said.

"By promoting sports and adopting the values demonstrated by Dhyhan Chand, it is possible to build a healthier and more vibrant society," Dr Anita added.

FREE COACHING FOR SCHOOL TEACHER JOB EXAMS

MYSURU

The Jnanabuthi organisation, Mysuru, will provide a free coaching for competitive examinations conducted by the state Government's Department of School Education and Literacy for the recruitment of teachers to various vacant posts in government primary and high schools.

The coaching will be provided by subject experts from the Department of School Education and special resource persons, according to a press release issued by H. Balakrishna, Secretary, Jnanabuthi.

Interested candidates can register their names at the Jnanabuthi organisation located on the premises of the Government High School and Pre-University College, Lakshimpuram, Mysuru, on or before September 5, 2026.

Registration will be open between 5.30 p.m. and 7.30 p.m. Candidates interested in availing themselves of the free coaching programme have been urged to make use of the opportunity. For further details, interested candidates may contact the coordinators C.K. Kiran Kaushik (9972830857), K.Y. Nagendra (8296788251) and Likhithraj (9538641583). For registration-related queries, candidates may also contact H. Balakrishna, Secretary, Jnanabuthi, at 9448117455.

Five crore people to come under ration distribution network soon: Rizwan

MYSURU

Food, Civil Supplies and Consumer Affairs Minister Rizwan Arshad said on Wednesday

said nearly 4.5 crore people in Karnataka were currently covered under the ration distribution system and the number was expected to cross five crore in the coming days.

In a media interaction at Mysuru District Journalists Association here, he said while ensuring that eligible families who were yet to receive ration cards would be brought into the system, the department would simultaneously identify ineligible beneficiaries. At the same time, strict action would be taken to prevent subsidised rice and other foodgrains from entering the black market. Around 4.5 lakh ration cards had been cancelled earlier on the grounds that members of the families were income-tax payers. However, he had directed officials not to indiscriminately cancel ration

ACTIONS MUST MATCH WORDS'

■ Reacting to RSS chief Mohan Bhagwat's recent statement that Muslims are "our brothers", the minister said the statement had attracted attention at the international level.

■ Welcoming Bhagwat's reference to Muslims as brothers but said there should not be a contradiction between words and actions. "If the RSS leadership genuinely believes that Muslims are our brothers, then BJP and RSS leaders who make openly anti-Muslim statements should be disciplined and removed from the organisation. Only then can we accept that their words reflect their genuine stand. Several BJP and RSS leaders continue to make statements against Muslims despite Bhagwat's remarks".

cards. "Just because one member of a family pays income tax, it is not appropriate to cancel the ration cards of all members. We will intro-

duce suitable criteria and review the process," he said.

Software glitches
The minister said Software

LEGAL TERRORISM

Food and Civil Supplies Minister Rizwan Arshad has described the FIR registered against Lok Sabha Leader of Opposition Rahul Gandhi as an act of "legal terrorism" by the BJP. He condemned the filing of the FIR against Gandhi for questioning the lack of action against those who allegedly carried out a purification ritual at a place in Uttarakhand where AICC president Mallikarjun Kharge had participated in an event. It was condemnable that instead of taking action against those responsible for the alleged act of untouchability, an FIR had been registered against Rahul Gandhi for questioning the incident. "The FIR sends a message that it is acceptable to carry out such acts of purification, but those who question them will face action by BJP governments. This is nothing but legal terrorism. Rahul Gandhi would not be intimidated by FIRs or legal cases".

glitches and server overload are primarily responsible for the recurring biometric failures at fair price shops due to

which beneficiaries were facing genuine difficulties while authenticating their identities to collect ration. The problem had intensified when two months' ration was distributed together. The biometric system came under tremendous pressure as authentication had to be carried out twice, resulting in frequent server failures. The issue is genuine and we are aware of the difficulties faced by beneficiaries. The servers will be upgraded to handle the increased load.

No resentment

Responding to a question about his meeting with a miffed senior Congress leader and MLA Tanveer Sait, Arshad said Sait was an experienced leader who had served as a Minister twice and had done good work. "Tanveer Sait has accepted the high command's decision and is working for the party. He is not acting against the party and has no resentment over not being given a ministerial berth".

Minister Rizwan Arshad vows to bring major changes in the coming days

MYSURU

Food, Civil Supplies and Consumer Affairs Minister Rizwan Arshad said the department would undergo major changes in the coming days to make delivery of essential commodities more efficient and transparent.

Chairing a review meeting of the department here on Wednesday, he directed officials to ensure GPS tracking of every vehicle transporting ration foodgrains. Of the 371 vehicles operating across Mysuru division's eight districts, GPS devices had been installed in 176 vehicles, while 195 were still pending. Officials were ordered to equip all remaining vehicles with GPS within 15 days and submit a compliance report.

CCTV cameras would also be installed in warehouses to strengthen surveillance and plug loopholes in the supply chain.

Crackdown on sugar hoarding

Expressing concern over the sudden rise in sugar prices, the minister directed officials to inspect establishments suspected of illegal stockpiling of sugar and initiate legal action against violators.

He also ordered action against establishments storing LPG cylinders beyond the prescribed limits.

Reviewing the Legal Me-

trology Department, the Minister called for intensified inspections and raids against traders who cheat consumers by manipulating weights and measurements.

88,424 yet to complete e-KYC

As many as 88,424 beneficiaries across Mysuru division had not completed e-KYC. Officials were instructed to verify cases involving migration, death, marriage or relocation, record the findings and send the details to headquarters for further action.

Arshad said the income earned by fair price shop operators was currently inadequate. The government was examining alternative mechanisms to improve their earnings.

"Fair price shops should not become a side business. We need to ensure that those running them can earn a sustainable income," he said.

Recruitment soon

Acknowledging the shortage of personnel in the Food and Civil Supplies Department, Arshad said steps would be taken to fill vacant posts. The department had a crucial responsibility towards poor and needy families and urged officials to ensure prompt, transparent and efficient delivery of services. Regular performance reports would be sought and reviewed every week.

Jana Spandana Trust to host 16th Job Fair on September 5

MYSURU

The Jana Spandana Trust, a Mysuru-based service organisation, will organise its 16th job fair on September 5, aimed at connecting unemployed youth and women with prospective employers and creating new employment opportunities.

The Trust has successfully conducted 15 job fairs over the past nine years, helping thousands of unemployed youth and women secure jobs. The organisation has been conducting the initiative continuously as a service-oriented programme without

any expectation of returns.

The upcoming job fair will be held from 9 a.m. to 5 p.m. on September 5 at the Chikkamma Niketan Community Hall on Udayaravi Road, Kuvempunagar, Mysuru. The event will be inaugurated by Mysuru District In-charge Minister and Urban Development Minister Yathindra Siddaramaiah. The organisers said the job fair is intended to bridge the gap between job seekers who are struggling to find suitable opportunities and companies looking for skilled and talented manpower.

Around 80 companies from Mysuru and Bengaluru, including several IT firms, are expected to participate in the fair and offer employment opportunities. Job opportunities will be available for candidates with qualifications ranging from SSLC, PUC, ITI, Diploma and computer training to graduation and engineering degrees.

The organisers said more than 8,000 unemployed people are expected to benefit from the initiative, with companies offering around 58 categories of job opportunities across various sectors.

A separate counter will

also be set up at the job fair to facilitate interaction between representatives of industries in Mysuru and prospective candidates. Industry heads will be able to identify and select suitable candidates according to their manpower requirements.

To make the process easier for young job seekers, a job portal will also be launched during the programme. Unemployed candidates can register in advance and submit their bio-data through a Google Form.

The organisers clarified that no registration fee or any other charge will be collected

from candidates participating in the job fair. The initiative is being conducted entirely free of cost as part of the Trust's service activities.

Candidates have been advised to carry their bio-data/resume and necessary educational and other supporting documents while attending the fair.

The Jana Spandana Seva Trust has appealed to unemployed youth, women and job seekers from Mysuru and surrounding areas to participate in large numbers and make use of the employment opportunities being offered through the fair.

Dr Parameshwar inspects drought-hit agriculture land in Nanjangud tq

MYSURU

Deputy Chief Minister Dr. G. Parameshwara, who is on a visit to Mysuru district to assess the prevailing drought situation, on Wednesday visited Gattavadi village in Nanjangud taluk and inspected farms affected by crop failure due to inadequate rainfall.

On the second day of his tour, Dr. Parameshwara visited the agricultural fields of farmers Shivabasappa and Mahadevappa, where maize and sunflower crops had withered and been destroyed due to the prolonged rain deficit.

The distressed farmers told the Deputy Chief Minister that they had borrowed money to cultivate their crops and were now facing severe financial difficulties

following the crop loss. They appealed to the government to extend immediate assistance.

Responding to their concerns, Dr. Parameshwara sought detailed information from officials present at the spot regarding the drought situation in Nanjangud taluk and the extent of crop damage.

Officials informed him that farmers in the taluk normally cultivate alsandha (cowpea) on around 4,500 hectares, black gram on 4,200 hectares, green gram on 3,500 hectares, maize on 3,400 hectares and cotton on around 8,000 hectares annually.

However, owing to the deficient rainfall this year, sowing had been undertaken on only around 3,500 hectares. Even the crops that

were sown have suffered extensive damage due to the severe dry conditions.

After gathering details from both the affected farmers and officials about the ground situation, Dr. Parameshwara assured the farmers that the government would take necessary steps to provide relief at the earliest.

The Deputy Chief Minister also listened to the grievances of farmers who had taken loans to cultivate their crops and are now struggling due to crop losses, and assured them that their concerns would be addressed.

Nanjangud MLA Darshan Dhruvanarayan, Mysuru Deputy Commissioner Lakshmikanth Reddy, Zilla Panchayat CEO Yukesh Kumar, Nanjangud Tahsildar, agriculture officials and other officials were present.

INDUCTION PROGRAMME FOR STUDENTS HELD

MYSURU

ATME College of Engineering, Mysuru, organised an Orientation programme for the students admitted to various Engineering and BCA programmes for the academic year 2026-27.

The programme was inaugurated by Dr. P. Nagabhushan, former Director of IIIT Allahabad and former Vice-Chancellor of VFSTR University Andhra Pradesh, along with Mr. L. Arun Kumar, Chairman of the of ATME College of Engineering, and other dignitaries by lighting the traditional lamp.

In his inaugural address, Dr. P. Nagabhushan emphasised the importance of inculcating culture, values and good character in children from an early age. He said that parents should not

consider education institutions solely responsible for imparting values to their children, as parents have a fundamental role in shaping their children's character and personality. Students must remain grateful and respectful towards their parents, who make significant sacrifices for their upbringing, and towards teachers who guide them and provide the knowledge and education necessary for their future. He urged students to make the best use of their valuable time, work hard in their studies and bring pride to their parents and the institution.

L. Arun Kumar, Chairman of ATMR Governing Council, advised students not to feel discouraged if they did not get their preferred branch or college,

and said that there are excellent career opportunities in all branches of Engineering and encouraged students to make the most of the facilities and industry-oriented, skill-based education provided at ATME College of Engineering. They should acquire essential employability skills alongside their Engineering education. Hundreds of skill-enhancement courses are available through online NPTEL platforms and advised students to make use of such opportunities under the guidance of faculty members. Developing additional skills would significantly improve their prospects of securing employment in reputed companies.

The programme was attended by Dr. Syed Shaheen - Rahman, former

Principal of SJCE, Mysuru, as the Guest of Honour, along with Mr. K. Shivashankar, Secretary of the ATME Governing Council; Mr. R. Veeresh, Treasurer; Mr. H. Venkatesh, Member of the ATME Governing Council; and Dr. L. Basavaraj, Principal, ATME College of Engineering.

Dr. L. Basavaraj, Principal, welcomed the gathering. The programme was compered by Mr. C. Chandrashekar, Assistant Professor. Dr. K. Srinivasa, Dean, delivered the vote of thanks, while Dr. Chaitra led the prayer.

Dr. Sachidanandamurthy, Administrative Officer; Deans Dr. Nalina and Dr. Bhagya Shree S. R.; Heads of various departments; faculty members; parents; and students were present on the occasion.

DyCM offers prayers at Nanjangud Srikanteshwara Temple

MYSURU

Deputy Chief Minister and Revenue Minister Dr. G. Parameshwara, on the second day of his visit to Mysuru district, visited the historic Srikanteshwara Temple at Nanjangud and offered prayers.

He performed a special puja to Lord Srikanteshwara and prayed for the welfare of the people of Karnataka and for peace and prosperity to prevail across the State. Nanjangud MLA Darshan Dhruvanarayan accompanied the Deputy Chief Minister during the temple visit.

Krishna Janmashtami: Fancy dress contest for kids on Sept 5

MYSURU

The Sri Krishna Mitra Mandali (Regd.) and Sri Krishna Trust (Regd.) will organise a special children's fancy dress competition to mark Sri Krishna Janmashtami. The competition will be held at 1 p.m. on Saturday, September 5, at Sri Krishna Sabhabhavana in Saras-

wathipuram, Mysuru. Children below the age of 10 can participate in the competition dressed as Radha, Krishna and Balarama. The programme will be held in the divine presence of Sri Sri Vidyavallabha Tirtha Sripadangalavaru of Kaniyoor Mutt. Attractive prizes will be awarded to the participating children, the organisers said.

Later in the day, at 4 p.m., a grand Sri Krishna procession and Dahi Utsav will be held through the city's main streets. The organisers have appealed to devotees and members of the public to participate in large numbers and make the celebrations a success. For further details, Raghavendra Rao can be contacted at 99455 11770.

No power supply tomorrow

MYSURU

Several areas under the VV Mohalla Sub-Division will experience a power outage on September 3 from 10 a.m. to 6 p.m. due to underground cable work on the 11 KV Mayura and 11 KV Hoysala power lines. The affected areas include Hebbal 2nd Stage, Mayura Circle, Cauvery Circle, Sankranti Circle, Chennamma Circle, areas surrounding Military Quarters, Sheshadripuram College, Nisarga Layout, KIADB Layout, Chitra Residency, Lakshmikantha Nagar and surrounding localities.

The Executive Engineer of the Chamundeshwari Electricity Supply Corporation (CESC), VV Mohalla Division, has asked residents to take note of the scheduled interruption and make necessary arrangements.

FOREST DEPT INVITES CITIZEN OBJECTIONS

33 trees to be felled at Kukkarahalli Kere junction

MYSURU

The Forest Department has invited objections and suggestions from the public regarding the proposed removal of 33 trees of various species near Kukkarahalli Lake Junction in Mysuru to facilitate the construction of a railway underpass.

The underpass project is being taken up near Level Crossing (LC-1) on the My-

The proposed Rail Over Bridge at Kukkarahalli Kere junction

suru-Chamarajanagar railway line. Following a request from the Assistant Executive Engineer of the National Highways Sub-Division, the Forest Department has called upon environmentalists and members of the public to submit their objections or suggestions regarding the felling of the trees.

Objections and suggestions can be submitted by 6 p.m. on September 16

through email at acfmyspublichearing@gmail.com or by post to the Tree Officer and Assistant Conservator of Forests, Mysuru Sub-Division, Aranya Bhavan, Ashokapuram, Mysuru - 570008.

The department has urged members of the public and environmentalists to participate in the process and submit their views within the stipulated deadline.

Metro's old trains get a midlife makeover

CH NEWS, Bengaluru
BMRL is set to overhaul Namma Metro trains inducted during the first phase, with some having completed 15 years of service and travelled nearly 10 lakh km. Each train will undergo around 15 days of phased inspection and maintenance, including cleaning, minor repairs and replacement of worn components. Braking systems, engines and other critical parts will be checked to improve reliability and passenger safety. The exercise will be staggered to avoid disruption to daily services. The induction of 21 new trains on the Yellow Line by September 2027, along with the transfer of 17 trains to the Purple Line, will provide additional operational flexibility. Namma Metro currently carries around 10 lakh passengers daily, making fleet reliability crucial, particularly during peak hours.

Siddaramaiah condemns FIR against Rahul Gandhi, calls for protests

Siddaramaiah accused BJP of targeting Rahul Gandhi, recalling his earlier legal troubles and subsequent court relief

CH NEWS, BENGALURU

Former Karnataka chief minister Siddaramaiah on Wednesday condemned the FIR against Rahul Gandhi, calling it gross injustice and an attack on constitutional values. Speaking at a protest at Freedom Park in Bengaluru against the FIR registered by Uttarakhand Police against the Leader of Opposition in the Lok Sabha, Siddaramaiah said Rahul Gandhi had committed no wrongdoing and had merely questioned the “purification” of a venue where Congress president Mallikarjun Kharge had delivered a speech. Siddaramaiah said the act of “purifying” the place after Kharge’s speech was unconstitutional and amounted to an affront to the Constitution, which prohibits untouchability. He alleged that registering a case against Rahul Gandhi over questioning the incident was an insult to both Kharge and the Lok Sabha Opposition leader. He questioned why Rahul Gandhi should face a case when he had only raised objections to the alleged incident.

Siddaramaiah's key points

■ Issue: FIR against Rahul Gandhi

■ Venue: Freedom Park, Bengaluru

■ Main allegation: Political action to silence Rahul

■ Constitutional concern: Untouchability

■ Congress demand: Opposition to the FIR

■ Call: Statewide protests

■ Support: Rahul Gandhi

Siddaramaiah said a case should instead be registered against those practising untouchability, alleging that the action against Rahul was politically motivated. The former chief minister accused the BJP and the Centre of attempting to silence Rahul Gandhi. He recalled the earlier legal action against Rahul Gandhi, including the cancellation of his Lok Sabha membership, and said the courts had subsequently pro-

vided relief. Siddaramaiah said Rahul Gandhi stood for the Constitution and opposed untouchability, while accusing the BJP of acting against constitutional principles. He described the FIR as a “grave offence” that could not be tolerated. Calling for protests across Karnataka, Siddaramaiah said the BJP was unfit to remain in power and assured Rahul Gandhi of the Congress party’s support in his political fight.

“Rahul Gandhi has committed no wrongdoing. This is gross injustice and cannot be tolerated.”
- Siddaramaiah, Former CM

Siddaramaiah backs Rahul

Siddaramaiah said Rahul Gandhi had only questioned the alleged purification of a venue where Mallikarjun Kharge had spoken. Calling the practice unconstitutional, he said the Constitution prohibits its untouchability. The former chief minister accused the BJP-led government of politically targeting Rahul and attempting to silence him. He urged Congress workers to organise statewide protests and said the party would stand firmly with Rahul Gandhi and strengthen his fight.

Woman booked after twin daughters found dead in Bengaluru

CH NEWS, BENGALURU

A 40-year-old woman has been booked for allegedly causing the deaths of her four-month-old twin daughters at their home in Vajarahalli, south Bengaluru. The children had been born through IVF treatment in May. According to a complaint filed by the children’s father, Ramalingappa, 50, he and his wife Umadevi had undergone IVF treatment after remaining childless for years. The couple’s twin daughters were born on May 5, 2026. The incident occurred at their residence in B.C.C.H.S. Layout. Ramalingappa reportedly returned home and found a room locked from inside. On opening it, he allegedly found Umadevi attempting to take her own life. The two infants were found unresponsive in the same room. Umadevi was rescued and shifted to a hospital for treatment. Police said preliminary findings suggested that the children had been drowned. Talaghattapura

police registered a murder case under Section 103 of the Bharatiya Nyaya Sanhita based on the father’s complaint. Police suspect that Umadevi drowned the children before attempting suicide, but the exact circumstances and motive are still being investigated. The complaint stated that her behaviour reportedly changed about one-and-a-half months after childbirth. She allegedly became disinterested in caring for the infants and repeatedly suggested sending them to an ashram. Family members subsequently sought psychiatric treatment for her at NIM-HANS and another facility in Raghuvanahalli. They were reportedly told that her behaviour could be associated with postpartum depression and hormonal changes after childbirth. Police are examining her medical history, treatment, the circumstances inside the room and other evidence to establish the sequence of events. Further details are expected as the investigation progresses.

Karnataka seeks CWC technical clearance for Mekedatu project

CH NEWS, BENGALURU/NEW DELHI

“We have urged the CWC to facilitate timely examination and extend the technical cooperation required to take the project forward.”
- N Cheluvarayasu, Water Resources Minister

scrutiny. The meeting assumes significance following a recent site inspection by CWC Member Yogesh Paitankar. Karnataka officials briefed the Commission on ground conditions at the proposed project site and discussed technical aspects emerging from the inspection. The minister stressed Mekedatu’s importance in meeting

Bengaluru’s long-term drinking water needs amid rising demand, rainfall variability and periods of water stress. The proposed reservoir is also expected to support drinking water requirements in neighbouring districts and facilitate hydropower generation. Karnataka maintained that enhanced water storage and regulation could strengthen water management during rainfall-deficit years while enabling regulated downstream releases in accordance with applicable requirements. The state government reiterated its commitment to advancing the project and requested the CWC to complete its ongoing technical examination at the earliest, following established procedures. The delegation included Additional Chief Secretary Gaurav Gupta, Water Resources Department Secretary Krishnamurthy Kulkarni and other officials.

Karnataka clears ₹315 crore hotel projects

CH NEWS, BENGALURU

“Karnataka has immense tourism potential, and expanding quality accommodation and hospitality infrastructure is one of our key priorities.”
- K.J. George, Energy and Tourism Minister

der the Karnataka Tourism Policy 2024–29. These include 35 premium and 43 budget hotels. Once implemented, the 78 projects are expected to attract investments of ₹1,080.97 crore, add 3,424 rooms and generate 3,707 jobs across Karnataka. The government said the projects would improve the availability of quality accommodation at tourism destinations while boosting private investment, local employment

and tourism-led economic activity. George said Karnataka had immense tourism potential and that expanding quality accommodation and hospitality infrastructure remained a key priority. He said the new Tourism Policy was designed to encourage private investment, create employment and strengthen local economies across different parts of the State. Tourism Department Secretary Dr Ram Prasath Manohar

Hotel investment boost
■ Approved projects: 18
■ Investment: ₹314.93 crore
■ Subsidy: ₹47.23 crore
■ New rooms: 655
■ Jobs: 1,542
■ In-principle projects: 78
■ Expected investment: ₹1,080.97 crore
■ Expected rooms: 3,424
■ Expected jobs: 3,707

said the projects were intended not merely to increase room capacity but also provide tourists with better accommodation across different price segments. He said the department would facilitate timely implementation of the approved projects.

One year of GBA, but civic woes remain

CH NEWS, BENGALURU

The restructuring was intended to decentralise civic administration and improve coordination. However, residents say poor roads, drainage, waste management, traffic issues, property-tax reassessment and e-khata problems persist. Rajajinagar MLA S Suresh Kumar said the restructuring had not brought administration sufficiently closer to citizens.

He pointed out that five corporation commissioners had replaced eight zonal joint commissioners without adequate additional powers. Staff shortages, including ward engineers, health inspectors and pourakarmikas, remain a concern, he said. He also alleged weak coordination among agencies such as BESCOM, BWSSB, BMTC, BDA and Metro, besides inadequate review meetings. The absence of elected representatives is another major concern. BBMP corporators’ term ended in October 2020, leaving Bengaluru without an elected civic council.

CH NEWS, BENGALURU

Bengaluru police have shifted 31 Bangladeshi nationals, who were found staying illegally in the city, to West Bengal as part of the process to deport them to Bangladesh. The foreign nationals were detained during special drives conducted across 10 police stations under the Electronic City Division in August. According to Electronic City DCP M Narayana, the 31 detainees were escorted by a 20-member police team from Sir M Visvesvaraya Terminal (SMVT) in Bengaluru on Monday. The group reached Malda Railway Station early

Wednesday morning and was handed over to the local police. They were subsequently lodged at the Karma Tirtha Holding Centre, where the authorities will complete the legal formalities required for their deportation, police said. The latest action follows a major crackdown by the Electronic City sub-division police last month. During simultaneous raids at 29 locations, police detained 1,909 people suspected of staying illegally in the country. The operation, conducted under Narayana’s leadership, involved 23 special teams and 295 police personnel. The teams began searches around 4 am to identify and verify the

nationality and documents of suspected illegal immigrants. Following document verification, 15 people were confirmed as Bangladeshi nationals. Police said they were allegedly in possession of fake Aadhaar cards showing West Bengal and Assam as their places of origin. The documents of the remaining 1,894 suspects are still being verified. Police are scrutinising their visas, passports and other nationality-related documents as part of the process. According to the police, the 15 confirmed Bangladeshi nationals were from Bagerhat district in Khulna division of Bangladesh and are suspected to have illegally crossed into India.

RTO warns against illegal vehicle modifications

CH NEWS, BENGALURU

Vehicle owners cannot freely alter their vehicles beyond manufacturer-approved specifications, RTO officials have warned, saying unauthorised modifications can invite legal action. Officials said modifications affecting safety, visibility, identification details or registered specifications require prior permission from the registering authority. Removable decals, stickers and wraps are generally allowed if they do not compromise safety or alter registered details. However, changes in vehicle colour must be reported to the RTO through the prescribed process. Officials also cautioned against tinted glass, stickers or markings resembling government and emergency-service vehicles, and fancy registration plates that obscure identification details. Use of symbols or designations such as ‘Police’, ‘Army’, ‘Press’, ‘MLA’ or ‘Judge’ on private vehicles is also prohibited. RTO officials said enforcement action, including vehicle impounding where permitted, could follow violations.

Cauvery handicrafts in Bengaluru gets digital push

CH NEWS, BENGALURU

“Karnataka’s handicrafts represent a unique heritage and the exceptional skills of our artisans. Our objective is to take these products to a much larger customer base through digital markets.”
- Rohini Sindhuri, Secretary, MSME, Mines & Textiles Department

The existing e-commerce portal was developed in 2012. The new platform will offer a more customer-friendly digital marketplace, featuring a wider range of handicrafts and improved buying options. A key feature will be the

‘Customize Product’ facility, allowing customers to submit requirements related to size, design, colour, material, engraving, personalisation, quantity and packaging. The facility will also cater to corporate gifting and special-event require-

ments. The portal will bring several traditional crafts under one digital platform, including sandalwood and rosewood products, Bidriware, Channapatta lacquerware, Kinhal toys, Mysore traditional paintings, Ganjifa art, metal crafts, hand-

loom and textile products. The upgraded portal is expected to function as a digital extension of Cauvery Handicrafts Emporium, connecting Karnataka’s artisans and their craftsmanship with a wider customer base. Government Secretary, MSME, Mines & Textiles Department, Rohini Sindhuri said the initiative would help take Karnataka’s handicrafts to a larger market while creating new opportunities for artisans. KSHDCL Managing Director H R Rajappa said the new portal would make Cauvery products more accessible to buyers in India and abroad.

Digital makeover
■ Current online sales: ₹70 lakh annually
■ Target: ₹5 crore annually
■ Target period: 3 years
■ Portal launch: Upcoming Ganesh festival
■ Existing portal: Launched in 2012
■ Key feature: Customise Product
■ Market: India and overseas

Music teacher
Manjunath Kammar
chosen for award

HAVERI
Havanur Foundation has selected music teacher Manjunath S. Kammar for this year's Gyan Jyothi Best Teacher Award on Teachers' Day. He teaches music at a children's residential primary and high school in Haveri. Known for dedicated music service, he has also worked to identify and encourage talented students. The foundation said his efforts have helped children develop interest and confidence in music. He will be honoured on Friday evening at Pragma Education Institute in Ijari-lakamapur at 5pm. Havanur Foundation chairman Virupaksha Havanur said the award recognises his valuable contribution.

Birthday celebration
at BSNL office draws
public criticism

Vijayapura
The alleged use of a government office for a private birthday celebration has triggered criticism among members of the public in Indi town of Vijayapura district. The birthday of BSNL Junior Engineer Sunil Mdarkhandi was reportedly celebrated on the premises of the BSNL office in Indi. According to information available, Sunil Mdarkhandi (JE), Sanjeev Talavar (Clerk), and Vijay-laxmi Jambagi (Regular Mazdoor/RM) were present during the celebration. The incident has raised questions about the use of government office premises for a personal function during working hours. Government offices are meant primarily for official duties and public service, and the use of such premises for private events has drawn objections. Members of the public have urged senior BSNL officials to conduct an inquiry into the incident and take appropriate action if any rules or service regulations were violated.

Study Abroad 2026
opens global
education doors

GADAG
Students seeking higher education abroad will get access to global opportunities through the Study Abroad-2026 programme, organised by the Karnataka Vocational Training and Skill Development Corporation under the Department of Skill Development, Entrepreneurship and Livelihood. The programme will be held on September 6 at Gayatri Vihara Palace Ground in Bengaluru. More than 75 global universities, including over 10 foreign universities, are expected to participate. The event will offer guidance on university admissions, student visas, financial planning, applications, health insurance and language skills. Students can also receive one-on-one counselling, eligibility assessments and spot scholarship guidance. Scholarships of up to 50 percent will be available to eligible students. The programme is open to students interested in undergraduate, postgraduate, doctoral, diploma, vocational and other courses at universities abroad. Students can register through the Study Abroad website or by scanning the QR code. For more information, they may contact the District Skill Development Officers Office in Gadag or call 8618650935, 9481856181, 9481008754, 8722762768, 9686352815 or 9008234012.

Collector G. Prabhu orders
fast drought relief for farmers

Prabhu said 7,000 farmers insured crops, with ₹25–30 crore compensation expected, urging officials to avoid delays and assist affected families promptly

CH NEWS, CHIKKABALLAPURA

District Collector G. Prabhu has directed officials to speed up drought relief payments to farmers and ensure drinking water is available without interruption. He issued the instructions during a department-wise disaster management review meeting at Sir M. Visvesvaraya Hall on Wednesday. Under the crop insurance scheme, around Rs.90 crore and another Rs.60 crore under NDRF are expected to reach affected farmers. Officials said Rs.58 crore has already been approved for insured crops, while compensation worth Rs.26 crore for other crops is under process. The Collector asked agriculture officials to coordinate with insurance companies and ensure payments reach farmers

quickly. Prabhu said nearly 7,000 farmers have insured agricultural and horticultural crops, and compensation of about Rs.25 crore to Rs.30 crore may be available this year. He asked officials to avoid delays and provide immediate assistance to affected families. The Collector warned that drinking water problems could increase, as 40 villages and 10 wards currently depend on private borewells. Officials were told to arrange tankers, repair failed borewells or drill new ones whenever required. Any failed borewell must be reported immediately with photographs and supporting documents. He also ordered action against illegal pumpsets drawing water from H.N. Valley canals, lakes and other water bodies. Surprise inspections should be conducted and illegal pumpsets confiscated. Farmers with irrigation facilities were encouraged to grow fodder, with fodder seeds supplied through Chimumul. With all eight taluks declared severely drought-prone, Prabhu directed officials to implement government schemes effectively and hold regular task force meetings.

tions should be conducted and illegal pumpsets confiscated. Farmers with irrigation facilities were encouraged to grow fodder, with fodder seeds supplied through Chimumul. With all eight taluks declared severely drought-prone, Prabhu directed officials to implement government schemes effectively and hold regular task force meetings.

HIGHLIGHTS

- ₹58 crore crop insurance compensation already approved
- ₹26 crore compensation for other crops under process
- Nearly 7,000 farmers have insured their crops
- Forty villages depend on private borewells currently
- Tankers ordered for villages facing water shortages
- Illegal pumpsets to face surprise inspections and confiscation

ings. He urged authorities to work with local representatives to provide lasting solutions to water shortages and support farmers during the crisis.

Gadag CEO promises regular
meeting for employees

GADAG

Newly appointed Gadag Zilla Panchayat Chief Executive Officer Mukul Jain has promised to hold regular grievance meetings for employees working under the VB-G RAM G project. Members of the VB-G RAM G Yojana Employees Welfare Association met Jain on Wednesday and honoured him on his arrival as the new CEO. During the meeting, association district president and state vice president Suresh Balikai requested that a grievance meeting be organised every three months to address employees' concerns. Responding positively, Jain said all project employees would be invited to a meeting where they could openly share their problems and grievances. He assured the

association that officials would listen to employee concerns regularly and take suitable steps to resolve difficulties faced during project implementation. State representative Kiran-kumar and office-bearers from Naragunda, Ron, Mundargi, Gadag, Shirahatti and Lakshmishwar attended the meeting. District office-bear-

ers Pakkeeresh Nittali, Arun Singri, Harish Sobarada, Lingaraja Mudigaudara, Mallikarjuna Sarvi, Veerabhad-rappa Sajjana, Lingaraja Arishinada, Manjunath Talwar and Ajay Abbigeri were also present. The assurance raised hopes among employees for faster resolution of workplace issues.

‘Horticulture can
ensure farmer
income during
drought’

KOPPAL

Farmers can maintain a steady income even during drought by growing a mix of horticultural and vegetable crops, retired horticulturist Vamana Murthy said. He was speaking as a resource person at a Kisan concert organised at Gedageri village in Yalaburga taluk on August 31. The programme was organised by the District Agricultural Training Centre, Gangavati, and the Agriculture Department under the Atma scheme. Murthy said farmers could cultivate crops such as mango, guava, papaya and coconut along with vegetables. Diversified farming, he said, can provide income at different times of the year and offer some earnings even when weather conditions are difficult. Agriculture Officer Gavisiddaiah Hiremath explained the current shortage of rainfall and drought conditions. He advised farmers to conserve available water by constructing farm ponds or agricultural wells and provide protective irrigation to save standing crops. He also answered farmers' questions about pigeon pea, maize and groundnut cultivation.

Koppal creates 37
new polling booths
districtwide

KOPPAL

Koppal district has created 37 new polling booths to make voting easier for people in areas with more than 1,200 voters, Deputy Collector Sidrameshwar said on Wednesday. He was speaking at a meeting with representatives of recognized and registered political parties at the District Collector's office. The new booths were created under the Special Comprehensive Revision of Electoral Rolls 2026. Of the 37 booths, 14 are in Kushtagi, 11 in Kanakagiri, five in Gangavati, three in Yalaburga and four in Koppal. The district now has 1,352 polling booths compared with 1,315 earlier. Officials have already appointed booth level officers for the new booths, while political parties have been asked to appoint booth level agents. The draft roll contains 10,41,388 voters, including 5,19,142 men, 5,22,189 women and 57 third gender voters. The draft list has been made available at election offices and polling stations. Notices have been issued to 14,401 voters whose earlier revision details were missing or did not match database records. Officials said affected voters can submit required documents during verification. Special campaigns will be held on September 19 and

AT A GLANCE
• District polling booths increased from 1,315 to 1,352
• New booths target areas exceeding 1,200 voters
• Draft electoral roll records 10.41 lakh voters
• Notices issued to 14,401 voters over discrepancies
• Special voter registration campaign scheduled September 19-20
• Claims and objections accepted until September 23, 2026

20, while claims and objections can be filed until September 23. Forms 6, 7 and 8 can also be submitted online through ECINET or the Election Commission voter portal. Officials urged eligible citizens to check their names, submit corrections and complete registration within the deadline. The administration said the exercise aims to improve access to polling facilities and ensure that every eligible voter can participate in the democratic process smoothly.

‘VB-G RAM G Helps
Villagers Find Jobs Locally’

CHITRADURGA

Vikasita Bharat-Guarantee for Rojgar and Ajeevika Mission, known as VB-G RAM G, can help rural people find employment in their villages instead of migrating to cities, Zilla Panchayat Chief Executive Officer Dr. S. Akash said. Speaking during Akashvani's Jnan Vahini live phone-in programme on Wednesday, Dr. Akash explained the scheme and its benefits to the public. He said the programme supports both individual and community works and helps rural families gain economic strength through local employment. Under the scheme, men and women workers receive equal wages of Rs 382 per working day, he said. A Job Card Mela has also been organised for rural residents

who do not have job cards. Eligible people can obtain new cards and submit their demand for employment. Dr. Akash said awareness about the scheme is being created through door-to-door pamphlets, awareness yatras and Swachh Vahini vehicles. Workers facing problems at worksites can contact the Prajaseva Gram Phone toll-free helpline at 1800 425 1978. Programme Monitoring Units are functioning at district and taluk levels to supervise implementation. During the phone-in programme, Dr. Akash answered questions from the public and provided solutions. Zilla Panchayat Deputy Secretary M. Babu, ADPC Mohan Kumar, IEC Coordinator Rabin-drath, MIS Coordinator Sahana and Akashvani officials Sivaprakash and D. Kavya were present.

Sudhakar seeks Centre's help as
pomegranate prices fall

CHIKKABALLAPURA

Chikkaballapura MP Dr. K. Sudhakar has urged the Union government to intervene urgently as pomegranate prices have fallen sharply, causing losses for growers. He wrote to Union Agriculture and Farmers Welfare Minister Shivraj Singh Chouhan, seeking steps to protect farmers and improve market conditions. Around 2,500 hectares of pomegranate are cultivated in Chikkaballapura district, supporting thousands of farming

families. Sudhakar said the current season has produced good quality and quantity, but farmers are receiving much lower prices. Last year, pomegranates sold for around Rs.180 per kilogram, while prices now range between Rs.100 and Rs.120. Lower-quality fruits are selling for around Rs.60. The MP said rising costs of fertilisers, irrigation, labour and plantation maintenance have increased pressure on farmers. Since pomegranates are highly perishable, growers

cannot store the crop for long while waiting for better prices. This leaves them with little choice but to sell quickly at low rates, increasing the risk of distress sales. Sudhakar asked the Centre to conduct a quick assessment of the district's pomegranate market and consider a Market Intervention Scheme or another suitable support system. He also sought stronger links between farmers and major domestic markets, processing units and better marketing channels.

LAND RIGHTS SECURED

Hanagal families receive home ownership rights under scheme

CH NEWS, HANAGAL

MLA and Karnataka Housing Board president Srinivasa Mane said more than 13,000 families in Hanagal taluk have been assured permanent housing rights as promised during the 2023 Assembly election. He was speaking while distributing ownership certificates to 149 beneficiaries at Gururayapatna village under the land guarantee programme. Mane said land values in

the area have increased significantly, with one acre now costing around Rs.12 lakh to Rs.15 lakh, while individual plots are valued at nearly Rs.25 lakh to Rs.30 lakh. He said beneficiaries had received ownership of valuable land and could now build homes without fear of losing their rights. He also highlighted the state government's five guarantee schemes, saying families were receiving financial support of around Rs.4,000 to Rs.5,000 each month through

various programmes. Mane claimed that few other state governments provide such

large-scale assistance and said the state had continued welfare and development pro-

grammes despite difficulties. Tehsildar Vitthal Chowgala said Hanagal had issued the highest number of permanent house ownership certificates in the state under the land guarantee programme. He said many families had lived for 50 to 60 years on government or private land without proper documents and were unable to access government benefits. The new certificates would help them secure housing, bank loans and other facilities. District Guarantee Imple-

mentation Committee president Hanumanthappa Maragadi, Taluk president Veerappa Bailawala, Karnataka Milk Producers Cooperative Federation director Chandrappa Jalagara, Block Congress president Basanagowda Patil and several other leaders and beneficiaries attended the programme. The distribution was seen as an important step towards giving long-term security to families who had lived without formal ownership documents.

Quick Read

Hostel applications open for minority students

CHITRADURGA Applications are invited from eligible students for fresh admission to Post Matric Boys and Girls Hostels under the Minority Welfare Department for 2026-27. The last date to apply is September 30. Students from Muslim, Christian, Jain, Buddhist, Sikh and Parsi communities can apply. Scheduled Caste, Scheduled Tribe and Other Backward Class students pursuing professional degree or postgraduate courses are also eligible. Applications must be submitted online through the State Student Hostel Software portal. Students seeking details can contact nearby Taluk Extension Officers, hostels, or District and Taluk Minority Information Centres. Officials urged eligible students to apply before the deadline.

Chitradurga farmers to get scientific sheep training

CHITRADURGA The Animal Husbandry and Veterinary Services Department will conduct scientific sheep and goat breeding training on September 7 and 8. The programme will be held from 10am to 5pm at the Animal Hospital premises in Chitradurga. Farmers attending the training must bring an Aadhaar card photocopy and two passport-size photographs. Participants from Scheduled Caste and Scheduled Tribe communities should also carry their caste certificates. No financial incentive will be provided for attending the programme. Interested farmers must register in advance by sending their names and mobile numbers through WhatsApp.

Collector orders precautions against drinking water shortage

The Collector ordered swift completion of water projects and monitoring of drought, water levels, groundwater, crops, drinking water, and livestock fodder

MANDYA

District Collector directed officials to take advance measures to prevent drinking water shortages in K.R. Pet taluk.

A review meeting was held at Chikkonahalli Farm Sabha Bhavan in the presence of the local MLA and Zilla Panchayat Chief Executive Officer to discuss drought management, drinking water supply, housing sites and development issues.

Officials were told to give top priority to drinking water and assess availability and demand in every village. Problem areas must be identified early, while damaged borewells, pumpsets and pipelines should be repaired without delay. Alternative water sources should also be identified, and preparations must be made to supply water through tankers during emergencies.

The Collector instructed officials to review the progress of Jal Jeevan Mission and multi-village drinking water projects. Incomplete works should be completed quickly, with continuous access to clean drinking water ensured for residents.

Authorities were also asked to monitor drought conditions, water levels in lakes and dams, groundwater availability, crop conditions, and supplies of drinking water and fodder for livestock.

The meeting also discussed

providing land to eligible homeless and landless families. Officials were asked to identify available government land in each village and ensure basic facilities such as roads, drinking water and electricity in new settlements.

Agriculture, animal husbandry, MGNREGA works, water conservation, electricity and other public issues were also reviewed. Officials from different departments were directed to work together and resolve complaints quickly at the local level. K.R. Pet taluk

AT A GLANCE

- Officials told to assess village water demand
- Damaged borewells, pumpsets and pipelines need repairs
- Alternative sources identified for emergency tanker supplies
- Jal Jeevan Mission projects ordered completed quickly
- Authorities to monitor lakes, dams and groundwater
- Officials told to resolve public complaints promptly

officials, including the Tehsildar, Taluk Panchayat Executive Officer and representatives of various departments, attended the meeting. The Collector stressed that early action would help prevent shortages and protect people during difficult conditions.

Gadag market promotes eco-friendly Ganesh festival celebrations

CH NEWS, MALINGARAYA PUJAR

Ahead of Ganesh Chaturthi, Gadag is seeing rising excitement in its markets, along with concern over idols made from Plaster of Paris.

The Vivekananda Sabha Bhavan at the APMC premises is offering a cleaner choice through its clay idol market. Running for a decade, the market has become part of festival preparations, while promoting celebrations that are kinder to water bodies and nature.

The market will open on September 7 and remain open until September 14, bringing more than 20 organized shops together under one roof. Devotees can walk through the same premises, compare designs and select idols without travelling from street to street in dust and traffic. About 6,000 to 8,000 clay idols are expected this year, ranging from small home idols to larger models reaching about 10 feet high.

The idols are made from pure clay and finished with natural, water-soluble colours. Organizers say the market does not allow Plaster of Paris idols, reflecting a strong focus on protecting lakes, wells and other water sources.

Traders have also agreed to watch for prohibited idols and prevent them from en-

The initiative supports Gadag's traditional artisans by providing market access, boosting festival-season incomes, helping families, and preserving clay idol-making skills amid cheaper PoP competition

tering the venue. The effort gives the market a clear environmental identity and sets an example for responsible celebrations.

The initiative is also helping local artisans who have struggled with cheaper PoP idols brought from outside the district. By providing a dedicated place to sell their work, the market gives traditional clay idol makers better access to customers during festival season.

It has supported families around Gadag and helped preserve their craft skills. For them, the festival brings income and hope. Local makers say such support matters.

Organizers now want residents and Ganesh mandals to choose clay idols and help make Gadag a cleaner, greener district.

Muthanna Burudi, general secretary of the District Idol Manufacturing Association, said protecting local idol makers is everyone's responsibility. He also called for action if PoP idols are being brought into the district from elsewhere.

COLLECTOR BANS POP GANESHA IDOLS, DJ USE DURING FESTIVAL

KARWAR

With the Gauri-Ganesh festival approaching, Uttara Kannada Deputy Commissioner K. LakshmiPriya has directed officials to prevent environmental and noise pollution during celebrations.

She said the sale and installation of Ganesh idols made from Plaster of Paris would not be permitted, while DJ systems would be completely banned during processions and other festival events.

Chairing a meeting at the Collectorate on Wednesday, LakshmiPriya urged residents to use only clay idols painted with chemical-free colours. She said idols should be immersed only at locations identified by local bodies or in temporary artificial immersion pits, preventing pollution of rivers, lakes and other water bodies.

The Collector said loudspeakers would not be permitted between 10 pm and 6 am. However,

she made it clear that DJ systems would not be allowed at any venue, including during Ganesh immersion processions. The Pollution Control Board and police were instructed to take action against those violating the rules.

Public installations will require prior permission from local bodies and the police.

Organisers were told to install CCTV cameras, appoint volunteers, maintain cleanliness and provide drinking water during public programmes. LakshmiPriya also directed authorities to issue necessary permissions through a single-window system.

Hescom and Fire Department officials must inspect pandals and ensure safety arrangements.

Officials were asked to spread awareness about proper idol disposal and discourage POP idols. The Collector appealed to people to celebrate the festival responsibly while protecting water resources and maintaining a clean

HIGHLIGHTS

- > POP Ganesh idols sale and installation prohibited
- > DJ systems completely banned during festival celebrations
- > Clay idols with chemical-free colours encouraged
- > Idol immersion restricted to approved designated locations
- > Loudspeakers prohibited between 10 pm and 6am
- > Public pandals require prior official permission and safety checks

environment.

District Superintendent of Police M.N. Deepan, Additional SP Ranu Gupta, Deputy Collector Sajid Mulla and officials from several departments attended the meeting virtually and in person.

DEVANAHALLI SEVA DRIVE

Public service drive to hear grievances

DEVANAHALLI

The first Praja Seva Andolana meeting in Devanahalli taluk will be held on September 5 at Annapurneshwari Kalyana Mandap in Vijayapura town.

District In-charge Minister will chair the meeting, where residents can directly submit complaints and seek solutions to various public service issues.

District Collector Dr. K.N. Anuradha announced the programme during a preparatory meeting at the Taluk Panchayat Hall. She said the government had introduced the initiative to make administration more accessible. Meetings will be held every Saturday at taluk level under the District In-charge Minister, while similar programmes

will be organised at hobli level under local MLAs.

Local officials, including Panchayat Development Officers, have been instructed to distribute the Chief Minister's message and grievance forms at residents' doorsteps. People can fill out the forms with details of their complaints and submit them at designated counters. The concerned departments will examine the applications and provide solutions wherever possible. Applicants will receive acknowledgements for their submissions.

The programme will cover issues involving pensions, Sandhya Suraksha, widow assistance and other welfare schemes.

Residents can also raise revenue matters, guarantee scheme

benefits, ration cards, roads, drinking water, government schools, Anganwadi centres, police services and irrigation facilities. Eligible beneficiaries may also receive certificates and government order letters at the meeting.

Collector Anuradha urged residents to use the opportunity to meet ministers and officials directly and seek timely solutions. She directed departments to establish counters, receive applications and provide necessary basic services during the programme. Zilla Panchayat CEO Dr. Vasanthi Amar, Assistant Commissioner Manjunath, CPO Ramakrishna, Devanahalli EO Muniraju and other district-level officials attended the preparatory meeting.

Cooperative
deregistration: Public
invited to raise objections

GADAG

Authorities have invited objections before deregistering eight non-functioning cooperative societies in Gadag district. Officials said the societies have remained inactive for years, without regular audits, elections or annual general meetings. Their management members and general members have reportedly shown no interest in restarting operations. Officials also said important records and addresses of management members were unavailable. Members or the public who have made deposits or have claims may approach the Deputy Commissioner of Cooperative Societies at the District Administration Building, Room 125, during office hours. Objections must be submitted within seven days of this notice. After that, the societies will be deregistered.

Youth missing after
Srishaila Padayatra,
search continues

CH NEWS, ATHANI

A 29-year-old labourer from Mahishwadi village has gone missing after joining a padayatra to Srishaila.

The missing man, Bhairappa Basappa Shinge, did not return home with the other villagers who completed the pilgrimage and returned after about 20 days. Bhairappa's family became worried when he failed to come back.

Relatives and family members searched several places and made inquiries, but no information about his whereabouts was found. His mother, Shanavva Basappa Shinge, lodged a complaint at Athani Police Station on March 26, 2026. Police have registered a case and begun an investigation. Bhairappa has a round face, wheatish-red complexion and a strong build. He is about 5 feet 1 inch tall and can speak Kannada and Marathi. When he left home, he was wearing sky-blue Bermuda shorts and a white T-shirt. He also has an Anjaneya tattoo on his right arm.

Police have appealed to the public to share any information that may help trace him. Athani Police Station can be contacted at 08289-251133. The police control room is available at 112, while Inspector's mobile number is 9480804062.

Dharwad to
host direct job
interviews

DHARWAD

The District Employment Exchange Centre will conduct a direct job interview on September 5 at Jubilee Circle, Dharwad. The interview will run from 10am to 2pm. Employers from a private multi-state credit cooperative society will participate and recruit candidates for Branch Operations Manager and Development Executive positions. Candidates aged 18 to 35 with PUC or any degree qualification can attend. Youth Fund beneficiaries are also encouraged to participate. Eligible applicants must bring their identity card, biodata and copies of required documents at their own expense. Prior registration through the provided online link is mandatory.

SUCI(C) demands release
of pending social pensions

Gaddi urged simpler verification, restoration of stopped pensions, payment of pending dues, and protection of genuine beneficiaries from wrongful exclusion

KOPPAL

The Socialist Unity Centre of India (Communist) Party held a protest outside the District Collector's office on Wednesday, opposing the suspension of social security pensions.

The protesters demanded that pending payments be released immediately and that eligible beneficiaries continue receiving financial assistance without interruption.

Addressing the gathering, SUCI(C) district leader Sharanu Gaddi said pensions were an important source of support for elderly people, widows and persons with disabilities. He said thousands of poor beneficiaries were facing serious difficulties because pension payments had reportedly remained suspended for several months.

Gaddi demanded that beneficiaries should not be forced to repeatedly visit government offices for verification or documents. He urged authorities to restore pensions for all eligible people whose payments had been stopped and release the entire amount pending for the suspension period.

He also called for a simpler verification process and said genuine beneficiaries should not be removed from the

scheme.

He further demanded that errors in government records and verification procedures be corrected quickly. Gaddi said eligible people should receive pensions regularly and pointed to the government's reported increase in the annual income limit for beneficiaries from Rs.32,000 to Rs.1.20 lakh. He urged officials to extend pension benefits to eligible people covered by the revised limit and increase pension amounts in line with rising living costs. Several elderly people, widows and persons with disabilities from villages across Koppal district joined the protest and expressed their concerns. Later, the protesters submitted a petition to Deputy Chief Minister G. Parameashwar through the District Collector. Leaders and beneficiaries, including

Demands

- Immediately release all pending social security pensions
- Reissue pensions suspended for eligible beneficiaries
- Release arrears for entire suspension period
- Simplify verification and eliminate unnecessary beneficiary hardships
- Correct document verification errors affecting pension eligibility
- Increase pensions according to rising living costs

Mangalesh Rathod, Hanumantha Katigi, Pradeep and others, participated in the demonstration and demanded prompt government action.

SFI demands probe into
alleged KPSC
recruitment scam

KOPPAL

The Students Federation of India (SFI) district committee staged a protest at Ashoka Circle on Wednesday, opposing alleged irregularities in the Karnataka Public Service Commission's recruitment of veterinary officers.

The protesters demanded a complete and impartial investigation and justice for candidates who may have been affected. Addressing the gathering, SFI district secretary Balaji Challari said thousands of students and job seekers spend years preparing for competitive examinations to secure government employment. Allegations of money transactions, middlemen and other irregularities in the recruitment process have created serious concerns among aspirants, he said.

Challari said the issue was not limited to one recruitment process but involved the confidence of young people in government examinations.

He argued that government jobs should not be available through money or influence. Students from poor families, farmers, workers, Dalit communities and backward classes who work hard for years should not lose opportunities because of irregularities, he added.

SFI leader Nagaraj U said the CID was investigating allegations linked to the recruitment of 400 veterinary officer posts, while the Enforcement Directorate was examining alleged financial irregu-

HIGHLIGHTS

- > SFI protests alleged KPSC veterinary recruitment scam
- > Group demands complete impartial investigation into allegations
- > Recruitment involved 400 veterinary officer posts
- > CID investigating case, ED probing financial irregularities
- > SFI demands action against everyone found guilty
- > Protesters seek justice for affected eligible candidates

larities. He said SFI welcomed the ongoing investigations but demanded that the complete truth be brought before the public.

The protesters demanded an impartial investigation into allegations involving OMR sheet correction and question paper leaks, without political or other pressure.

They sought legal action and strict punishment against anyone found guilty, along with justice for deserving candidates.

Later, the protesters submitted a petition to the Governor through Deputy Tehsildar Parashuram. SFI leaders warned that they would intensify the agitation and surround the concerned government office if their demands were not addressed. Students and several organisation representatives participated in the protest.

Court issues
seizure warrant
over delayed
revenue changes

KOPPAL

A local civil court in Kukanur has issued a seizure warrant to the Tahsildar's office after a court order concerning private land was not fully implemented within the required time.

The court had directed officials to make necessary changes to the revenue records connected with the case.

Officials said one RTC change has already been completed, while another remains pending at the Survey Department. The delay in completing the second record change led to the court issuing the seizure warrant. As part of the process, some furniture in the Tahsildar's office, along with chairs used by the Tahsildar and Deputy Tahsildar, were reportedly included for seizure. Kukanur Tahsildar Basavaraj Banneshirur explained that the office had already completed one of the changes ordered by the court. However, the second RTC modification could not be completed because the required survey process was still pending. He said the delay was caused by the unfinished procedure at the Survey Office.

Banneshirur clarified that the office had no intention of deliberately disobeying the court's order. He said the remaining revenue record work depended on completion of the survey process and therefore could not be finished within the stipulated period.

‘Legal awareness
key to protecting
public rights’

CH NEWS, RAMANAGARA

Principal District and Sessions Judge and District Legal Services Authority president M.H. Annayyanavar urged legal volunteers to create awareness about laws and ensure that people are not deprived of their rights.

He was speaking while inaugurating a two-day rehabilitation workshop for part-time legal volunteers at the Zilla Panchayat Hall on Wednesday.

Annayyanavar said the Legal Services Authority works to provide assistance to economically weaker people, women, children and labourers. Since officials cannot reach every person, legal volunteers should act as a bridge between the authority and the public. He said the training would help volunteers perform their duties more effectively.

He asked volunteers to treat everyone equally, without considering caste, religion or financial status. Volunteers should speak with kindness and build trust while guiding people who are unaware of their legal rights. Special attention should be given to women, children, child labourers and others who require legal assistance, he said.

With permission from the

Annayyanavar said legal volunteers should bridge authorities and vulnerable communities, helping economically weaker people, women, children and labourers access legal assistance effectively

Legal Services Authority and Taluk Legal Services Committee, volunteers can visit jails, lock-ups, psychiatric hospitals and children's homes to identify legal needs.

They should report problems involving sanitation and other basic facilities to authorities. Cases involving child rights violations, child labour, trafficking and missing children should immediately be reported to legal service bodies or the Child Welfare Committee.

District Bar Association president K. Kempaiah said respectful communication and compassion are essential for building a peaceful society. Senior Civil Judge Savita P.R., Jayaram, Chandrashekhar, trainers Shama and Meemansa Singh, and others attended the workshop. Officials urged volunteers to remain alert to injustice in their areas and promptly inform legal authorities so that timely action can be taken.

And contractors belonging to Scheduled Caste shall be the domicile of the state of Karnataka for more than 10 years. Tenders invited through E-Procurement for 11 Work in Hassan division. In that 02 works are reserved for Scheduled Caste contractors. The maximum estimated amount is Rs.125.00 lakhs. And the minimum estimated amount is Rs.50.00 lakhs. The amount mentioned in the tender notification is sanctioned estimated cost, but the EMD and the class of contractor is considered based on amount put to tender which excludes GST and other charges. Last date of Receipt of tender is 17.09.2026 till 4.00 P.M. For more details visit <https://kppp.karnataka.gov.in> or contact this office through Phone No. 08172-268437 or in person during office hours. Sd/- Executive Engineer, PWD, Hassan Division, Hassan.

BENGALURU EAST CITY CORPORATION
Office of the Executive Engineer,
K.R. Pura Division, Old Madras Road, K.R. Pura, Bengaluru-560036

No.: BECC/EE/KRP/TEND/05/2026-27 Date: 02.09.2026

INVITATION FOR TENDERS (IFT)
(Two Cover System) (Short Term Tender Notification)
(Through GOK <https://kppp.karnataka.gov.in> only)

The Executive Engineer, K.R. Pura Division, BECC invites tenders from eligible tenderers for the construction works detailed in the table below.

Sl. No.	Name of the Work
1	Providing temporary arrangements for Sri Ganesha Idol immersion in Anandapura Ward No. 08. Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 8,750/-.
2	Providing temporary arrangements for Sri Ganesha Idol immersion in Bhatrahalli Ward No. 09 (ST Reserved). Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 4,375/-.
3	Providing temporary arrangements for Sri Ganesha Idol immersion in Basavanapura Ward No. 10 (SC Reserved). Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 4,375/-.
4	Providing temporary arrangements for Sri Ganesha Idol immersion in Krishnanagar Ward No. 11 (CAT-1 Reserved). Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 4,375/-.
5	Providing temporary arrangements for Sri Ganesha Idol immersion in Devasandra Ward No. 12. Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 8,750/-.
6	Providing temporary arrangements for Sri Ganesha Idol immersion in Rajarajeshwari Temple Ward No. 13 (CAT-II(A) Reserved). Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 4,375/-.
7	Providing temporary arrangements for Sri Ganesha Idol immersion in K.R. Pura Ward No. 14. Amount put to tender (Rs. in Lakhs): 3.50, EMD (in Rs.): 8,750/-.

Calendar of events: (1) Last date for submission for Queries: 05.09.2026 @ 3:00 p.m. (2) Date and time for pre-bid meeting: 05.09.2026 @ 3:30 p.m. (3) Last date and time for submission of tenders: 09.09.2026 @ 4:00 p.m. (4) Date and time for opening of Technical bid: 10.09.2026 @ 4:30 p.m. (5) Date and time for opening of Financial bid: 11.09.2026 @ 11:00 a.m. Further details may be obtained from the above office during office hours or website <https://kppp.karnataka.gov.in> Sd/- Executive Engineer, K.R. LIONEL MESSI: A LEGEND OF HIS OWN

There are great footballers. There are icons. There are champions. But Lionel Messi is a legend of his own. His name is attached to millions of hearts, perhaps billions around the world. His influence has gone far beyond the colours of the shirt he wore. People followed Barcelona because of him. They followed Argentina because of him. They followed every chapter of his career because, wherever Messi played, there was always a reason to watch.

That is the greatness of Lionel Messi. For more than two decades, he has given football something very few players ever can: pure joy. Watching Messi play was a delight in itself. There was always anticipation when the ball reached his feet. A simple touch could become a moment of brilliance. A pass, a dribble, a goal or even the way he moved through a defence could remind us why football is called the beautiful game. His greatness was not only in what he won, but in how he played. Messi made difficult things look effortless.

He played with intelligence, imagination and a calmness that made him different from everyone else. He did not need to force greatness. It seemed to come naturally to him. And then there was Argentina. For years, Messi carried the hopes of a nation. The World Cup became the one achievement people believed his extraordinary career still needed.

When he finally lifted the trophy in Qatar in 2022, it felt like the completion of a story that millions had followed for years. That image of Messi with the World Cup will remain one of football's most memorable sights. Not simply because Argentina became world champions, but because Messi had finally reached the summit with the country he had carried in his heart for so long. His career has crossed generations, clubs and continents. He has won almost everything there is to win and, more importantly, he has left an impression that statistics cannot measure. Now comes the farewell. What will people miss most? Perhaps it will be the feeling of watching him.

The sense that, at any moment, Messi could produce something nobody else could. The World Cup will continue to have its stars, but his presence brought a different kind of energy a sense of occasion that made millions stop and watch. Football will move on. It always does. But Messi has already left something that cannot be replaced.

UNCHECKED URBAN SPRAWL DESTROYS NATIVE WILDLIFE HABITATS

- SHARON FAUSTINA J.

As concrete jungles expand relentlessly across the globe, the boundaries between human civilization and the natural world are blurring with destructive speed. Unchecked urban sprawl is steadily consuming forests, wetlands, and meadows to make way for high-rise developments, sprawling suburbs, and vast highway networks. This rapid conversion of land does not merely shrink natural landscapes; it fundamentally fractures ecosystems, trapping native species in ever-dwindling pockets of wilderness. The uncontrolled growth of modern cities has quickly become one of the most pressing threats to regional biodiversity.

At the core of this habitat loss is the process of landscape fragmentation. As roads, power lines, and residential complexes bisect forests and natural valleys, contiguous habitats are carved into isolated patches. For wide-ranging mammals, predatory birds, and migratory species, these artificial boundaries create insurmountable barriers.

Animals searching for food, mates, or seasonal shelter are forced to navigate dangerous urban hazards, leading to high rates of roadkill, human-wildlife conflict, and stress-induced population declines. Cut off from neighboring groups, small animal populations face genetic bottlenecks and elevated risks of local extinction.

Beyond physical displacement, urban expansion drastically alters environmental conditions within remaining natural fragments. The replacement of natural soil and vegetation with asphalt and concrete creates urban heat island effects, elevating local temperatures and drying out nearby micro-habitats. Artificial light pollution disorients nocturnal creatures, disrupting breeding calls and hunting behaviors, while urban noise pollution interferes with avian communication. Furthermore, invasive species, domestic pets, and urban runoff carrying toxic pollutants easily penetrate these fragmented natural areas, further degrading the fragile ecological balance.

The loss of native wildlife habitats carries serious long-term consequences for human communities as well. Natural ecosystems provide crucial services, including storm-water absorption, natural air purification, local climate regulation, and carbon storage. When wetlands are paved over and forests are cleared for housing developments, cities become significantly more vulnerable to flash flooding, extreme heatwaves, and air pollution. Stripping regional landscapes of their native flora and fauna diminishes urban resilience, leaving human populations increasingly exposed to environmental hazards.

TIPPING POINT APPROACHING FOR EARTH'S VITAL RAINFOREST

The Amazon Basin, long revered as the planet's green lung, stands on the edge of an irreversible ecological precipice. Across thousands of miles of tropical canopy, the delicate balances that have sustained global climate systems for millennia are fracturing under the unrelenting weight of human expansion. What began as localized land clearing has multiplied into a systemic crisis, threatening to push the world's largest rainforest past a critical tipping point into a vast, degraded savanna.

At the core of this tragedy is the continuous destruction and fragmentation of pristine natural habitats. Vast swathes of dense primary forest are routinely cleared for cattle ranching, industrial soy agriculture, illegal logging, and wildcat gold mining. Each highway carved through the canopy acts as a catalyst for secondary destruction, splintering once-continuous wilderness into isolated ecological islands.

For species reliant on uninterrupted forest territories from the elusive jaguar and giant river otter to thousands of endemic bird and insect species this fragmentation reduces genetic diversity, shrinks breeding grounds, and pushes entire populations toward quiet extinction.

Beyond the immediate loss of wildlife, the destruction of the Amazon compromises one of the Earth's most vital carbon sinks. The billions of trees populating the basin absorb massive amounts of carbon dioxide annually, acting as a global air-cleaning system. However, as deforested zones are cleared using slash-and-burn practices, centuries of stored carbon are released back into the atmosphere in toxic plumes of smoke. The forest transitions from a vital climate stabilizer into a major contributor to greenhouse gas emissions, accelerating the very global warming that threatens its survival.

Furthermore, the loss of forest cover destabilizes the

hydrological cycles that feed rainfall across South America and influence weather patterns worldwide. Through transpiration, the Amazon

ing a vicious feedback loop. Trees that survive direct deforestation often die of hydraulic failure, unable to endure prolonged dry spells.

unities who have served as the forest's most effective stewards for generations. International funding mechanisms must compensate rain-

generates massive "flying rivers" invisible plumes of atmospheric moisture that transport water across continents. As tree cover vanishes, this natural engine slows down, triggering severe local droughts, increasing forest fire susceptibility, and creat-

Preserving this irreplaceable ecosystem requires an immediate shift toward strict, cross-border conservation policies. Enforcing zero-tolerance mandates against illegal logging and land grabbing is an essential step, alongside empowering Indigenous com-

forest nations for keeping natural reserves intact, aligning economic survival with ecological stewardship. The collapse of the Amazon is not merely a regional crisis; it is a global imperative that will determine the climate future of our shared world.

- PRASHANT MUNDU

RIISING SEAS IMPERIL GLOBAL COASTAL CITIES

The world's oceans are mounting a silent, relentless invasion of human civilization. Driven by warming ocean temperatures and the unprecedented melting of polar ice sheets, rising sea levels are transitioning from long-term environmental projections into an active, destructive reality.

Millions of people living in low-lying coastal regions, low-lying river deltas, and island nations face an existential challenge that threatens to redraw the political and human geography of the planet. At the core of this accelerating crisis is the thermal expansion of warming seawater and the rapid degradation of Earth's great polar reservoirs. Satellite records reveal that ice loss from Greenland and Antarctica has reached alarming rates, pouring hundreds of billions of tons of meltwater into the global ocean annually. What once manifested as incremental water level changes now

amplifies daily high tides and magnifies the destruction wrought by violent storm surges. Coastal lowlands that previously experienced severe flooding once a century now face routine, destructive inundations during seasonal high

tides.

The consequences for coastal communities are profound and multifaceted. Infrastructure built to withstand historical sea levels is failing under the weight of saltwater intrusion. Underground freshwater aquifers the primary

source of drinking water for millions of coastal residents are being contaminated by encroaching ocean water, threatening agricultural productivity and municipal public health. Critical transport links, power grids, port facil-

ities, and residential neighborhoods are increasingly exposed to structural corrosion and frequent operational shutdowns, inflicting severe long-term economic damage. Beyond immediate physical destruction lies the human cost of forced displacement. When

low-lying coastal areas become permanently uninhabitable, populations are uprooted, creating waves of climate refugees. Small island developing states face total submersion, threatening to erase sovereign nations from the map and displace entire cultural heritages. In heavily populated delta regions across Asia, Africa, and the Americas, agricultural collapse and land loss force millions to migrate into already overcrowded inland cities, placing immense strain on urban social systems.

Addressing this existential threat requires regional governments and international bodies to shift from reactive disaster response to aggressive, preventive adaptation. First, municipalities must rapidly modernize sea defenses. Building hard defenses such as surge barriers and reinforced seawalls can protect high-density urban centers, while restoring natural coastal buffers such as mangroves, salt

marshes, and barrier reefs provides flexible, cost-effective defense against wave energy and shoreline erosion.

Second, urban planning and zoning frameworks must undergo a radical overhaul. Regional authorities must ban new construction in high-risk flood zones and implement managed retreat policies, systematically relocating critical infrastructure and residential communities to higher ground. Retrofitting existing urban spaces with elevated roadways, permeable surfaces, and advanced storm drainage systems can bolster immediate resilience.

The rising tide is not a crisis of the distant future; it is a present reality demanding decisive structural reform. Protecting coastal populations requires massive investment, bold policy shifts, and an enduring global commitment to stabilizing global temperatures. Failure to adapt will surrender our world's great coastal heritage to the rising sea.

- MOHAMMED JUNAID

TOXIC AGRICULTURAL RUNOFF POISONS VITAL GLOBAL RIVERS

Freshwater rivers are the lifelines of global ecosystems, supplying drinking water, supporting diverse aquatic species, and nourishing agricultural lands. Yet across the globe, a quiet chemical crisis is destroying these vital arteries. Every year, massive quantities of toxic agricultural runoff enter major river systems, turning healthy waterways into degraded, oxygen-starved channels. Driven by high-intensity farming reliant on synthetic chemical inputs, industrial agricultural pollution has become one of the most severe threats to global freshwater security.

At the heart of this environmental degradation is the excessive application of synthetic fertilizers, pesticides,

and industrial manure. Modern farming practices frequently apply nitrogen and phosphorus in quantities far exceeding what crops can absorb. When seasonal rains sweep across agricultural fields, these unabsorbed chemicals wash into nearby streams, tributaries, and rivers. This steady influx of nutrients triggers an artificial process known as eutrophication, causing massive algal blooms that choke river ecosystems and block sunlight essential for aquatic plant survival.

The ecological consequences of eutrophication are catastrophic. As dense algal mats die and decompose, bacteria consume vast amounts of dissolved oxygen in the water. This rapid oxygen depletion

creates expansive "dead zones" hypoxic areas where fish, crustaceans, and other aquatic life cannot survive. Species unable to flee the affected zones suffocate, leading to mass die-offs that collapse local aquatic food webs. Over time, these toxic plumes flow downstream into estuaries and coastal ocean waters, expanding the footprint of ecological destruction into marine environments.

Beyond the devastation of aquatic life, contaminated rivers pose severe risks to human communities. Synthetic nitrate runoff leaches into municipal water supplies, creating serious public health hazards such as blue baby syndrome in infants and elevated cancer risks over long-term exposure. Rural and in-

digenous communities that rely directly on river water for drinking, cooking, and local fishing bear the brunt of this contamination. Furthermore, treating heavily polluted river water for municipal consumption requires complex, expensive purification infrastructure, driving up utility costs for local residents.

Addressing this widespread chemical crisis requires a fundamental shift toward sustainable agricultural practices and strict environmental governance. Farmers must transition away from heavy synthetic fertilizer dependence by adopting precision agriculture techniques that optimize nutrient application rates and timing. Implementing regenerative farming practices such as planting off-season cover

crops, reducing soil tillage, and practicing crop rotation significantly improves soil health and naturally retains nutrients within the fields.

Additionally, establishing natural riparian buffer zones along riverbanks is a crucial defensive strategy. Restoring native trees, shrubs, and wetland vegetation between agricultural fields and waterways creates natural bio-filters that capture, absorb, and neutralize chemical runoff before it reaches the river. Governments must enforce strict regulatory limits on agricultural discharge, incentivize eco-friendly farming methods, and hold commercial agribusinesses accountable for environmental degradation.

- GIRISH NAIR

LETTERS TO EDITOR

Urgent Action Needed on Potholes

I am writing to express my deep concern over the rapidly deteriorating condition of city roads, particularly following the recent rains. The sheer volume of dangerous potholes on major stretches has transformed daily commutes into a hazardous ordeal for motorists and pedestrians alike. Beyond causing severe traffic delays, these road hazards have damaged countless vehicles and, worse, led to preventable accidents. Patchwork fixes during monsoon season are no longer sufficient. Municipal authorities must implement durable, long-term resurfacing rather than temporary remedies. We urge the civic body to prioritize public safety and repair these critical arteries immediately.

- A. Jaikumar

Tackling Food Waste in Cities

Every day, hundreds of tons of edible food are discarded from households, restaurants, and event venues across our city, while thousands in nearby communities face food insecurity. This stark imbalance is both an environmental and moral crisis. Rotting food waste in landfills emits massive amounts of methane, accelerating urban climate risks. Local municipal leaders and community groups should collaborate to establish efficient donation networks and municipal composting initiatives. By mandating surplus food rescue programs for businesses, our city can feed the hungry and drastically reduce landfill burdens. Small policy changes today will yield a sustainable future tomorrow.

- Mary Vanaja R.

Upgrade Public Bus Networks

Our city's rapid expansion is placing an unbearable strain on private transport infrastructure, leading to endless gridlock and rising emission levels. The most effective solution lies in vastly improving public transit. Increasing the frequency of city buses, introducing dedicated lanes, and modernizing fleet vehicles would make public transit a viable, appealing option for daily commuters. Lowering fares for students and seniors could further boost ridership. Investing in clean, efficient transit reduces carbon footprints while improving urban mobility. Civic leaders must prioritize mass transit funding to create a cleaner, more accessible city for all.

- Stephen Joshua J.

THE QUIET REVOLUTION OF MODERN MOTHERHOOD

Motherhood was once presented as an immaculate, effortless transition: a series of soft-focused portraits featuring serene mothers, tidy living rooms, and sleeping babies. For generations, society sold a polished fantasy of maternal perfection, quietly setting an impossible standard. Today, that narrative is finally cracking open. In its place is a raw, honest conversation about what it truly means to raise children in a complex world. Modern motherhood is not a passive role to step into; it is a quiet, ongoing revolution of identity, resilience, and unyielding love.

At its core, motherhood demands an extraordinary recalibration of the self. The moment a child is born, a mother undergoes her own kind of birth: a sudden shift where her desires, energy, and mental bandwidth are permanently shared. It is an experience rich with fierce, incomparable joy: the warmth of a small hand resting in yours, the shared laughter over nonsensical jokes, and the profound privilege of watching a brand-new human learn how to navigate the world. These moments offer a depth of fulfillment that few other life experiences can replicate.

Yet, validating the beauty of motherhood requires equal honesty about its immense weight. The invisible mental load tracking medical appointments, emotional shifts, educational milestones, and daily routines often falls disproportionately on mothers. Society frequently celebrates maternal sacrifice

while ignoring maternal exhaustion. Mothers are expected to work as if they don't have children, and raise children as if they don't work. The pressure to "have it all" too often translates into doing it all, leaving little room for a woman to simply exist as an individual outside of her maternal duties.

What makes this current moment transformative, however, is the collective refusal to suffer in silence. Women are dismantling the myth of the perfect mother. They are openly discussing postpartum anxiety, identity loss, and the loneliness that can exist even in a crowded house. By rejecting the expectation of perpetual self-sacrifice, mothers are claiming their right to be whole humans—imperfect, tired, ambitious, and deeply loving all at once. Prioritizing one's mental health, personal goals, and boundaries is no longer viewed as betrayal to the child, but as a crucial foundation for healthy parenting.

Ultimately, motherhood is not defined by flawless performance or self-erasure. It is defined by presence. It is the steady, enduring commitment to guide another soul through life while continually rediscovering oneself along the way. As we redefine what it means to be a mother, we build a culture that values mothers not for how much of themselves they can give away, but for the depth, strength, and authenticity they bring to the world.

- SIDDHARTH NAIR

MICROPLASTIC POLLUTION WEAPONIZES GLOBAL MARINE OCEAN CURRENTS

The world's oceans have become vast planetary conduits for an invisible toxic crisis. Millions of tons of synthetic waste discarded into coastal regions every year are breaking down under ultraviolet radiation and wave action into microscopic particles known as microplastics. Once swept into powerful oceanic currents, these toxic pollutants travel thousands of miles from their origin points, penetrating remote Arctic ice sheets, deep oceanic trenches, and pristine island habitats. What began as a land-based management failure has transformed into an active ecological emergency weaponized by global ocean currents.

The mechanics of this pollution are as relentless as the tides. Synthetic polymers ranging from single-use packaging and synthetic textile fibers to degraded industrial materials do not biodegrade in marine environments; they simply fracture into smaller pieces. Floating microplastics act as sponges for persistent organic pollutants, absorbing toxic industrial chemicals, heavy metals, and pesticides already present in seawater. Transported by major oceanic gyres, these chemical-laden particles concentrate in massive floating garbage patches before descending through the water column, saturating the entire marine environment from surface waters to the seafloor.

The entry of microplastics into marine food webs poses a catastrophic threat to ocean biodiversity and ecological stability. Microscopic zooplankton, filtering organisms, small fish, and corals ingest microplastics after mistaking them for food. As small prey animals are consumed by larger predators, these non-biodegradable particles and their absorbed toxins accumulate up the food chain in a process known as biomagnification. Seabirds, sea turtles, marine mammals, and commercially harvested fish suffer from internal blockages, reproductive failure, hormonal disruption, and tissue inflammation, causing widespread population declines.

Furthermore, this toxic cycle inevitably returns to human communities. Microplastics and associated chemical contaminants move directly from marine food chains onto consumer dinner plates worldwide. Ingesting seafood contaminated with synthetic fibers exposes human populations to unknown long-term health risks, including cellular toxicity, endocrine disruption, and metabolic disorders. Rural coastal populations and indigenous communities that rely heavily on seafood for daily nutrition face the highest levels of chemical exposure, compounding existing socio-economic vulnerabilities.

Addressing the global microplastic crisis requires an immediate shift from localized cleanup efforts to enforceable international policy. World leaders and international regulatory bodies must establish binding global treaties that impose strict caps on virgin plastic production, mandate a rapid phase-out of non-essential single-use plastics, and hold petrochemical manufacturers financially accountable for waste management infrastructure. Expanding extended producer responsibility laws ensures that companies bear the economic burden of collecting, recycling, or safely processing synthetic materials throughout their lifecycles.

-FIRDOZ

THE SILENT CRISIS OF AVIAN EXTINCTION

Across every continent and ocean, a profound silence is slowly descending over the natural world. The vibrant melodies, complex migrations, and intricate ecological roles of birds are fading at an alarming and unprecedented rate. Across the globe, thousands of avian species are sliding toward extinction, driven down by human activity, habitat loss, climate disruption, and environmental degradation. What was once considered a gradual environmental concern has escalated into an acute biodiversity crisis. The ongoing mass extinction of birds is not merely a tragedy for wildlife enthusiasts; it is a terrifying indicator of a collapsing global biosphere that ultimately threatens human survival itself.

To understand the magnitude of this extinction crisis, one must look at the structural forces dismantling bird populations worldwide. Chief among these is the relentless destruction and fragmentation of natural habitats. Vast forests, ancient wetlands, pristine grasslands, and coastal mudflats are continually cleared to make way for expanding urban centers, industrial agriculture, logging operations, and mining developments. For migratory birds, which rely on a connected chain of pristine stopover sites across thousands of miles to rest and feed, the destruction of a single wetland or forest corridor can cause an entire population to collapse. When their natural homes are fragmented into isolated patches, birds lose access to breeding sites, food sources, and protection from predators.

Compounding this habitat loss is the ubiquitous threat of industrial pollution and chemical contamination. The widespread use of synthetic pesticides in modern agriculture has depleted insect populations—the primary food source for countless bird species—while directly poisoning avian wildlife through bioaccumulation. Synthetic chemicals, plastic debris, and toxic heavy metals saturate marine and terrestrial environments alike. Seabirds swallow plastic waste floating in ocean gyres, feeding it to their chicks with fatal consequences, while raptors suffer from secondary poisoning after consuming prey contaminated with agricultural toxins or lead ammunition.

Overlaying all these pressures is the accelerating impact of global climate change. Rising temperatures alter ecological timing, causing a dangerous mismatch between bird migration schedules and the peak availability of food resources such as emerging insects or flowering plants. Extreme weather events—prolonged droughts, severe heatwaves, intense storms, and unseasonal freezes—destroy fragile nests, decimate food supplies, and alter entire ecosystems faster than bird populations can adapt. Rising sea levels submerge low-lying coastal nesting grounds, while shifting climate zones force mountain-dwelling species into shrinking habitats at higher elevations until they have nowhere left to run.

The loss of avian species carries devastating consequences for global ecosystems. Birds are essential drivers of ecological health and balance. They act as master seed dispersers, allowing forests to regenerate naturally over vast distances. They serve as primary pollinators for thousands of plant species, sustaining wild ecosystems and human crops alike. Insect-eating birds provide vital natural pest control, suppressing populations of agricultural pests and disease-car-

rying insects that would otherwise devastate harvests and public health. Scavenger species, such as vultures, play a critical role in sanitation by consuming carcasses, preventing the spread of deadly pathogens like rabies and anthrax throughout livestock and human populations. When bird species disappear, these essential ecological services collapse, creating unpredictable chain reactions that degrade whole environments.

Furthermore, birds serve as early warning indicators for environmental health—the literal “canaries in the coal mine” for planet Earth. Because birds are highly sensitive to environmental changes and occupy every major ecosystem on the planet, declines in their populations signal systemic degradation long before it becomes obvious to human eyes. The silent collapse of avian biodiversity is a clear, unvarnished warning that Earth's life-support systems are fracturing under the weight of unsustainable human expansion.

Addressing this crisis requires immediate, coordinated action across international borders, governments, and local communities. First, global conservation efforts must focus on large-scale habitat protection and restoration. Expanding protected natural reserves, safeguarding key biodiversity areas, and restoring degraded wetlands, forests, and grasslands are critical steps. International treaties must enforce strict protections along major migratory flyways, ensuring that migratory birds have safe passage across multiple countries and jurisdictions.

Second, agricultural and industrial practices must undergo a radical shift toward sustainability. Governments must regulate and reduce the use of harmful pesticides, incentivize organic and regenerative farming methods, and ban toxic lead ammunition and single-use plastics. Agricultural landscapes can be redesigned to include natural hedgerows, native tree belts, and uncultivated field margins that provide essential food and shelter for avian species alongside food production.

Third, aggressive action on climate change is non-negotiable. Rapidly transitioning away from fossil fuels to clean energy, preserving natural carbon sinks like ancient forests and peatlands, and integrating biodiversity protection into climate policies are essential to stabilizing global temperatures and preserving surviving habitats.

Finally, urban planning must incorporate bird-friendly designs. Millions of birds die annually from collisions with glass windows on modern buildings and from light pollution that disorients nocturnal migrants. Implementing bird-safe glass architecture, turning off unnecessary architectural lighting during peak migration seasons, and planting native flora in urban parks can save vast numbers of birds every year.

The avian extinction crisis is not an inevitable fate, but the direct consequence of human choices and ecological neglect. Allowing the skies to fall silent would be a monumental failure of global stewardship, stripping the world of its natural beauty, ecological balance, and evolutionary heritage. Protecting birds requires moral clarity, political courage, and sustained global commitment. By safeguarding the natural systems that allow birds to thrive, we ultimately preserve the very biosphere that sustains human life.

-ANNA BENIDICT

SACRED SPACES IN A FRACTURED WORLD

Walk into an old church on a Tuesday afternoon, and the world outside immediately loses its aggressive edge. The heavy oak doors muffle the rumble of traffic, the light filters through stained glass in quiet streams of amber and violet, and the air carries a faint, timeless scent of aged wood and beeswax. For centuries, these structures have stood as the physical anchor of human communities. Yet today, as secularism rises and modern life shifts increasingly online, the role of the church is undergoing a profound transformation. What was once the unquestioned center of civic and spiritual life is now rediscovering its purpose in a fragmented world.

At their core, churches have always been double-storied spaces: they are built to connect the human to the divine, but equally, to connect human to human. Long before modern social safety nets existed, the parish church served as the local bank of compassion. It was where bread was distributed to the hungry, where the sick were tended, where marriages were sealed, and where the dead were mourned with collective dignity.

In an era where modern loneliness has reached epidemic proportions, this gathering function remains shockingly relevant. While digital networks promise connection, they rarely offer presence. A church service demands that people sit

shoulder to shoulder with neighbours they might otherwise ignore, singing the same songs and sharing the same silent bread.

Critics often view traditional church buildings as relics of a bygone era expensive to heat, difficult to maintain, and lingering as symbols of an institutional past that many have outgrown. Indeed, the decline in weekly attendance across much of the Western world is undeniable. Yet, to measure a church solely by the number of people sitting in its pews on Sunday morning is to miss the broader quiet work happen-

ing throughout the week.

Today, these stone and timber hulls are frequently reinventing themselves. On any given day, a sanctuary might host a food bank, a cold-weather shelter for the unhoused, a community choir rehearsal, or a recovery group meeting. They remain among the few remaining non-commercial spaces in our cities where anyone can enter without being expected to buy something. There is also an undeniable architectural and aesthetic mercy to the church.

Teacher arrested for abusing minor in Kannur

KANNUR
A teacher in Kerala's Kannur has been arrested after a minor student accused him of repeated sexual abuse over two years. The student alleged that the abuse began at age 11 and continued until 13, with threats allegedly made to prevent disclosure. The accused, identified as Muhammad Basheer of Muthuvalloor in Malappuram, was booked under the POCSO Act and other relevant sections. Kannur police arrested him following the complaint. A court remanded Basheer to Kannur Central Jail for 14 days.

Four children die after Shivpuri waterfall visit

SHIVPURI
Four children from the same family died within 10 days after visiting a waterfall near Gora Tila in Shivpuri, Madhya Pradesh, on August 16. Three victims were minors. The children reportedly developed fever, stomach pain, vomiting and diarrhoea before their conditions worsened rapidly. The victims were identified as Tahir, 14, Ayaz, 19, Taruf, 9, and Tasif, 11. Their deaths occurred between August 21 and 31. Relatives suspect contaminated waterfall water may have caused the illness. The health department has launched an investigation, collected samples from family members and examined medical records.

Kerala CPI(M) post-poll meetings raise questions

THIRUVANANTHAPURAM
Kerala CPI(M)'s post-election explanatory meetings in its stronghold Kannur have raised questions about whether the party is prepared to make corrective changes after its electoral setback.
The meetings followed months of internal reviews that had called for serious corrective measures from the leadership.
The party suffered major defeats in Taliparamba and Payyannur, constituencies where the CPI(M) had traditionally enjoyed strong support. The losses were seen as particularly significant because the party had rarely faced defeat in these seats. The results were therefore closely watched for signs of change within the organisation.
However, former chief minister and Opposition leader Pinarayi Vijayan reportedly launched sharp attacks on rebel MLAs T K Govindan and V Kunhikrishnan, who defeated CPI(M) candidates in the two constituencies.
Vijayan described Govindan as an opportunist and

Maharashtra Pradesh Congress Committee has asked the State Chief Electoral Officer to extend the deadline for filing claims and objections under the ongoing Special Intensive Revision of electoral rolls. The party has sought an extension from September 30 to November 30, saying the current period is inadequate.
Congress General Secretary Sandesh Kondvilkar submitted a representation to Chief Electoral Officer S Chockalingam, raising con-

cerns over voter exclusions and seeking greater transparency in the revision process. The party said 2.06 crore voters, or 21.14 per cent of the state's registered electorate, were excluded from the draft roll under the

‘BUILD A SECOND BENGALURU’

Shivakumar said NITI Aayog's suggestion to develop a "second Bengaluru" would be incorporated into a comprehensive plan.

BENGALURU
NITI Aayog vice-chairperson Ashok Kumar Lahiri on Wednesday asked Karnataka Chief Minister D K Shivakumar to "seriously consider" building a second Bengaluru in Karnataka.
Lahiri met Shivakumar, Home Minister Priyank Kharge, Chief Secretary Shalini Rajneesh and others for a presentation on Viksit Karnataka @2047.
NITI Aayog commends Karnataka's trajectory
"I am proud of Karnataka's development. To reduce pressure on Bengaluru, there is a need to seriously consider building a second Bengaluru in Karnataka," Lahiri said, according to a statement from the chief minister's office.
"Karnataka has all the potential to grow rapidly. Only if states grow can the country grow and develop. Since Kar-

nataka has a large dryland area, a plan should be made to grow more produce in dryland areas," Lahiri added.
Shivakumar said NITI Aayog's suggestion to develop a "second Bengaluru" would be incorporated into a comprehensive plan. Shivakumar urged NITI Aayog to ensure Karnataka receives its due share of Central funds, including grants announced in earlier Union Budgets. He sought special consideration for Karnataka, citing its lead in GDP, per-capita income,

technology, innovation, FDI, exports, startups and IT services. He also urged that fund allocation should not penalise southern states for successfully implementing population-control measures.
The CM also highlighted the state's welfare spending, infrastructure projects, agricultural potential and new initiatives in public services, foreign investment and tourism. During the meeting, officials said Karnataka's GSDP stood at Rs 32.81 lakh crore in 2025-26, growing 8.1%.

Meeting details

- **Proposal:** NITI Aayog suggested creating a second major economic hub to reduce congestion in Bengaluru.
- **State response:** Chief Minister Shivakumar stated that the recommendation would be added to a comprehensive development plan.
- **Central funds:** DKS requested fair central fund allocations and special consideration for Karnataka's high economic performance.
- **Economic growth:** Officials reported that Karnataka's Gross State Domestic Product (GSDP) reached Rs 32.81 lakh crore in 2025-26, marking an 8.1% growth rate.

TVK Government Lacks Touch Reality: Dhinakaran

MADURAI
AMMK general secretary T T V Dhinakaran on Wednesday criticised the TVK government in Tamil Nadu, comparing its administration to a cinema disconnected from real life. Speaking at a press conference in Madurai, he questioned the experience and abilities of the newly elected ministers and MLAs and alleged that the government was struggling to handle basic responsibilities. Dhinakaran claimed that TVK won 108 seats by attracting young voters through Instagram reels and cinematic appeal, while many of its candidates were

“There is absolutely no connection between reality and the actions of this government.”
TTV Dhinakaran, AMMK

relatively unknown. He also questioned the knowledge of some elected representatives, alleging that a few had difficulty with basic Tamil and mathematics. He cited examples of members reportedly confusing millilitres with millimetres and misreading numbers. Targeting Chief Minister C Joseph Vijay, Dhinakaran alleged that he remained largely silent in the Assembly for 100 days and had difficul-

ty reading written statements. He accused the Chief Minister of treating administration like a shooting schedule and alleged that several elections promise, including financial assistance of Rs 2,500, six free gas cylinders and farm loan waivers, had not been fulfilled. Dhinakaran also criticised the delayed release of water from dams, claiming it would not be useful for cultivation in many areas, particularly at the tail end. He further alleged that the state was facing worsening law and order concerns, including sexual violence, drug circulation and corruption in government departments.

Chloroquine tablets leave 52 villagers ill, girl dies

ANDHRA PRADESH
A seven-year-old girl died and 52 villagers fell ill after taking chloroquine tablets distributed to prevent malaria in Gollaguppa village of Andhra Pradesh's Polavaram district. Health officials had given the tablets to 71 people as a precaution. Soon after taking them, several villagers developed vomiting, dizziness and abdominal pain. Twenty-nine patients were admitted to a hospital in Bhadrachalam, Telangana, while 24 were treated at a local health centre. Andhra Pradesh Chief Minister N Chandrababu Naidu ordered a high-level medical investigation.

SC LIMITS BCI CHIEF'S TENURE, ORDERS OVERSIGHT

NEW DELHI
Supreme Court on Wednesday described Bar Council of India (BCI) Chairperson Manan Kumar Mishra's present position as "pro tem" and said he could continue only until a newly constituted BCI elects its office-bearers. The court also directed that policy decisions of the council must involve the Attorney General and Solicitor General.
A bench headed by Chief Justice of India Surya Kant, along with Justices Joymalya Bagchi and V Mohana, said its concern was the institutional functioning of the BCI rather than the conduct of any individual. The court said the existing arrangement could handle day-to-day matters, but important policy decisions required participation from permanent ex officio members.
The bench was hearing petitions challenging Mishra's prolonged tenure and seeking his removal. The pleas also questioned notifications extending the terms of the chairman and vice-chairman until 2030. Petitioners argued that Mishra's five-year term, from April 17, 2025, to April 16, 2030, was inconsistent with BCI Rules that provide for a two-year tenure.
The court observed that the provision under the Advocates Act used to continue office-bearers during a transitional period was meant to prevent an administrative vacuum and should not be used to avoid elections.
With State Bar Council elections completed, the court said the new councils should proceed with forming the BCI.
The Supreme Court directed the newly constituted State Bar Councils to complete co-option and elect their chairpersons, vice-chairpersons, other office-bearers and BCI representatives within three weeks of notification. The matter will be heard again on September 23.
The court also considered concerns over a BCI-linked trust and questions about permanent trusteeship of its assets.

EXPERTS CHECK SAFETY OF 130-YEAR-OLD MULLAPERIYAR DAM

KUMILY
A five-member independent expert panel on Tuesday inspected the 130-year-old Mullaperiyar dam in Kerala to assess its structural safety and overall condition. The panel, headed by former NHPC CMD Balraj Joshi, visited the dam and its surrounding premises at Vallakadavu near Kumily. The inspection was conducted following a 2022 Supreme Court order seeking an assessment of the dam's hydrological, seismic and structural aspects. The review aims to determine whether the ageing structure remains stable and safe for the public.
Joshi said the panel would examine the dam's design, engineering, instruments and seismic features. It will also assess whether the structure can continue performing its intended function under current engineering standards.
The panel includes experts

BJP promises PNG connections, 24-hour power in Rajasthan

JAIPUR

The Bharatiya Janata Party on Wednesday released its Urban Development Sankalp Patra for Rajasthan's upcoming civic body elections, promising faster urban development, better drinking water supply, PNG connections for seven lakh households and 24-hour domestic electricity in cities.

The document was released at the BJP state headquarters in Jaipur in the presence of Chief Minister Bhajanlal Sharma, state president Madan Rathore and other senior leaders. The party said wards would be treated as the basic units of urban development, with special measures planned for areas facing water shortages.

Chief Minister Sharma said the party had deliberately called the document a Sankalp Patra instead of an election manifesto. He described it as a five-year commitment focused on completing promised work and improving urban services.

The BJP also announced that separate Sankalp Patras would be prepared for individual municipal corporations, municipalities and other urban local bodies. These documents will include plans based on local needs and priorities.

Rathore said the party had the confidence of the people and would fulfil its commitments. He highlighted the government's performance over the past two years and said voters would compare its work with previous administrations.

The BJP had formed a 13-member committee on August 2 to prepare the document. According to the party, the committee completed the exercise within 30 days after consultations on urban development. The party will now release separate local-level documents before the civic elections, outlining commitments tailored to individual urban areas across Rajasthan.

Ahmedabad customs seize 1.93 kg hydroponic marijuana

AHMEDABAD

Ahmedabad Customs officials seized 1.928 kg of hydroponic marijuana from two passengers who arrived from Bangkok at Sardar Vallabhbhai Patel International Airport on Wednesday.

The passengers, a 50-year-old husband and wife from Vadodara, were arrested following the seizure.

The Air Intelligence Unit intercepted the couple after passenger profiling and X-ray scanning of their baggage.

Officers found specially created cavities inside their trolley bags during a detailed examination.

Five vacuum-packed transparent packets containing a green substance were found inside each bag. Preliminary tests indicated that the substance was hydroponic marijuana, officials said.

The 10 packets together weighed 1,928 grams.

The contraband was seized under the Narcotic Drugs and Psychotropic Substances Act, 1985.

Both passengers were arrested, and further investigation is underway to determine the source and intended destination of the drugs.

The seizure came a day after Ahmedabad Customs seized 6.073 kg of hydroponic marijuana from a Myanmar-origin passenger arriving from Ho Chi Minh City. In that case, officers detected a concealed cavity in a trolley bag following passenger profiling, X-ray scanning and assistance from a sniffer dog. The latest seizure marks the second major hydroponic marijuana interception at Ahmedabad airport in two days. Customs officials are continuing their investigation into both cases and the possible network involved in transporting the contraband.

IN FOCUS
1.928 kg: Hydroponic marijuana seized
2: Passengers arrested
10: Packets recovered
50 years: Age of both passengers
2 days: Time between major seizures

Mohit Jain elected as ABC chairman 2026-27

MUMBAI,

Mohit Jain, Chief Operating Officer (Publishing) and Board Member of Bennett, Coleman & Co. Ltd. (BCCL), has been unanimously elected Chairman of the Audit Bureau of Circulations (ABC) for 2026-27.

Jain's election marks BCCL's return to the chairmanship of ABC after 43 years. With more than two decades of experience in the print media industry, he has held senior leadership positions spanning publishing, business operations and industry affairs.

At BCCL, Jain has played a key role in strengthening the organisation's publishing and business operations. Before joining the company, he was part of the India management team at GSK Consumer Healthcare. He holds an MBA and a degree in Chemical Engineering.

Jain has also held prominent positions in industry bodies. He served as President of the Indian Newspaper Society (INS) during 2021-22 and has been associated with its Board for over two decades. He previously served for three years on the Global Supervisory Board of WAN-IFRA and is Vice President of the South Asia Division Board of INMA. He also chairs the Media Committee of PHDCCI and the News, Print & Publishing Subcommittee of CII. Vikram Sakhuja, Partner and Director at Madison World, was unanimously elected Deputy Chairman of ABC for 2026-27.

MAHARASHTRA SIR CLAIM

Maharashtra congress seeks more time for SIR claims

Maharashtra Pradesh Congress Committee has asked the State Chief Electoral Officer to extend the deadline for filing claims and objections under the ongoing Special Intensive Revision of electoral rolls. The party has sought an extension from September 30 to November 30, saying the current period is inadequate.
Congress General Secretary Sandesh Kondvilkar submitted a representation to Chief Electoral Officer S Chockalingam, raising con-

Quick Read

Government denies claims of fake GDP growth numbers

CH NEWS, NEW DELHI

The government has strongly rejected claims that last year's economic output was lowered intentionally to make current figures look brighter. Officials explained that recent adjustments stem from shifting the calculation baseline to a newer year rather than any manipulation. Critics previously argued that without these updates, growth would crawl at just over two percent. However, authorities clarified that comparing old numbers directly with updated metrics is incorrect. Experts maintain that standard statistical upgrades and better data sources naturally alter previous figures to accurately reflect modern economic realities.

‘Japan’s 10 year bond yield crosses 3% Milestone’

Soaring sovereign debt, rising global yields, and shifting monetary policies ignite profound volatility in international bond markets

CH NEWS, NEW DELHI

Global interest rate markets face an era of profound structural volatility, driven by escalating sovereign debt burdens, widening fiscal deficits, and persistent inflationary pressures across major economies. This environment was underscored when Japan’s 10-year government bond yield crossed the critical 3 per cent threshold for the first time since September 1996, while the United States 10-year Treasury yield hovered near 4.8 per cent.

The mechanics connecting runaway fiscal deficits to central bank balance sheets form a direct feedback loop. As advanced economies continue to run deep structural deficits, the sheer volume of sovereign debt issuance overwhelms traditional private-sector demand. To prevent disorderly spikes in long-term borrowing costs that could imperil financial stability,

As government debt and deficits go up, central banks may have no option but to expand balance sheets. Be ready for a roller coaster ride in interest rate markets!

- Uday Kotak, Veteran banker

ty, central banks face mounting pressure to intervene. Such intervention often materializes through quantitative easing or balance-sheet expansion - essentially creating new liquidity to absorb government debt.

Global bond market movements
■ Japanese Yield Surges: Japan's 10-year government bond yield crossed 3 per cent for the first time since 1996, while the 5-year and 2-year yields hit multi-decade highs.
■ US Treasury Pressures: Yields on 10-year United States govt bonds climbed closer to the 4.8 per cent threshold.
■ Shifting Capital Dynamics: Rising domestic returns in Japan threaten to alter long-standing global investment flows, as institutional capital traditionally exported abroad may stay domestic.

This monetization dynamic historically degrades purchasing power, reignites consumer price inflation, and forces short-term yields upward as policy institutions attempt to anchor runaway price expectations.

The breach of the 3 per cent ceiling by Japanese government bonds (JGBs) carries systemic implications for global capital flows. For decades, Japan functioned as the world's primary engine of low-cost

capital, utilizing ultra-loose monetary policy and near-zero interest rates to fund higher-yielding overseas assets. Domestic institutional investors routinely recycled Japanese savings into US Treasuries, European sovereign debt, and global equities. However, as local yields scale multi-decade highs, the incentive to repatriate capital grows increasingly compelling. Higher domestic returns reduce the relative attractiveness of foreign

debt, initiating a gradual unwinding of traditional cross-border carry trades and exerting upward pressure on yields worldwide.

Concurrently, US Treasury yields near 4.8 per cent reflect a recalibration of term premia and persistent inflation anxieties. Geopolitical friction, particularly ongoing instability and energy supply shocks originating from the Middle East, has kept crude oil prices elevated, complicating central

bank efforts to achieve a soft landing. These intersecting pressures mean that fixed-income investors can no longer rely on the low-volatility regimes that characterized the post-Global Financial Crisis decade. Instead, structural fiscal expansion and shifting central bank reaction functions are converging to ensure that sovereign debt markets remain exposed to sharp repricing events and persistent turbulence.

Smart growth in a fast market: India’s digital retail explosion

NEW DELHI

India’s e-commerce landscape is on the brink of an unprecedented transformation, with market valuations projected to nearly triple from \$125 billion in 2024 to an astounding \$345 billion by 2030. A comprehensive new industry study titled Smart Growth in a Fast Market - compiled by research consultancy Infisum with backing from public policy think-tank Empower India, details the multi-faceted dynamics steering this expansion.

According to the findings, the sector is expected to compound at a robust annual growth rate (CAGR) of 18.4 per cent over the next four years. This exponential trajectory is heavily underpinned by surging disposable incomes, deeper mobile and internet penetration across the country's hinterlands, and an accel-

Quick commerce is permanent infrastructure, not a trend. It will drive 45 to 50 percent of incremental e-retail growth.

- Dr. Badri Narayanan Gopalakrishnan, Fellow at NITI Aayog

erating shift toward digital-first consumer habits.

By the turn of the decade, online retail is anticipated to command between 10 and 12 per cent of India's total retail spending, directly contributing roughly 2.5 per cent to the nation's gross domestic product. Furthermore, the total pool of active online shoppers is projected to scale up dramatically to between 420 and 440 million users, further cementing India's standing as one of the most dynamic digital commerce arenas globally.

A standout catalyst within this broader growth story is the meteoric rise of quick commerce. The report estimates that the ultra-fast delivery seg-

ment alone will skyrocket to a valuation of \$65 billion to \$70 billion by 2030, driving an impressive 45 to 50 per cent of all incremental e-retail growth over the upcoming five-year window. To sustain this hyper-localized demand, foundational logistics infrastructure must expand concurrently. Consequently, the national network of dark stores micro-fulfillment centers positioned strategically within urban neighborhoods is forecast to nearly triple, growing from 2,525 facilities in 2025 to approximately 7,500 units by 2030.

This physical and operational scaling coincides with an internal strategic pivot among top-tier industry players. Having initially prioritized aggressive customer acquisition and geographic expansion, firms are now recalibrating their business models to focus intensely on sustainable unit economics, long-term capital efficiency, and optimized supply-chain resilience.

Small cities power India home loan boom: Reports

NEW DELHI

India’s housing finance sector is undergoing a profound structural transformation, with Tier 2 and Tier 3 cities rapidly emerging as the primary engines of future credit expansion. According to a comprehensive new industry report published by advisory firm SGA PR, smaller urban centers now account for an astonishing 64 per cent of total home-loan volumes nationwide. This massive shift is underpinned by an unprecedented surge in digital lending adoption, which has radically dismantled traditional geographic barriers to formal capital.

The report highlights that digital processing has become the cornerstone of modern mortgage origination, with 92 per cent of all housing-finance applications handled digitally. This represents a dramatic leap from 2020, when only 60 per cent of applications utilized digital workflows. Furthermore, nearly 42 per cent of all housing finance institutions now report that the vast major-

Housing finance sector trajectory			
Parameter / Metric	Historical Baseline (2020)	Current Status (2026 Projections)	Future Outlook (2030)
Digital Loan Processing	60% of total applications	92% of applications digitized	Universal AI-driven underwriting
Tier-2 & Tier-3 Share	Metros dominated volume	64% of total home-loan volumes	Continued expansion via affordable housing
Digital Sourcing Share	Low adoption	~42% majority inquiries via digital	Projected to cross 70%

ity of their initial customer inquiries originate through online channels rather than traditional branch networks.

Market momentum in the hinterlands has been explosive, highlighted by an 81 per cent year-on-year growth in loan volumes across smaller cities. This boom is propelled by a convergence of macro-economic tailwinds, including rising disposable incomes, aggressive infrastructure development, rapid urbanization, and localized employment creation. Additionally, widening affordability gaps in major metropolitan areas have priced

many middle-class families out of Tier 1 real estate, forcing a natural migration of housing demand toward secondary and tertiary cities where property values remain more accessible.

Despite these technological strides, housing finance retains unique operational complexities that set it apart from unsecured retail lending. Physical verification, rigorous field operations, and manual underwriting checks continue to play a critical role due to the high-value, long-term nature of mortgage contracts. Industry experts emphasize that

while technology streamlines the front-end, long-term success relies heavily on hybrid models.

Looking ahead, industry analysts project that digital sourcing will cross the 70 per cent threshold by 2030, driven by Account Aggregator-led underwriting and artificial intelligence-driven risk assessment models. As data-driven credit evaluation becomes standard practice, the intersection of robust digital platforms and grassroots advisory support will ultimately define the next decade of India's housing finance evolution.

Sridhar Vembu decodes PM’s Forex strategy

NEW DELHI

Zoho Chief Scientist and Co-founder Sridhar Vembu has offered a detailed economic rationale behind Prime Minister Narendra Modi’s recent appeal for citizens to curb non-essential foreign travel, destination weddings, and gold purchases. Addressing public queries about why such frugality is encouraged while India’s GDP growth remains robust at 7.8 per cent, Vembu explained that rapid domestic expansion inherently escalates a nation’s demand for vital foreign imports.

According to Vembu, accelerating economic momentum places a heavier burden on national resources because faster growth demands greater consumption of foreign energy supplies and advanced technol-

ogy inputs. Even as Indian exports rise, critical industrial processes continue to rely on imported components ranging from precision machinery and raw materials to advanced software, CPUs, and GPUs. Consequently, substantial capital outflows occur when citizens spend on overseas holidays, foreign ceremonies, or non-productive asset accumulation like imported gold.

Drawing historical parallels, Vembu noted that East Asian economic powerhouses such as Japan, South Korea, Taiwan, and later China navigated a remarkably similar path during their industrialization phases. These nations combined high-speed GDP growth with rigorous, deliberate foreign-exchange conservation to build domestic self-reliance over decades.

EPFO opens one time Amnesty window for PF Trusts

NEW DELHI

The Employees’ Provident Fund Organisation (EPFO) has rolled out a crucial compliance window, giving eligible Provident Fund (PF) Trusts until December 28, 2026, to utilize a one-time Amnesty scheme for the formal regularisation of their exemption status. Introduced under the newly notified Employees’ Provident Fund (EPF) Scheme 2026, this transitional framework addresses a long-standing administrative gap affecting numerous corporate and institutional private trusts across India.

The six-month amnesty initiative is specifically designed for establishments that have operated private provident fund trusts recognized under the Income Tax Act, 1961, but have functioned without a formal exemption notification or

order from the appropriate government authority under Section 17 of the Employees’ Provident Funds and Miscellaneous Provisions (EPF&MP) Act, 1952, or Section 143 of the Code on Social Security (CoSS), 2020.

Under this transitional scheme, qualifying establishments are granted retrospective exemption and trust recognition stretching from the original date of the trust’s inception up to the designated cut-off date.

To facilitate smooth integration and clear historical friction, the framework offers wide-ranging statutory waivers from strict parameters outlined under the Code on Social Security, 2020. These exemptions include the complete waiver of minimum employee headcount

prerequisites, mandated minimum corpus size restrictions, and the standard three-year prior compliance stipulation.

Furthermore, pending legal assessments regarding historical dues, damages, and penalty interests are set to be withdrawn and declared abated, provided that member accounts consistently maintained contributions and distributed interest yields at par with or superior to statutory EPFO rates. Past finalized orders facing administrative challenges can also be treated as void ab-initio under specific structural conditions, giving employers a clean slate.

Following successful retrospective regularisation, organizations are granted the operational flexibility to choose their future compliance path.

ICICI Bank raises \$17.88 billion via RBI swap

NEW DELHI

ICICI Bank has successfully mobilized approximately \$17.88 billion through foreign currency non-resident deposits under the Reserve Bank of India’s special dollar-rupee swap facility. The private sector lender shared the figures in an official regulatory exchange filing, outlining how the massive capital inflow was deployed across its global network.

According to the disclosures, loans extended by the bank’s international branches and oversea subsidiaries against these specific deposits amounted to roughly \$9 billion. Additionally, the bank issued standby letters of credit worth \$3.63 billion to other financial institutions against loans backed by these deposits.

Alongside the swap facility, ICICI Bank also issued an aggregate \$3.55 billion in US dollar-denominated bonds over the

months of July and August 2026. These disclosures arrived immediately after the closure of the RBI’s special USD-INR forex swap window for FCNR(B) deposits on August 31. Originally launched on June 8 to bolster foreign exchange reserves and stabilize mounting pressures on the rupee, the window for FCNR(B) deposits was shut a month ahead of its initial September 30 target due to an overwhelming public response.

Data from the central bank indicated that authorized dealer banks collectively reeled in \$72.848 billion in total forex inflows under the scheme as of August 21.

TECH PAY DIVERGENCE

AI job salaries surge while legacy tech pay stagnates

NEW DELHI

India’s professional compensation landscape is undergoing a dramatic structural divergence, driven by an unprecedented demand for niche technical capabilities. A comprehensive new industry study released on Wednesday by the employment platform foundit reveals that salaries for artificial intelligence and machine learning positions across India have compounded by an impressive 23 per cent between 2024 and 2026. This exponential growth starkly contrasts with stagnation and outright pay contrac-

Experience on its own no longer commands the strongest raises - what matters is whether a skill fills a capability gap the business needs.

-Tarun Sinha, CEO of foundit

tions in traditional information technology and legacy hardware roles, exposing a widening economic divide in the modern white-collar job market.

The empirical data compiled in the foundit report underscores a profound shift in corporate

spending priorities. Artificial intelligence roles claimed the highest year-on-year salary growth in the preceding cycle at 12 per cent, closely followed by high-value engineering domains such as Computer and Network Security and Semiconductors, which both regis-

Geographic pay disparities for AI senior roles		
Major tech hub	Senior AI salary range (15+ Years)	Market context
Bengaluru	₹61.70 – ₹91.25 LPA	Highest-paying market, driven by product firms and GCC density
N C R & Mumbai	Comparable mid-tier bands	Roughly 10–15 per cent lower than Bengaluru
Hyderabad	Emerging competitive tier	Backed by rapid expansion of global capability centers
Chennai	Lower comparative band	Up to 40 per cent lower than Bengaluru at senior tiers

tered stable 9 per cent annual compensation increases. By contrast, traditional employment sectors such as computer hardware and e-commerce experienced notable pay corrections, while core IT services stagnated, recording marginal salary declines over the past 24 months.

Compensation structures within the artificial intelligence sector vary extensively based on professional seniority, technical specialization, and geographic clustering. Entry-level AI practitioners possessing between zero and three years of practical experience command starting

remuneration packages ranging from Rs 8.87 lakh to Rs 15.41 lakh per annum (LPA). For seasoned professionals with over fifteen years of deep domain experience, compensation scales dramatically, reaching between Rs 70.99 LPA and Rs 89.24 LPA. Furthermore, specialized technical sub-sectors push absolute earnings even higher; cybersecurity roles boast an extraordinary maximum earning ceiling of Rs 97.81 LPA at the senior level, marking the highest tracked remuneration package across any technical category in the domestic market.

Quick Read

Far right AfD eyes historic state win in Germany

NAUMBURG

Germany's far-right Alternative for Germany party is leading opinion polls ahead of Sunday's state election in Saxony-Anhalt. The anti-immigrant party advocates ending sanctions against Moscow, halting support for Ukraine, and restoring cheap Russian energy supplies. Analysts note that deep historical ties from the former communist era shape local attitudes, as many eastern Germans do not view Russia as a natural enemy. Meanwhile, Chancellor Friedrich Merz's government warns that an AfD victory would favor Vladimir Putin. Economists highlight that lingering wealth gaps and economic anxieties continue to drive voter support toward the nationalist party.

Arctic tensions rise as Denmark fortifies Greenland

KANGERLUSSUAQ

Denmark has sent its first military conscripts to Greenland to strengthen regional security amid rising geopolitical tensions. The deployment follows persistent US demands to acquire the semi-autonomous island, a proposal firmly rejected by Copenhagen and local leaders. Participating in the Arctic Endurance exercise, these young soldiers are training to survive and operate in extreme weather conditions. The mission also aligns with a broader NATO initiative to bolster northern defenses. Meanwhile, Russia and China have criticized the increased military presence, warning that heightened alliance activities in the resource-rich Arctic could escalate regional confrontation.

Orbital arms race accelerates amid rising space tensions

WASHINGTON

The United States and China are rapidly advancing military space operations, developing hunter satellites, spaceplanes, and orbital weapons as conflict increasingly extends beyond Earth. Defense analysts warn that satellites are now viewed as active combat platforms vulnerable to jamming, lasers, and capture. Recently, a secretive Chinese spaceplane deployed a small satellite for close maneuvers, mirroring American unmanned shuttle programs. Meanwhile, the US and Britain recently conducted a joint orbital operation near a Chinese spacecraft to signal allied deterrence. Officials stress that dominating space is vital for national security and modern military success worldwide.

BRIDGING DHAKA AND INDIA

India, Bangladesh discuss legislative & local cooperation

DHAKA

India's High Commissioner to Bangladesh, Dinesh Trivedi, held a series of high-level diplomatic meetings in Dhaka, conferring with top legislative leaders to expand parliamentary cooperation and foster deeper connections between the two neighboring democracies.

Trivedi met separately with Bangladesh's Speaker of the National Parliament, Hafiz Uddin Ahmad, and Deputy Speaker Kayser Kamal at the parliament complex. During the discussions, the High Commissioner emphasized

Violence in Eastern DR Congo complicates Ebola response

Intensifying armed conflict in the DRC fuels mass displacement and severely threatens critical efforts to contain a surging Ebola epidemic.

UNITED NATIONS

Intensifying armed conflict across the eastern provinces of the Democratic Republic of the Congo (DRC) is triggering massive new waves of civilian displacement while severely obstructing medical teams trying to contain an escalating Ebola epidemic. The United Nations Office for the Coordination of Humanitarian Affairs (OCHA) warned that persistent hostilities, targeted community attacks, and widespread population movements are actively breaking down critical disease surveillance networks and halting public health interventions in the most vulnerable regions.

Public health data compiled by national authorities indicates that the epidemic has reached staggering proportions, with confirmed infections surpassing 6,100 cases and fatalities approaching 2,950. Humanitarian agencies stress that the chaotic movement of displaced families fleeing violence serves as an ideal vector for viral transmission, complicating contact tracing and threatening to spark cross-border contagion throughout the Great Lakes region.

The security situation in Ituri province has deteriorated sharply. Local civil society networks reported that armed

Conflict and displacement impacts

- **Casualties in Ituri:** Local civil society sources reported that armed attacks in Mambasa territory (Ituri province) left at least 37 civilians dead and over 35 abducted, adding to a mounting death toll that saw at least 86 civilians killed across the territory over the prior month.
- **Mass Flight in South Kivu:** Clashes in Walungu territory forced the displacement of at least 15,000 people. The majority have sought refuge with host families, generating an urgent demand for emergency food, safe shelter, and basic healthcare.
- **Multi-Pronged Crisis:** Ongoing fighting involving state forces and non-state armed groups across North Kivu and neighboring provinces continues to uproot communities already vulnerable to systemic hunger and weak infrastructure.

groups launched brutal raids in the Mambasa territory, resulting in the tragic deaths of at least 37 civilians and the abduction of over 35 others on a single Saturday. These atrocities follow an equally violent August that saw at least 86 civilians killed in systematic attacks across the

same territory.

Meanwhile, in neighboring South Kivu province, humanitarian partners' documented fresh military clashes across the Walungu territory that have forcibly displaced a minimum of 15,000 individuals since August 23. The vast majority of these displaced fam-

We cannot respond incrementally to an epidemic which is now growing exponentially. What we need now is political will, access, and resources.

Tom Fletcher, UN Secretary

ilies have sought precarious shelter with already overstretched host families, triggering urgent humanitarian needs for emergency food rations, clean drinking water, temporary shelter materials, and primary healthcare services. Similar patterns of forced displacement are also rippling through volatile pockets of North Kivu province, compounding an already catastrophic humanitarian landscape.

Despite facing immense security risks and logistical bottlenecks, United Nations agencies and international humanitarian partners remain active on the ground, coordinating closely with national health ministries.

The International Organization for Migration (IOM) has scaled up preventative operations, conducting nearly 23 million health screenings across the DRC and neighboring countries. These screening checkpoints play a vital role in monitoring population movements, identifying potential infection vectors, and mitigating the risk of international transmission.

Rijiju explores expanded partnerships at Belgrade summit

BELGRADE

Union Parliamentary Affairs Minister Kiren Rijiju, leading the Indian delegation at the High-Level Commemorative Meeting marking the 65th anniversary of the Non-Aligned Movement (NAM) in Belgrade, leveraged the multilateral platform to conduct an intensive series of high-level bilateral engagements. The summit, convened under the theme "The Legacy of Non-Alignment: Lessons for Today's World", brought together leaders from across the globe to reflect on historical principles of sovereignty, peaceful coexistence, and strategic autonomy, while allowing New Delhi to reinforce its diplomatic footprint across diverse geopolitical regions.

A cornerstone of Rijiju's diplomatic outreach involved deepening ties with West Asian leadership. He held comprehensive discussions with Saudi Arabia's Deputy Minister of Foreign Affairs, Waleed A. M. Elkhereiji. The dialogue focused on steering the multifaceted India-Saudi Arabia partnership toward expanded domains of strategic convergence, economic interdependence, and regional stability, building upon mutual high-level visits and shared developmental aspirations.

In his engagements with host-nation dignitaries of the Republic of Serbia, Rijiju emphasized the enduring civil-

Had a warm and meaningful interaction reaffirming our growing partnership.

Kiren Rijiju, Union Parliamentary Affairs Minister

izational and contemporary bonds uniting New Delhi and Belgrade. Following an audience with Serbian President Aleksandar Vučić—wherein both leaders reaffirmed their commitment to bilateral trust rooted in mutual respect—Rijiju conferred with the President (Speaker) of the Serbian National Assembly, Ana Brnabić.

Their talks spotlighted the pivotal role of parliamentary diplomacy, legislative exchanges, and people-to-people connectivity in bridging geographic distances and fostering profound societal understanding.

Additionally, Rijiju met with Serbia's Minister of Internal and Foreign Trade, Jagoda Lazarevic, to map out actionable frameworks for scaling up bilateral trade volumes, encouraging cross-border investments, and unlocking new avenues for mutual economic growth.

Diplomatic engagements

- **Saudi Arabia:** Met Deputy Foreign Minister Waleed A. M. Elkhereiji to deepen the long-standing partnership and expand mutual cooperation.
- **Serbia (National Assembly):** Sat down with Speaker Ana Brnabic to celebrate enduring friendships and boost parliamentary exchanges.
- **Serbia (Trade):** Connected with Minister Jagoda Lazarevic to unlock exciting new paths for bilateral trade and economic growth.
- **Angola:** Held fruitful talks with Foreign Minister Tete Antonio to scale up partnership benefits for both nations.

Expanding India's outreach to the African continent, Rijiju sat down with Angola's Minister of Foreign Affairs, Tete Antonio. The conversation explored robust pathways to diversify bilateral cooperation, particularly focusing on energy security, trade facilitation, and South-South developmental solidarity, ensuring that the historic framework of non-alignment continues to deliver tangible economic dividends for developing nations in an increasingly multipolar and complex global order.

IRGC claims strikes on US Military installations

TEHRAN

Iran's Islamic Revolutionary Guard Corps (IRGC) announced that it executed a series of military strikes targeting United States installations across Kuwait, Jordan, and Iraq. According to state-affiliated media reports, the operations were launched in direct retaliation for a deadly American airstrike that hit a residential wedding celebration in the coastal Iranian district of Sirik. In its official statement, the IRGC claimed its forces successfully targeted the living quarters and command post of the American commander at

the Ali Al-Salem air base in Kuwait, asserting the strike proved Tehran maintains comprehensive intelligence on regional US military movements. Additionally, the Iranian military reported executing a ballistic missile barrage against Camp Tition, a base housing US Marines along the Gulf of Aqaba in Jordan. The IRGC stated that this retaliatory action inflicted heavy personnel casualties and destroyed multiple facilities and stationed helicopters. Operations in northern Iraq also struck American military assets. The IRGC Ground Forces targeted a US facility in Erbil,

reportedly destroying a surveillance balloon control system, equipment warehouses, and a maintenance center, while setting adjacent fuel storage tanks ablaze and causing further American casualties. The escalatory strikes follow sharp condemnations from Iranian diplomatic officials regarding the alleged US attack in Sirik. Iranian Foreign Ministry spokesperson Esmaeil Bagaei reported that more than 50 innocent civilians, including women and children, were killed or wounded when a residential home hosting a wedding in Kuhestak, Sirik, was struck.

CHANGE OF NAME

I, **ALTAF ABDUL HAMEED**, S/o Late AMEER JAN, aged about 67 years, residing at #2657, Chikkapeete, Doddaballapur Town, Bengaluru Rural District-561203, hereby declare that my father's name has been wrongly mentioned as "TABDUL GHANI @ AMEER JAN" in my Passport. His correct and actual name is "AMEER JAN". Verstappen signs Red Bull contract extension until 2030

Max Verstappen locks in his Formula One future with a massive Red Bull extension through the 2030 season.

Alpine reserve driver Aron to drive in Monza FPI

Alpine reserve driver Paul Aron is gearing up for another exciting opportunity in Formula One. The Estonian driver will get behind the wheel once again during the opening practice session at this weekend's Italian Grand Prix.

Aron will pilot the A526 during Friday morning's track running at Monza, stepping in to take the seat of Pierre Gasly for the session. This appearance marks another milestone in his busy development year, having already logged practice outings earlier in the season in Barcelona, Austria, and Hungary.

The young driver faces a demanding schedule once the Friday session concludes. He will immediately fly back to the team's headquarters at Enstone to spend the evening working on the simulator. This crucial late-night effort aims to help engineers fine-tune the car's setup ahead of Saturday's qualifying and race sessions.

Aron expressed excitement about returning to the cockpit so quickly after his positive outing in Budapest. He hopes to use his prior simulator experience with the team's latest upgrade package to provide valuable

MILTON KEYNES

Max Verstappen has officially signed a massive contract extension with Red Bull, tying him to the team through the 2030 season. The announcement ends months of paddock speculation regarding the four-time world champion's future and brings much-needed stability to the Milton Keynes squad.

Former Red Bull advisor Helmut Marko believes the timing of the extension is a

tension could not have been better. Speaking to Krone Zeitung, Marko noted that locking in the 71-time grand prix winner sends the right signal and brings vital calm to the organization. Verstappen's previous deal ran until 2028 but included performance-related exit clauses that fueled heavy links to Mercedes and McLaren throughout 2025 and early 2026.

Despite outside interest and informal talks with rival bosses, the 28-year-old driver ultimately decided to stay put. Marko emphasized that Verstappen serves as the face and leading figure of the entire operation. His presence acts as a crucial factor for the team's future, as every ambitious engineer in the paddock naturally wants the opportunity to work with the best

driver on the grid.

The length of the new agreement is particularly significant because it aligns with the conclusion of the current V6 turbo-hybrid power unit cycle. It also brings Verstappen right to the doorstep of Formula One's next major regulatory overhaul, which is expected to introduce 2.4-litre V8 engines running entirely on sustainable fuels around 2030 or 2031.

Marko admitted that the upcoming engine regulation timeline certainly played a role in negotiations.

Charles Leclerc praises Ferrari's 2026 upgrade strategy

MONZA

Charles Leclerc has praised Ferrari for taking an aggressive and innovative approach to car development this season. As the team prepares for its home race at the Italian Grand Prix, Leclerc highlighted the relentless effort behind their ongoing upgrades in the Formula One championship battle.

Ferrari currently sits 87 points behind Mercedes in the constructors' standings. Teammate Lewis Hamilton is locked in a tight battle for second

parts early. This constant stream of updates makes a massive difference in the early stages of a new regulation cycle, where every single upgrade yields significant performance gains. Innovations like the clever rear-wing designs and unique tail-pipe winglets show that engineers are finding creative ways to extract extra speed.

The Monegasque driver noted that power unit performance remains a primary area where Ferrari still needs to catch up to competitors like Mercedes and Red Bull. However, the team's development program is entirely clear and structured. Unlike previous years, the correlation between wind-tunnel data and actual track performance has been remarkably accurate, avoiding any nasty surprises.

Celebrating a legend: Ferrari's tribute to Schumacher

Ferrari is turning heads this weekend with a special tribute to racing legend Michael Schumacher. Marking 30 years since he joined the team, the iconic Italian squad unveiled a unique look for their cars at the Italian Grand Prix.

Charles Leclerc and Lewis Hamilton will race vehicles featuring a design inspired by Schumacher's 1996 car. The striking style includes a bold red body, white wings, and the famous driver's personal logo. Fans can also view three of his historical race cars up close, while past teammate Rubens Barrichello and Sebastian Vettel will drive the 2002 champion car around the track.

This emotional celebration comes as Ferrari fights for the championship title. With rival Kimi Antonelli facing penalties at the back of the grid, Ferrari hopes to use this home-court advantage and crowd energy to secure a massive victory this weekend.

Unfinished business: Gary O'Neil's premier league return

NEW DELHI

Gary O'Neil is back in the Premier League and eager to make his mark. The Ipswich Town manager opened up about his return to top-flight football, stating that he has unfinished business. After guiding clubs like Bournemouth and Wolves to safety in the past, he is ready to lead Ipswich through their newest challenge.

Ipswich earned a spot back in the Premier League following a single season in the Championship. The club conducted a thorough search before choosing O'Neil as their twentieth manager in ninety years of professional history.

Grateful for the opportunity, O'Neil explained that he took time away to sharpen his managerial skills, including a stint managing Strasbourg in France.

He believes these experiences have made him a much better coach. O'Neil acknowledges the massive task ahead. Keeping a newly promoted side in the top divi-

sion requires hard work, quality, and a united front. He plans to bring the calm, collective mindset that previously worked wonders for him at Bournemouth, where the players, staff, and fans stayed together through thick and thin. He also pointed to recent examples like Leeds United and Sunderland to prove that staying up is entirely possible.

Tactically, the 43-year-old manager intends to keep things flexible rather than sticking to a rigid system.

He plans to adapt to each opponent, pick the right moments to attack, and steal points from bigger clubs while taking care of business against direct rivals.

With clear plans shared with the board and a strong desire to build something special, O'Neil wants his squad to embrace the fight. He believes that playing in the Premier League is a true privilege and is fully prepared to guide Ipswich Town toward a successful and enduring future in the top flight.

TILAK VARMA'S 51 PUTS SOUTH ZONE IN DULEEP FINAL

BENGALURU

Captain Tilak Varma played a brilliant knock to lead South Zone into the Duleep Trophy final. His unbeaten half-century sealed a comfortable seven-wicket victory over North Zone at the BCCI Centre of Excellence ground.

Chasing a target of 181 on the final day, South Zone crossed the finish line smoothly. Varma anchored the innings with an unbeaten 51 from 79 deliveries. He teamed up with Ravichandran Asmaran, who chipped in with a steady 32. The pair put together an unbroken partnership of 80 runs for the fourth wicket to steer their team home without any further scares.

Earlier in the day, North Zone struggled to build a mas-

sive lead. Pacer MD Nidheesh ran through their lower order with sharp bowling, claiming the final three wickets to finish with impressive figures of five for 56. North Zone was eventually bowled out for 286, setting up a manageable target for the chasing side.

South Zone started their chase aggressively through opener Ricky Bhui, who scored a brisk 42. However, left-arm spinner Abid Mushtaq caused a brief scare by picking up a few quick wickets, leaving the batting side wobbling at 102 for three. Varma stayed calm under pressure, absorbing the spin threat and pacing his innings perfectly on a flattening pitch.

This win sets up a high-stakes final against East Zone, led by Ishan Kishan. The championship clash will begin

on September 6 at the MA Chidambaram Stadium in Chennai. This upcoming match marks the first time these two teams will face each other in a tournament final since the 1970 to 1971 season.

Having fallen short in last year's title match, Varma and his squad are carrying plenty of momentum as they chase the ultimate domestic trophy.

Kusal Mendis to lead SL-ENG in white-ball tour

COLOMBO

Sri Lanka Cricket has officially announced its squads for the upcoming white-ball tour of England. Wicketkeeper-batter Kusal Mendis will captain the team in both the T20I and ODI series. Meanwhile, explosive batter Charith Asalanka has been named vice-captain for all matches, which begin on September 15.

The touring party features a strong mix of youth and experience. Pathum Nissanka anchors the top order, supported by batters like Kamil Mishara, Kamindu Mendis, Janith Liyanage, and Pavan Rathnayake. Experienced all-rounders Dasun Shanaka, Wanindu Hasaranga, and Dunith Wellalage add great balance, giving the team multiple options with both bat and ball in tricky English conditions.

Shanaka makes a notable return to the ODI squad as Sri Lanka continues building toward the 2027 ODI World

Cup. The bowling unit for the 50-over games includes spin stars Maheesh Theekshana and Sachindu Colombage, alongside pacers Dushmantha Chameera, Eshan Malinga, Asitha Fernando, and Dilshan Madushanka.

For the T20I leg, players like Lahiru Udara and Sharindu Rathnayake join the setup. Fast bowlers Nuwan Thushara and Binura Fernando bring extra pace and firepower to the bowling attack.

Sri Lanka is chasing history on this trip, aiming to secure their first bilateral series victory on English soil in twelve years.

The adventure begins with the opening T20I in Southampton on September 15. Subsequent games take place in Cardiff and Manchester before the teams' transition to the three-match ODI series, which concludes at The Oval on September 27. The squad departs for England on September 5.

Jaime Faria books US Open clash with Alcaraz

NEW YORK

Jaime Faria is ready to step onto the big stage and chase a dream. The young tennis player from Portugal is stepping into the spotlight at the US Open. He is preparing for a massive second-round showdown against defending champion Carlos Alcaraz at Arthur Ashe Stadium.

Faria punched his ticket to this high-profile match after surviving a grueling five-set battle against American Jenson Brooksby. He jumped out to a strong start by winning the first two sets, but Brooksby fought back hard with a loud home crowd cheering him on. Instead of crumbling under the pressure, Faria held his nerve to close out the win. It was a sweet moment of redemption for the 23-year-old, who previously suffered a tough five-set loss to Frances Tiafoe at Roland Garros after leading by two sets.

That hard-fought victory was more than just a trip to the next round. It marked his first main-draw win at the hard-court major and made him only the

third Portuguese man to record match victories across all four Grand Slam tournaments, following in the footsteps of legends like Joao Sousa and Nuno Borges.

Faria knows his home country does not have a deep history in the sport. That reality only fuels his hunger to blaze a new trail. He wants to inspire the next generation back home and prove that a player from a non-traditional tennis nation can mix it up with the world's best.

Now ranked seventy-second in the world, Faria credits his recent success to a shift in mental toughness.

Working closely with former player Pedro Sousa has helped him sharpen his focus. Earlier this season, he also claimed the first top-ten win of his career by defeating Ben Shelton in Cincinnati, proving he belongs on the big tour.

Standing across the net will be World Number Three Carlos Alcaraz, who began his title defense with a straight-sets win.

Dewald Brevis reaches career best 4th in T20I rankings

DUBAI

England fast bowlers Ollie Robinson and Josh Tongue have made massive strides in the latest ICC Men's Test Bowling Rankings. Their stellar performances have helped England secure a commanding two-nil series lead over Pakistan in the World Test Championship.

Robinson earned back-to-back Player of the Match awards, including an eight-wicket haul at Lord's. This brilliant display pushed him up six places to 50th in the rankings, putting him just one spot shy of his career-best 4th place. Meanwhile, teammate Josh Tongue climbed four spots to reach a career-best 13th position after claiming five wickets in the match.

Despite Pakistan trailing in the series, some of their players still managed notable gains. Seam bowler Mohammad Abbas jumped ten spots to

joint-15th following a nine-wicket match haul. In the batting department, Saud Shakeel moved up 15 places to 18th after scoring a gutsy 97.

The latest rankings update also highlights standout performances from the Test match between India and Sri Lanka in Colombo. Sri Lanka's Sonal Dinusha surged to a career-best 25th position after hitting twin centuries, while teammate Pasindu Sooriyabandara leaped an incredible 170 places to 74th. India also saw success, with Devdutt Padikkal and Dhruv Jurel hitting brilliant centuries to reach new career-high rankings.

In the shortest format, South Africa's Dewald Brevis climbed to a career-best fourth place in the T20I batting rankings following strong displays in the ongoing tri-series in Windhoek. Players across multiple nations continue to elevate their standing as international cricket enters an exciting phase.
